DISC INSIDE

Made for the Australian Curriculum

Achieve! History

Get ready for the Australian Curriculum with editable worksheets that have been written for the needs of low literacy students.

Features

- ✓ Worksheets that help low literacy students understand key content and concepts.
- ✓ Activities designed to reinforce and enhance literacy skills.
- ✓ Emphasis on essential historical knowledge, understanding and skills.
- ✓ Comprehensive Teacher's Notes that provide clear objectives, background information, starter and extension activities.
- ✓ CD-ROM containing all pages from the book making them ideal for use on Interactive Whiteboards.
- ✓ Editable Word files on the CD-ROM that can be edited to suit the specific needs of students.
- ✓ All illustrations are included on the CD-ROM and can be used on new teacher created worksheets.

Software requirements

Windows *– MS Word 97 or higher, Adobe Acrobat Reader*

Mac *– MS Word 98 or higher, Adobe Acrobat Reader*

Windows – **1.** Put the disc in the CD-ROM drive and it should begin automatically.
2. If it doesn't, in Windows Explorer navigate to the CD-ROM and double-click the Achieve.exe file.

Mac – Put the disc in the CD-ROM drive and double-click the 'Achieve' icon.

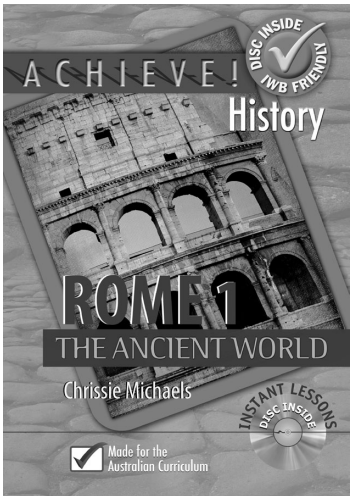
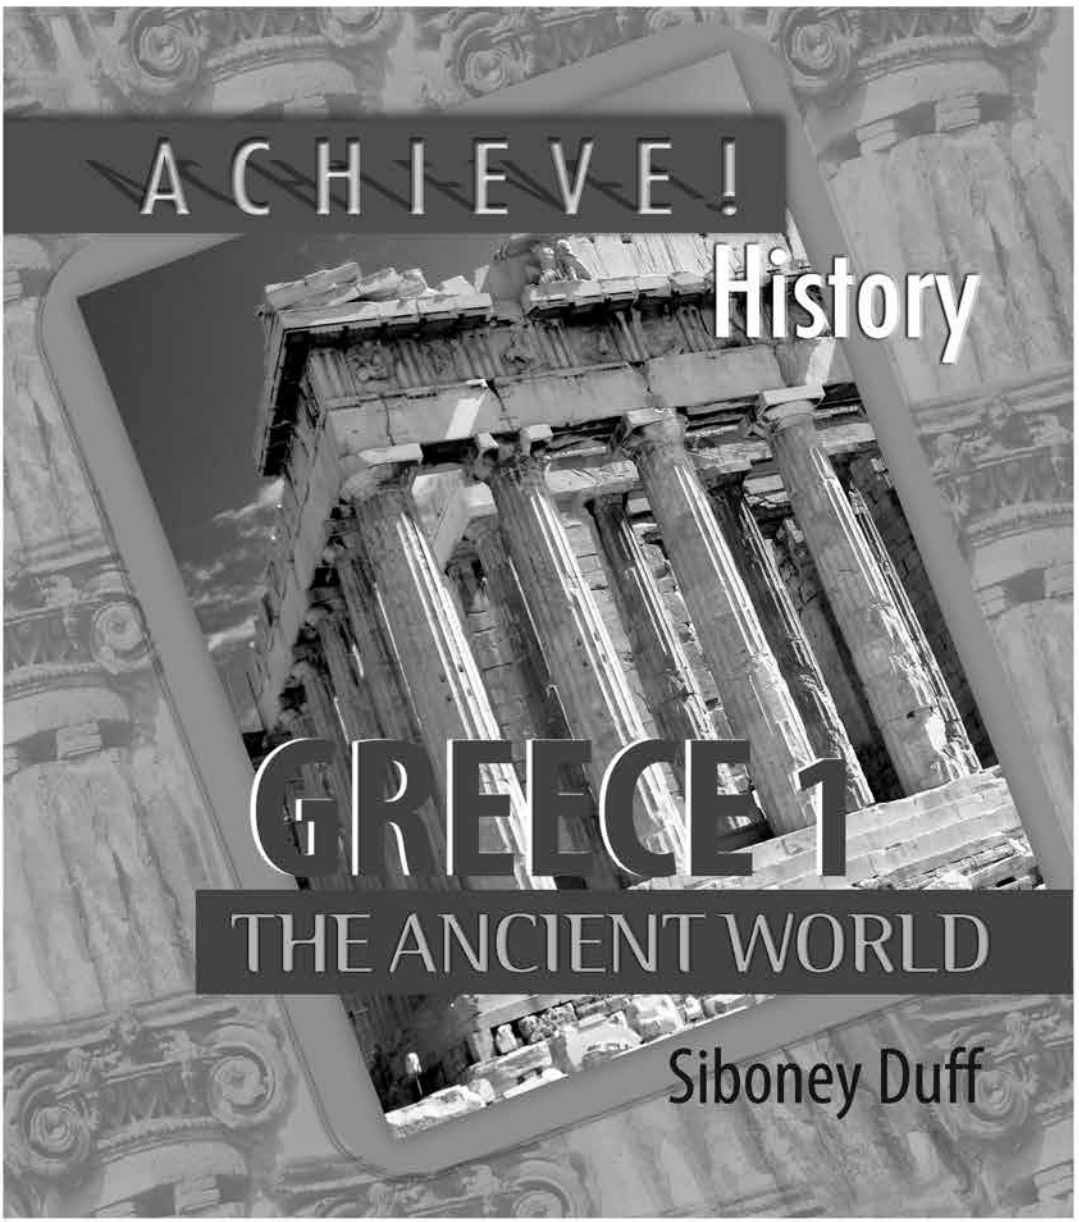
The Ancient World – Greece 1
ISBN 978 1 92168 056 4



The Ancient World – Rome 1
ISBN 978 1 92168 057 1



This book was commissioned by Jennifer Gough,
project management was undertaken by Vanessa Lanaway,
editing by Kirstie Innes-Will,
cover and page design by Gail McManus Graphics,
typesetting by Romy Pearse
illustrations by David Dickson.

Siboney Duff has worked with children and adolescents for more than 20 years in a variety of capacities, including as a teacher, health educator and counsellor. She has worked in both primary schools and high schools, and has also taught at TAFE and university level. Siboney has extensive experience writing educational material and developing teacher resources, and has a special interest in History and English subjects. She has degrees in Psychology, Sociology and Literature, as well as a Master of Philosophy from the University of Queensland. Siboney works hard to produce resources that are interesting, engaging and accessible, and that will support both teachers and their students in the classroom.

Introduction

Achieve!

The *Achieve*! series of History titles has been developed for teachers who require modified, curriculum-focused activities for secondary school students who struggle to read and comprehend regular classroom materials because of poor literacy skills. Many of the pages will also be suitable as supplementary material for regular classes.

The Ancient World: Greece 1 enables students to develop their historical knowledge and understanding of ancient Greece through the study of the origins of Greece and the land's physical features, everyday Greek life and society, politics and governance, the importance of religion, and the influence of war and Pericles. The content addresses key historical skills and concepts, including understanding sources and evidence, reasons for change and continuity, locating and categorising information and different perspectives.

The CD contains all the pages that are featured in the book, as well as a file of illustrations that can be used for other worksheets These documents can be easily edited to suit the individual needs of students.

This book is divided into ten units, each of which contains one or more photocopiable resource sheets and several activity worksheets. This will allow teachers to use the material in a variety of ways. For example, the unit could be taught as a lesson with students in groups of varying sizes. Alternatively, a single resource sheet and related activity sheets can be used as support material, for individual homework, assessment or revision.

The teacher's notes provide valuable guidance about using each unit, and contain the following elements.

Objectives – These are the key skills and knowledge learnt through using the worksheets.

Prior knowledge – This refers to the skills and knowledge required for students to complete the tasks. Some activities are more challenging than others, however, as a rule, students should have a reading comprehension age of six to nine years to be able to attempt the activities.

Background – This section provides additional guidance to help teachers to present a successful lesson. It may include definitions or further background notes about the subject matter.

Starter activity – Warm-up activities are provided to put the content into proper context and to gain student interest and attention.

Resource and activity worksheets – The resource sheets do not always contain activities and are used either to stimulate discussion or as a part of the unit's activities. The activity worksheets may be used sequentially or as stand-alone tasks, depending on the needs of the student.

Extension activities – Additional tasks are suggested to recap on the main skills or knowledge taught in the lesson, as well as ways to extend, assess or include technology in the lesson.

Curriculum links – The Australian Curriculum: Year 7 – The Ancient World: The Mediterranean

Teacher's notes – Land and sea

Achieve!

Objectives

- To be able to recognise the main geographic features of Ancient Greece and find it on a world map
- To learn about the topography and climate of Ancient Greece
- To discuss how the terrain and Mediterranean climate of Ancient Greece influenced farming practices and diet

Prior knowledge

Students should have some basic map-reading skills and be able to find their own country on a world map. They should also have a basic understanding of the relationship between climate and agriculture.

Background

Greece is located in a region known for its mild climate and proximity to trade routes. Its location influenced many aspects of Ancient Greek society. The diet of the Ancient Greeks was largely determined by the topography of the land, its closeness to open and sheltered seas, and the climate of the area. These factors also influenced modes of transport and popular activities. For example, the Ancient Greeks were strong seafarers – they used boats to trade, transport goods and fight wars.

Starter activity

As a class, use an atlas to identify where Greece is. Tell students that Greece didn't always have the same boundaries as the national borders that apply today. In fact, at times Ancient Greece was larger and included many different settlements. Discuss the sorts of factors that could have influenced how large Ancient Greece was – for example, wars, migration and trade.

Also discuss what is meant by a *polis*. This is covered briefly in the first resource sheet, but extra discussion would help students understand the concept of independent states, with their own laws and systems of government.

Resource and Activity sheets

Have students read the information on the Resource sheet 'Map of Ancient Greece' and study the map. Discuss the information provided. Ensure that students understand what polis means. Help students to pronounce the names of different poleis. Students should then complete the Activity sheet 'The land of Ancient Greece', referring to the Resource sheet as required.

Have students read the two Resource sheets on 'Farming in a Mediterranean climate'. Discuss the way climate and topography influence farming. Also discuss the role of the sea in providing food. Have students work in pairs to complete the Activity sheet 'Farming life'. They can write their answers in their workbooks if they need more space.

Extension activity

Ask the class to discuss the role of technology in farming practices and food transportation. Use the following questions as prompts for discussion: What types of food do you eat every day? Where does this food come from? Is it farmed locally or does it come from far away, perhaps even overseas? If so, how does it get here? Farmers and fishermen in Ancient Greece did not have access to modern technology – in what ways would the absence of modern technology have influenced what they farmed and the way they farmed it? How would they have transported their food and how does this differ to the way we transport our food?

Answers

The land of Ancient Greece **1** mountainous; **2** Miletus, Phacaea; **3** the Peloponnese; **4** Olympia; **5** True; **6** False; **7** False; **8** True

Map of Ancient Greece

- Greece is located on a **peninsula**, a piece of land surrounded mainly by water. Greece has a very long coastline with inlets, bays and harbours. Ancient Greece, which was known at the time as **Hellas**, also included many islands found in the Aegean Sea, the Ionian Sea and the Mediterranean Sea. As a result, the Ancient Greeks used boats a lot – for travel, trade and fighting in wars.
- The terrain of Greece is very mountainous, which made farming and travel over land difficult for the Ancient Greeks. The highest mountain in Greece is Mount Olympus, which was thought to be the home of the Gods. The Olympic Games weren't held there – they were held in Olympia.

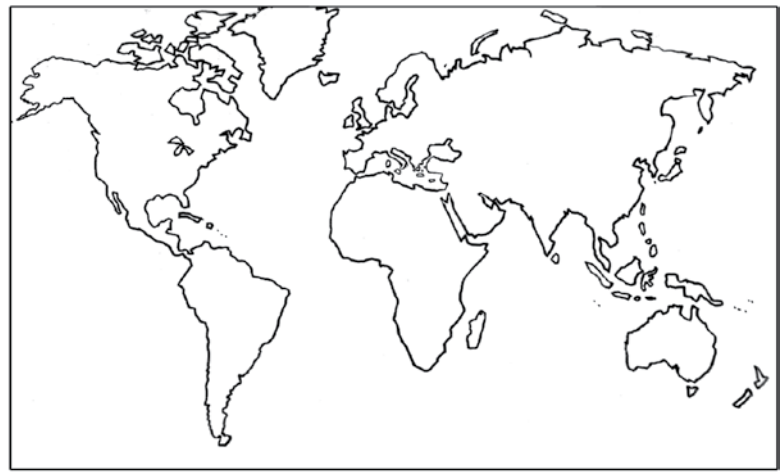
- Ancient Greece was much larger than the country we now know as Greece. It was made up of many separate **poleis** spread out over a vast area. A **polis** is a city-state – each major city formed the centre of a separate state with its own laws and government. Most of the poleis were in the area we now know as Greece, but there were also some across the Aegean Sea, on the western coast of Persia. The boundaries of Ancient Greece changed many times over the centuries, as the Ancient Greeks conquered or lost land in wars.

 © Siboney Duff and Blake Education, 2011

The land of Ancient Greece

☞ **1** To the right there is a map of the world. Mark the area of Ancient Greece. Also mark on the map the city where you live.

Choose the correct word from the word list to complete the sentence.



2 Ancient Greece was mainly _____.

mountainous	flat	land-locked

3 _____ and _____ were two of the Ancient Greek settlements located on Persian land.

Phacaea	Delphi	Miletus	Thebes

4 Sparta and Corinth are located in _____.

the Peloponnese	the Aegean Sea	Macedonia

5 The Olympic Games of Ancient Greece took place at _____.

Mount Olympus	Olympia	Sparta	Troy

Circle whether the following statements are true or false.

6 Mytilene and Ephesus were Ancient Greek settlements. True False

7 Lesbos is an island in the Ionian Sea. True False

8 Macedonia is located to the south of Athens. True False

9 Each polis has a separate government. True False

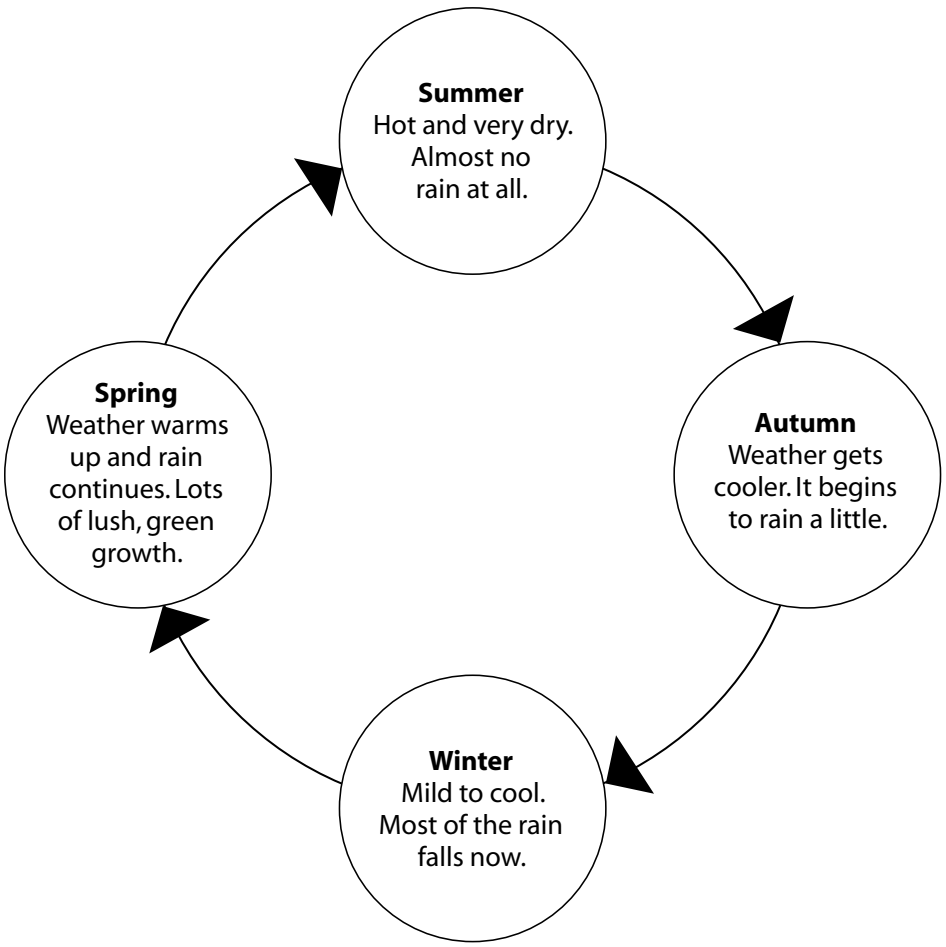
Farming in a Mediterranean climate (1)

Greece has a Mediterranean **climate**.



- Most people in Ancient Greece made their living from **farming**. We know this because the Ancient Greeks painted lots of pictures about the role of farming in their lives.
- Farming in Ancient Greece wasn't easy. The soil was very rocky and dry, and it was hard to grow **crops**. The mountains also made it difficult for farmers and **traders** to travel long distances.
- Fresh **water** was scarce, especially in summer, so farmers had to grow crops that needed very little water. However, their warm climate and mild winters did have one advantage – they could grow different crops at different times of the year, not only in summer.

 © Siboney Duff and Blake Education, 2011

Farming in a Mediterranean climate (2)

- Farmers in Ancient Greece grew wheat and barley, **olives**, figs and **grapes**. The grapes could be eaten fresh, dried to make sultanas, or fermented in pottery jars to make wine. The olives could be eaten, or pressed to make olive oil. Olive oil was used for cooking and lighting.
- Because Ancient Greece had lots of islands and a long coastline, there was easy access to the sea. As a result, the Ancient Greeks were great seafarers and many of them were fishermen. Fishermen caught **fish**, octopus, oysters and prawns.
- The rocky land made it hard to keep **livestock** such as cattle and pigs, so meat was very expensive and most people didn't eat it. Farmers kept chickens, goats and sheep. They also kept some dairy cows. Milk was mainly used to make cheese.
- Some farmers also kept **bees** for honey, in beehives made of terracotta. The Ancient Greeks did not have sugar, so honey was used as a sweetener.

- A typical **daily diet** for someone living in Ancient Greece might have been:
  - breakfast – wheat or barley bread dipped in wine, and sometimes porridge
  - lunch – bread dipped in wine, with olives, cheese and some fruit
  - dinner – the main meal of the day, it might include fish, vegetables, fruit, eggs, and honey cakes for dessert.

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Farming life

Use the Resource sheets 'Farming in a Mediterranean climate 1 & 2' to answer these questions.

Seasons

☞ **1** Fill in the table, describing the seasons where you live. For example, are your winters cold and wet, or are they mild? Does it snow in winter? Does it rain a lot in summer?

Summer	Autumn	Winter	Spring

2 Are your seasons the same or different to the seasons of Ancient Greece? How?

_____

Diet

3 List foods that both you and the Ancient Greeks ate.

_____

Name a dish from Ancient Greece that you don't eat.

_____

Farming

4 Name three foods obtained from the sea in Ancient Greece.

_____

5 Name three crops farmed in Ancient Greece.

_____

6 Are any of these crops grown in your state? _____

7 Name three crops that are farmed in your local area.

_____

8 Farming in Ancient Greece was very different to farming today. Would it have been easier or more difficult to be a farmer in Ancient Greece compared to being a farmer today? Why?

_____

_____

Teacher's notes – Origins of Ancient Greece

Achieve!

Objectives

- To learn about the origins of Ancient Greece
- To learn about three civilisations of Ancient Greece
- To explore the way geography shaped the development of the city-states of Athens and Sparta

Prior knowledge

Students should have a basic understanding of the geography of Ancient Greece.

Background

Ancient Greece evolved over thousands of years. At different times during this period, different cultures dominated the region. Each cultural era promoted different ways of doing things, so that there were different practices and beliefs during each of the stages of Greek history. As centuries passed, cities were settled (or conquered) by 'outsiders', and (in many cases) they in turn were 'invaded'. Three dominant civilisations of Ancient Greece were the Minoans, the Mycenaeans and the Dorians.

Starter activity

If you have not already done so, give students a copy of the Resource sheet 'Map of Ancient Greece' from unit 1. Use it as the basis for a class discussion around the following questions: What was it about the topography of Ancient Greece that made land travel difficult? What might have been an easier way for the Ancient Greeks to get around? Do you think they would have been content to stay in one city for their whole lives? What reasons might people have had for venturing beyond their own polis (city-state)?

Resource and Activity sheets

The Resource sheet 'The Bronze and Dark Ages' introduces students to three dominant cultures of Ancient Greece: the Minoans, the Mycenaeans and the Dorians. Discuss the information provided with students and talk to them about what a civilisation is. Remind students of the way that years are counted BCE ('Before the Common Era'), i.e. backwards from the Year 1 CE. before they complete Activity sheet 'Through the ages'.

The Resource sheets 'Landscape and the development of Athens' and 'Landscape and the development of Sparta' help students identify the distinctive geographical features of Athens and Sparta and encourage them to consider how these features influenced the development of these two important poleis.

The Activity sheet 'Barriers for expansion' consolidates what students have learnt from the resource sheets. Students can work with a partner to complete it.

Extension activity

Discuss the impact of geography on the development of poleis throughout Ancient Greece. Compile a class list of the types of natural features that can limit movement between cities and the expansion of a civilisation (for example, mountains, seas, deserts etc). Ask students to consider whether such features limit social expansion and connection today in the same way that they did thousands of years ago. How have modern societies overcome geographical boundaries? Are there any disadvantages to some means such as motorised transport and the internet?

Answers

Through the ages **1** Peloponnese; **2** civilisation; **3** bronze; **4** Minos; **5** Mycenaeans; **6** Dark; The Minoans settle in Crete – 2500 BCE; The Dorians invade – 1000 BCE; The Mycenaeans conquer the Minoans – 1400 BCE.

The Bronze and Dark Ages

The Bronze Age (from around 3650 to 1600 BCE)

The Bronze Age refers to the period when people began to use copper and tin to make bronze objects such as weapons. In Ancient Greece, there were several significant stages within the Bronze Age.

Two major **civilisations** of this time were the **Minoans** and the **Mycenaeans**.

The Minoans

The Minoans settled on the island of Crete in about 2500 BCE. They were named after their leader, King Minos. Copper and tin were plentiful on Crete, and the Minoans used these metals to make bronze weapons. The Minoans were a very advanced civilisation. They built excellent sewer and drainage systems, as well as roads to travel between cities. They were also famous for their ships.

The Mycenaeans

Around 1400 BCE, the Mycenaeans (from the north-east of the Peloponnese) conquered the Minoans. The Mycenaeans developed a thriving economy. They built forts in the hills with very thick and high walls. The forts were used as lookouts and to protect the Mycenaeans from invasion. Mycenaean military officers ruled their society and were highly respected. Like the Minoans, they made weapons from stone and bronze.

The Dark Ages of Ancient Greece (from around 1200 to 800 BCE)

- From approximately 1000 BCE, the Dorians, from the north, invaded Mycenae, as well as other parts of the Peloponnese, such as Corinth, Olympia and Sparta. The Dorians used weapons made of iron.
- The Mycenaeans and Minoans had always recorded their history, but the Dorians were different. They had no written language and they did not paint pictures. When the Dorians invaded Greek cities, writing and painting stopped, because people were more worried about escaping than recording anything. It was many centuries before writing and painting became common again. This period of Greek history is known as the Dark Ages of Ancient Greece.

 © Siboney Duff and Blake Education, 2011

Through the ages

The Minoans lived on Crete. Refer to a map (from unit 1 or the internet).

In which sea is Crete located? _____

☞ Fill in the spaces with the correct word from the word bank.

1 The _____ is a region of Ancient Greece.

2 A _____ is an advanced society.

3 Copper and tin can be used to make _____.

4 King _____ was king of the Minoan people.

5 The Minoans were invaded by the _____.

6 The period of time after the Dorians invaded is known as the _____ Ages of Ancient Greece.

Peloponnese
Mycenaeans
Minos
Dark
civilisation
bronze

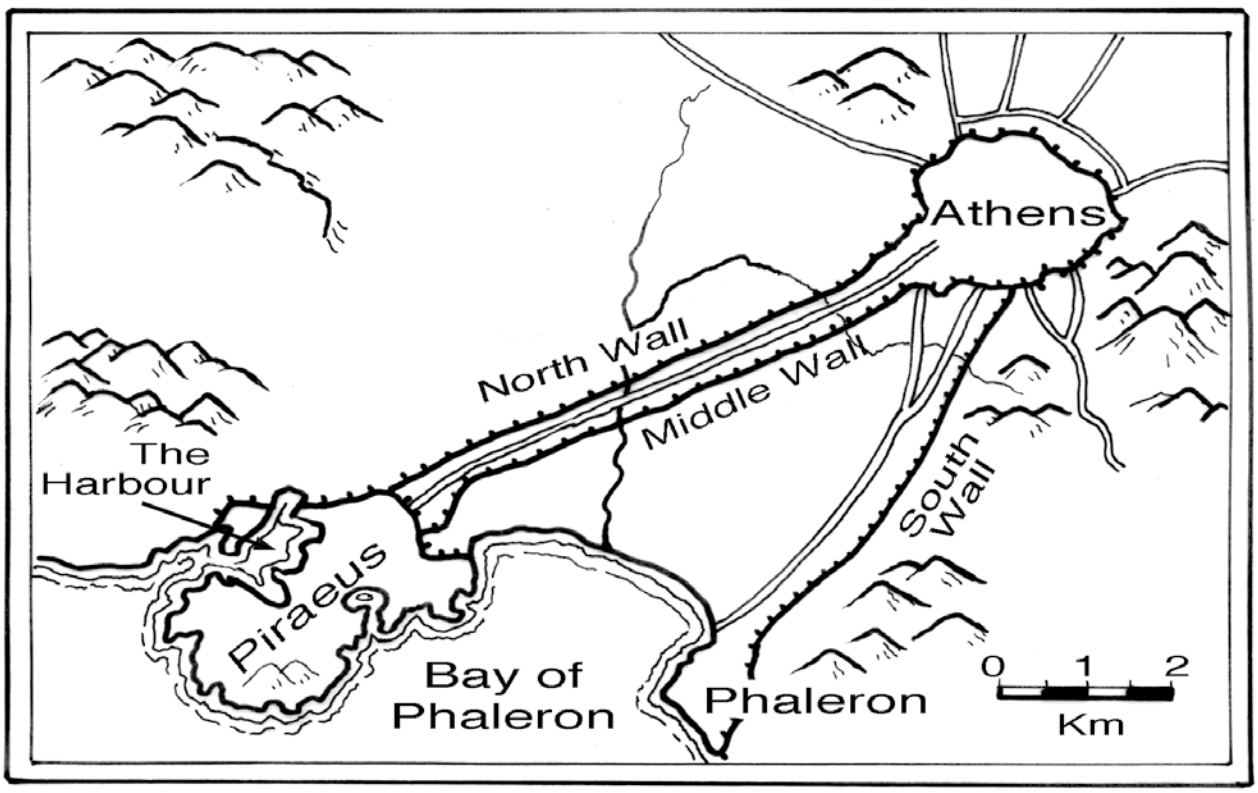
Draw lines to match the events to the dates when they occurred.

7 The Minoans settle in Crete.	2500 BCE
8 The Dorians invade.	1400 BCE
9 The Mycenaeans conquer the Minoans.	1000 BCE

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Landscape and the development of Athens

- The **polis** (city-state) of Athens was originally located on the **Acropolis**, which is a large, flat rock 150 metres above sea level. The Ancient Greeks considered it to be sacred. The top of the Acropolis has a surface area of 30 000 square metres. That's almost as large as four soccer fields.
- Over time Athens grew beyond the Acropolis, but Athenians still built their most important buildings and temples on the Acropolis. One of the most important buildings in all of Ancient Greece – the **Parthenon** – was located there. There was also a temple to the goddess Athena and a **theatron** (theatre). The Ancient Greeks built a large wall to protect the Acropolis.



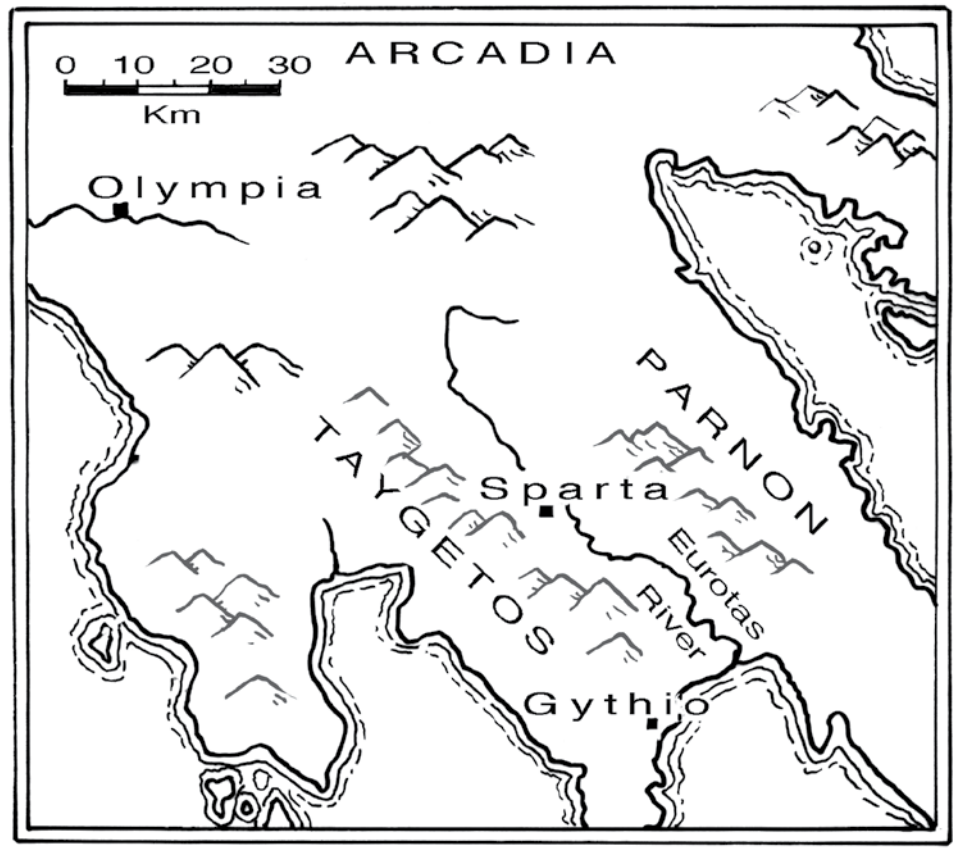
- Athens is located only 4 kilometres from the sea ports of Piraeus and Phaleron, which meant that the Athenians had easy access to the Aegean Sea, the Sea of Crete and the Mediterranean Sea. It was an easy, flat journey from Athens to either of these ports. The road to the ports was also protected by three walls. These protective walls and the flat land around Athens made it easy to watch out for invaders and to endure sieges. The mountain ranges a bit further out also helped protect Athens.

 © Siboney Duff and Blake Education, 2011

Landscape and the development of Sparta

- The Ancient Greek **polis** (city-state) of Sparta was located in the Eurotas Valley, in the south-eastern Peloponnese. The valley is bordered on almost all sides by large mountains – Taygetos (2407 metres high) to the west, Parnon (1940 metres high) to the east. The northern border of Sparta is separated from Arcadia by another mountain range. These mountains acted like walls, making access to Sparta difficult. This is one of the reasons that Sparta was never attacked. The mountains also helped protect Sparta from winds and storms.

- The Eurotas river flows through the Eurotas Valley. It provided the **Spartiates** (people of Sparta) with fertile land for farming crops. It also provided them with drinking water and water for their animals. Food was plentiful in Sparta.



- Sparta was not as close to a bay or sea as Athens. The Spartiates had to travel 46 kilometres to reach the sea port of Gythio. The journey to the port was not an easy walk (like it was for the Athenians). The port itself was also not as large and protected as either Piraeus Harbour or the port of Phaleron. As a result, the sea port of Gythio was used only for delivering supplies to Sparta.

Barriers to expansion

Mountains, fast-flowing rivers and great expanses of sea and ocean all made it difficult for the Ancient Greeks to get from one part of Greece to another. That's why independent **poleis** (city-states) formed throughout Ancient Greece and why it was difficult for Greeks to feel united as a nation for so many centuries.

Athens and Sparta became two of the greatest poleis of Ancient Greece. Both the Athenians and the Spartiates tried to make the best of the natural features where they lived.

☞ **1** Use the Resource sheets 'Landscape and the development of Athens and Sparta' to complete the table below. Work with a partner to complete it.

Natural feature	Was it in Athens or Sparta?	What was one advantage of this feature?	What was one disadvantage of this feature?
Piraeus Harbour			
Taygetus mountains			
The Athenian Acropolis			
Bay of Phaleron			
Eurotas River			
Parnon mountains

Teacher's notes – Politics and governance

Achieve!

Objectives

- To understand what is meant by polis/poleis
- To identify the features of different forms of government in Ancient Greece: aristocracies, dictatorships, oligarchies and democracies
- To learn about the rights of citizens (men), and to learn that non-citizens (women, slaves and foreigners) had no political rights

Prior knowledge

Students need no prior knowledge to complete these activities.

Background

Ancient Greece operated as a unified nation only during times of war or mass celebration. As a result, forms of governance varied between *poleis* (city-states). The four dominant forms of governance in Ancient Greece were aristocracies, dictatorships, oligarchies and democracies.

Starter activity

Write the word *governance* on the board. Ask students to brainstorm what they associate with *governance*. Write all suggestions on the board. Then write the following definition on the board and ask students to copy it into their books:

Governance refers to a system used to manage a community, organisation or nation.

Explain that in Ancient Greece there were many forms of governance and that these differed between poleis.

Resource and Activity sheets

The Resource sheet 'Governing the poleis' introduces students to the four dominant forms of governance discussed in this unit, as well as some of the inequalities in Ancient Greek society.

The Activity sheet 'Leadership and rights' first asks students to recap what they have learnt, then asks students to consider who they think would make a better ruler, an aristocrat or a tyrant. Discuss this question with the class. Mention that in Ancient Greek times the word *tyrant* did not have the negative connotations we now associate with it, and that often the people supported a tyrant. Finally, students are set some discussion questions about rights.

The Resource sheets 'Spartan oligarchy' and 'Athenian democracy' can be worked through together as a class. It may be helpful to project the sheets onto a large screen so that students can follow the information both individually and collectively. Then have students form pairs to complete the Activity sheet 'Who's in charge?', which helps them summarise what they have learnt.

Have students work in small groups to complete the Activity sheet 'Voting rights', then report their conclusions to the whole class. Note these on the board. Finally, summarise class findings and add any that have been missed. For example: all adults can vote, voting applies to all levels of government, elections are held regularly (every three to four years).

Extension activity

Athenian democracy was only one type of democracy. Other democratic poleis formed their own rules and democratic structures. As a class, ask students to create the structure of a democracy for their school. They can decide who can vote, what they can vote on, how often meetings take place and who can attend. Invite students to use their imaginations and not be limited by current rules and structures!

Answers

Leadership and rights **1** wealthy, noble families; **2** a dictator or tyrant; **3** a dictator; **4** False; **5** False; **6** True

Governing the poleis

Ancient Greece was made up of lots of city-states. Each city-state was called a **polis** – the plural is **poleis**. Each polis had its own laws and was independent of any other polis. The Ancient Greeks, who were called the **Hellenes**, spent most of their lives in their own polis. They only got together as a nation during times of war (such as the Persian Wars) and for big cultural games (such as the Olympic Games). The most powerful poleis of Ancient Greece were Corinth, Sparta and Athens.

Citizenship

The Ancient Greeks believed that citizenship was very important. However, not everyone could be a citizen. Not only did a citizen of a polis have to be born in that polis, but they also had to be a wealthy adult male. Slaves, women, peasants and migrants were not allowed to be citizens.

The Ancient Greeks believed it made sense that citizens of a polis had more rights than people who weren't citizens. Only citizens were allowed to vote. Men had more rights than women, because the Ancient Greeks believed that men were smarter and stronger than women. The role of the leaders in each polis was to uphold these beliefs and the rights of citizens.

The forms of government differed between poleis, but there were four main types of government:

- **aristocracies**, where the polis was ruled by wealthy, noble families
- **dictatorships**, where the polis was ruled by an individual (a dictator, who in Ancient Greece was known as a **tyrant**)
- **oligarchies**, where the polis was ruled by a small number of people
- **democracies**, where the polis was ruled by the citizens.

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Leadership and rights

☞ Read the Resource sheet 'Governing the poleis' and then complete the following sentences.

1 An aristocracy is ruled by _____.

2 A dictatorship is ruled by _____.

3 A tyrant is a _____.

Circle whether the following statements are true or false.

4 An aristocracy is formed by common people, including farmers and slaves. True False

5 An oligarchy is ruled by the citizens of a polis. True False

6 Men had more rights than women in Ancient Greece. True False

I am an aristocrat. My family has helped rule this polis for 80 years. We are wealthy and smart. Our slaves say we are kind. We know what is best for the people.

I am a tyrant. I rule this polis by myself. I act swiftly to fix problems and I do not put up with troublemakers. I know what is best for the people.

7 Who do you think would make a better ruler – the aristocrat or the tyrant? Why?

_____

_____

Work with a partner to answer the following questions in your workbooks.

8 What is a right? What do we mean by 'equal rights'?

9 Did all the Ancient Greeks have equal rights? Who was treated the best and worst?

10 Do we have equal rights today?

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Spartan oligarchy

An **oligarchy** is a system of government in which only a few people rule. The most famous – and complicated – oligarchy was in Sparta. The flowchart below shows how many groups were involved in governing Sparta and what they each did.

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Athenian democracy

The word **democracy** means 'rule by the people'. Athenian democracy was one of the first known examples of democracy. In Athenian democracy, there was not a particular person who was the ruler. Instead, a public assembly of all male citizens (over 20 years of age) would meet 40 times a year. The assembly voted on issues to do with the running of the polis. The assembly in Athens was enormous – at least 6000 men had to attend.

The assembly

- The assembly also had nine **archons** (chief magistrates or judges). The archons were chosen by lottery and served for one year. Each archon looked after a certain group of issues and made sure things ran smoothly.
- The decisions of the assembly were passed on to the council, which was known as the **boule**. The boule was made up of 500 men, each of them chosen from a lottery and required to serve for one year. Only Athenian male citizens who were over 30 years of age were able to serve on the council. The council wrote up the agenda for the assembly, and also carried out the decisions made by the assembly. They met almost every day in chambers in the **agora** (a meeting place in the centre of Athens) to discuss the running of Athens.
- Athens was an example of **direct democracy**. Direct democracy occurs when citizens are able to put across their own points of view and vote on each policy individually.

Voting rights

Not everyone in Ancient Greece could vote.

I am a Spartan woman. My husband is part of the Assembly, but I cannot attend their meetings. I am not able to vote and I have no say in how the polis is run.

I am an Athenian slave. I have no power. My master is kind but I know other slaves whose masters beat them. I can never be a citizen and I will never be able to vote.

I am a **metic** (a trader who migrated to Athens). I came here from Lesbos. I run a successful business trading wheat and olives, and I employ many people. I am not allowed to vote.

☞ Work in small groups to answer the following questions.

1 Do you think it was unfair that only citizens could vote? Remember that only wealthy men who were born in Greece could be citizens. _____

_____

2 How does the democracy of Athens compare to the democracy of today? What are some similarities? What are some differences? Fill in the table below with your answers.

Similarities	Differences

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Teacher's notes – Everyday life

Achieve!

Objectives

- To learn about the different social groups and strata that made up Ancient Greek society
- To recognise the differences between the way males and females lived and were treated in Ancient Greek society, including differences in education and everyday duties
- To understand the importance of presentation, grooming and exercise in Ancient Greek society

Prior knowledge

Students should know that Ancient Greece was made up of independent city-states called *poleis*. They should also have some understanding that Ancient Greek society was not equitable.

Background

Ancient Greek society was very different to contemporary Western society. It was ordered and hierarchical, slaves were integral, and females were considered socially and intellectually inferior to males. However, while life in Ancient Greece was very different to life today, many of the things we now take for granted, such as voting and education, had their origins in Ancient Greece. Grooming was an important part of everyday life in Ancient Greece, much as it is in our society today.

Starter activity

As a class, identify evidence of social structure in modern Western society. For example, do all children have to go to school? Are there differences between the jobs men and women can do? Do we have different 'classes' of people? Are some people prevented from owning land or voting? Then ask them how they think day to day life might have been different for people living in Ancient Greece.

Resource and Activity sheets

The Resource sheet 'Social strata' presents students with a visual representation of the social structure of Athens and Sparta. Discuss the information provided. Ensure that students understand what strata means. Help students to pronounce the names of each social *stratum*. Discuss how people in higher strata had more rights and opportunities than those in lower strata.

The Activity sheet 'Social groups in Athens and Sparta' is designed for students to summarise what they have learnt.

The Resource sheets 'Family life in Athens' and 'Family life in Sparta' allow students to compare and contrast the life of an Athenian family with the life of a Spartan family. Students can then work in pairs to complete the Activity sheet 'Life in Athens and Sparta'. You could then discuss their answers as a class and note them on the board. Similarities include the nuclear family unit and the fact that the father is the head of the family; differences include the focus on military life for Spartan males and the focus on fitness for both sexes in Sparta.

In the Activity sheet 'Making a good impression' students are presented with some opinions about the importance of grooming, presentation and physical activity in Ancient Greece. Students are encouraged to compare our current focus on physical appearance and exercise with that of the Ancient Greeks.

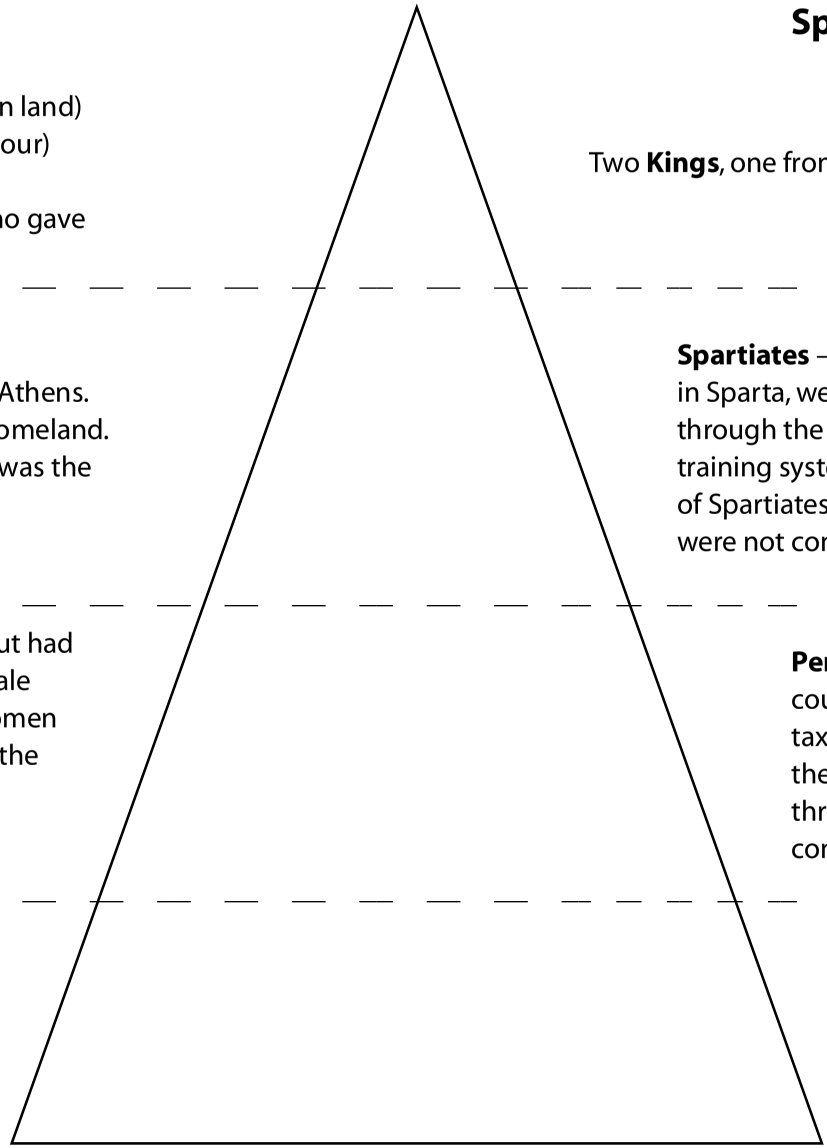
Extension activity

Ask the class: Was life in Ancient Greece easy or difficult? How different would it have been living in each social class? You could also compare and contrast the influence of modern technology on society: Modern technology is central to our lives today, but in Ancient Greece they did not have such technology. How different would it have been to live in Ancient Greece without technology? Consider both work and leisure activities.

 © Siboney Duff and Blake Education, 2011

Social strata

Both Athens and Sparta had rules about who was important in their society. This created different social levels called **strata**. Athens and Sparta each had their own social strata.



Athens

Citizens (men only). Types of citizens included:

- **thetes** (mainly craftsmen who did not own land)
- **hoplites** (mainly farmers who owned armour)
- **knights** (rich men with war horses)
- **pentakosiomedemnoi** (very rich men who gave money to the army).

Metics – non-citizen families who migrated to Athens. They often traded between Athens and their homeland. Men tended to trade with other men, and so it was the male metics who ran the family businesses.

Freedmen – men who had once been slaves but had been freed as a reward for their loyalty. Only male slaves could be granted their freedom as all women (whether slaves or citizens) were always under the control of a man. The only way a female slave could be freed was if she was allowed to marry a non-slave male.

Slaves – Male slaves were often used as rowers on **triremes** (three-decked boats). Female slaves helped with household chores.

Sparta

Two **Kings**, one from each of the two royal lines.

Spartiates – male citizens who had been born in Sparta, were over 30 years old and had been through the **agoge** (Sparta's education and training system for boys). The wives and daughters of Spartiates were also called Spartiates, but they were not considered citizens or allowed to vote.

Perioeci – craftsmen and women, who could not vote, even though they paid tax. Perioeci men sometimes served in the military, but as they had not been through the agoge they were not considered citizens.

Helots – male and female slaves who worked the land and helped with household chores.

Making a good impression

The Ancient Greeks cared a lot about how they looked. Grooming was an important part of their everyday life, and so was exercise. Read what these people have to say about grooming in Ancient Greece.

I just turned 18. Now I can train at the gymnasium. Only men can train there. I want to be an excellent athlete.

I am 13 years old. Like most girls, my hair is dyed blonde and I braid it everyday.

I make sure my children are always clean and tidy. I fill a small, round, clay pot with water and use chalk to wash them.

I am a grandfather now, but I still exercise. I want to stay fit and strong.

The barber regularly trims my beard and cuts my hair. My fingernails and toenails are cleaned at the same time.

Sometimes I colour my face and wear ornaments to make me look beautiful.

☞ **1** Why do you think the Ancient Greeks cared so much about how they looked?

_____

_____

2 Is appearance important today? Why?

_____

_____

3 Are there any similarities between your life and life in Ancient Greece? Explain your answer.

_____

_____

Teacher's notes – Warfare

Achieve!

Objectives

- To learn about the role of the hoplites and the military strategy of the phalanx
- To understand the importance of the military in Ancient Greece, especially for the Spartans
- To recognise the role of the Ancient Greek fleet in sea-battles and learn about triremes

Prior knowledge

Students should have a basic understanding of the geography of Ancient Greece. Students should also have completed unit 4, Everyday life, and/or have an appreciation of the role of the military in Spartan society.

Background

Ancient Greece was made up of separate *poleis* (city-states) that only came together as a unified nation for significant ceremonies and events, and in times of war. The Ancient Greeks were considered to be worthy adversaries and had a reputation for being brave and intelligent warriors. This was especially evident in the loyalty shown by the hoplites and the development of military strategies such as the phalanx (foot soldier formation).

Sea-based warfare was also a staple of ancient battles in the Mediterranean, and the Greeks were considered masters of it. Their creation and mastery of the trireme, coupled with their bravery and fierce loyalty to Hellas (Greece), saw them win many conflicts against much larger fleets.

Much of their fighting was internal, for example between Athenians and Spartans.

Starter activity

Ask students what, if anything, they have heard about Ancient Greek warfare. Have they, for instance, seen movies such as *The 300 Spartans*, or heard of the Battle of Marathon? Have they heard the terms *hoplite* or *phalanx* before, and do they know what they mean? Ask students how they think the Ancient Greeks might have fought against each other and foreign enemies? What sorts of weapons might they have used? Have students refer to the map of Ancient Greece from unit 1, and ask them to consider the role of the sea in Ancient Greek warfare.

Resource and Activity sheets

The Resource sheet 'The hoplites and the phalanx' and the Activity sheet 'Preparing for battle' provide students with a comprehension activity. Read the Resource sheet as a class, discuss the information then have students complete the activity.

The Activity sheet 'The Battle of Marathon' includes activities that help students gain an understanding of the story of Pheidippides and the origins of the modern marathon.

Read the Resource sheet 'The fleet', then complete the Activity sheet 'Triremes'. You could take the class out into the yard and measure out the size of a trireme to help students comprehend how small and crowded they were.

Extension activity

Discuss how different warfare in Ancient Greece would have been compared to modern warfare. For example, hoplites had to walk to battlegrounds carrying their own armour and weapons, combat was face-to-face and bloody; and sieges were a common way of undermining a city's resilience. Is it surprising, then, that courage and fitness were emphasised so strongly in Ancient Greek culture?

Answers

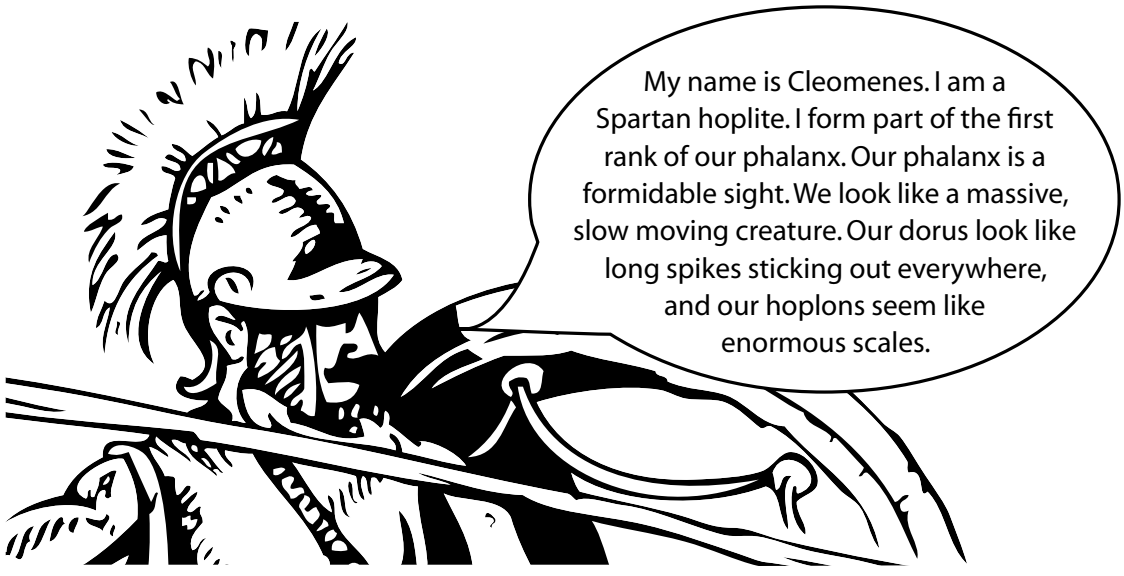
The hoplites and the phalanx

Ancient Greek soldiers were known as **hoplites**. The best hoplites came from Sparta.

- Hoplites had only two weapons: a long spear (**doru**) and a short sword (**xiphos**). They also used a large round shield (**hoplon**) made of wood and covered in leather and bronze. They wore metal guards called **greaves** on their skins and a metal breastplate called a **cuirass**. On their heads they wore a metal **helmet**.
- Hoplites had to buy their own armour. Rich men had armour made of metal. Poor men often made their armour by gluing together layers of cloth. Sometimes they wore no armour at all and simply went into battle carrying their shield and a spear.

A phalanx

Hoplites fought in a military formation known as a **phalanx**. A phalanx was formed by lining up hoplites into rows known as **ranks**. Each rank had roughly 12 men. There were usually eight to ten ranks in a phalanx, all lined up behind one another.



Hoplites in the first few ranks pointed their spears out in front. The rest of the hoplites pointed their spears overhead. All of the hoplites locked their shields together to create a solid barrier that would protect them from enemy arrows. The phalanx moved slowly – no faster than walking pace – so it could stay in formation.

The Battle of Marathon

The Ancient Greeks didn't shy away from battle, even when they were outnumbered. At the **Battle of Marathon**, 10 000 Greek hoplites faced 20 000 Persian soldiers – and won!

The Persians, led by King Darius, had threatened to invade Athens. The Athenians were so worried that they began evacuating the city.

Before the battle began, Pheidippides – an Athenian hoplite – ran from Athens to Sparta to get help. It took him two days and two nights to get there and he ran all the way – 240 kilometres. He didn't stop to rest after that. Instead, he fought long and hard at Marathon. Then, when the Greeks had defeated the Persians, he ran all the way from Marathon to Athens (42 kilometres) to tell everyone the good news. Poor Pheidippides died from exhaustion when he got to Athens, but his legend lives on.

☞ **1** Fill in the missing words.

Pheidippides was a _____ from _____.
He ran all the way from _____ to _____ to get reinforcements for the battle with the Persians.

When the battle ended, Pheidippides ran all the way from _____ to _____ to tell the Athenians of their victory.

What do we call a long distance running race that covers exactly 42 kilometres?

_____

2 Use an internet search engine (such as Google) to find a map that shows where your school is located. Now use that same map to locate a place that is 42 kilometres away from your school. Then, find a town or city that is 240 kilometres from your school.

Fill in the spaces below, then print a copy of the map and paste it into your workbook.

My school is located in _____ .

_____ is 42 kilometres from my school.

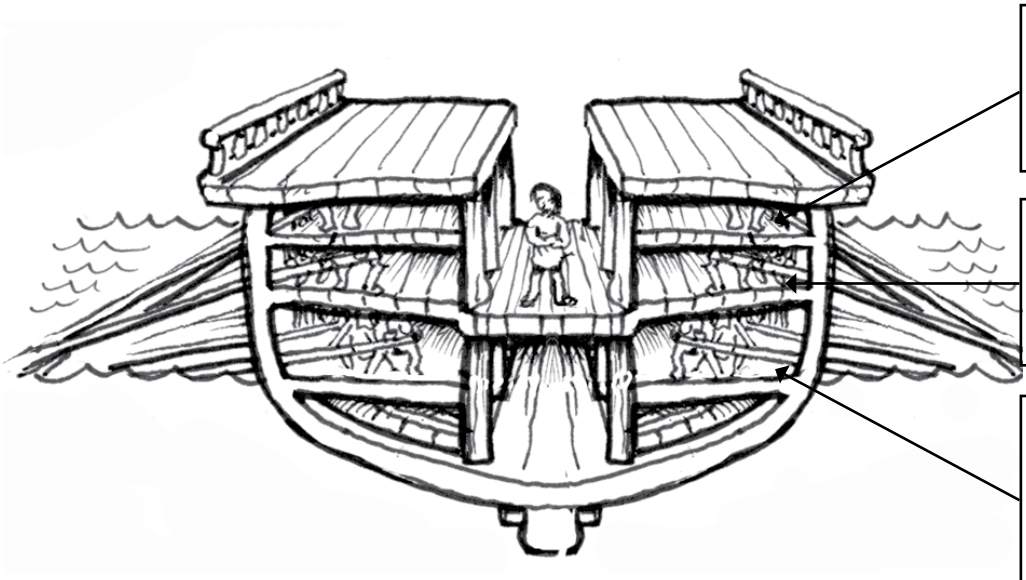
_____ is 240 kilometres from my school.

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

The fleet

Greek warships used sails and oars. The largest warships were called **triremes**. Triremes were roughly 36 metres long (about as long as three buses lined up end to end) and about 6 metres wide.

Triremes had 170 oars in total, so they needed 170 oarsmen to row the ship. The oars were spread out over 3 tiers:



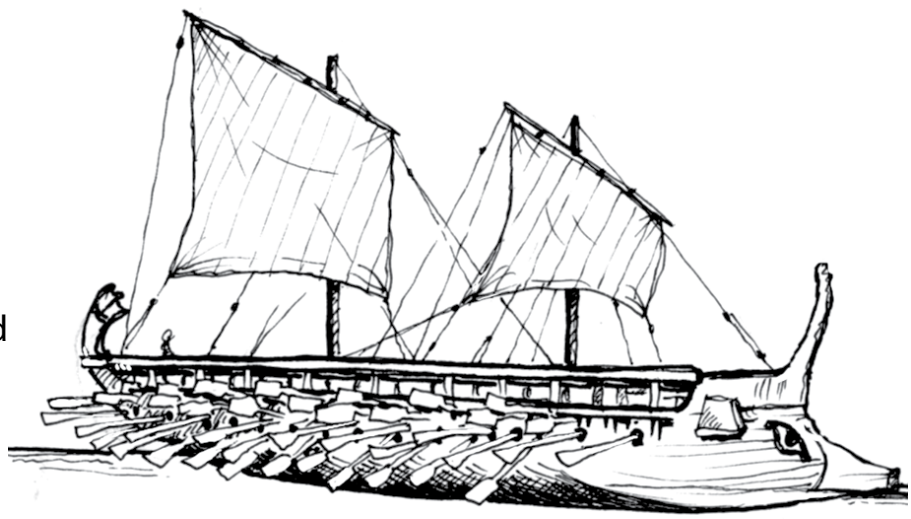
Top tier – 31 oars on each side. Oarsmen were called **thranites**.

Middle tier – 27 oars on each side. Oarsmen were called **zeugites**.

Lowest tier – 27 oars on each side at this level. Oarsmen were called **thalamites**.

All the oarsmen on triremes were freemen.

Triremes were very agile in the water. They could be steered to make sharp turns and were very fast. In sea battles, the triremes would try to ram into enemy ships. The bow (front) of a trireme had a long point which was often covered in metal. This point would be rammed into ships to damage them. Sometimes, the soldiers travelling on the trireme would then jump onto the enemy ship and attack the enemy sailors.



Triremes

Triremes had several features. Some were advantages. Others were disadvantages.

☞ **1** Use the Resource sheet 'The fleet' to complete the table below. Consider whether each feature was an advantage or a disadvantage, and place a tick in the correct column. The first one has been done for you.

Feature	Advantage	Disadvantage
The long steering oars at the back of the trireme made tight turns possible.	✓	
Triremes were very fast – they could travel at seven knots (or 13 kilometres an hour).		
Triremes were small enough to get through tight spaces.		
Triremes were designed to ram into enemy ships using a sharp ram at the front of the trireme.		
Triremes were shallow, so they could be used in shallow seas.		
Triremes had no space for sleeping or cooking, so they couldn't be used for long trips.		
Triremes were shallow, which meant they could tip over in a storm.		

I am an oarsman in the Athenian fleet. I row on the lowest tier of the trireme. A trireme is as tall as two men, so it gets very cramped below deck. I was scared the first time I went out on a trireme, but now I am proud of what I do. Without us, many battles would probably be lost.

2 Do you think being an oarsman would have been a good job or a bad job? Why?

_____

_____

Teacher's notes – Religion

Achieve!

Objectives

- To understand the meaning of the word myth
- To recognise the significance of mythology to the Ancient Greeks
- To learn about the most important Titans and Olympian gods in Ancient Greek mythology

Prior knowledge

Students need no prior knowledge to complete these activities.

Background

Ancient Greek mythology is one of the great hallmarks of the ancient world. Not only were the Ancient Greeks polytheists – that is, they believed in more than one god – but they also believed that their gods were acutely interested in the lives of humans. Ancient Greek mythology is a collection of stories featuring the various gods and often including heroes and humans as well.

Starter activity

Write the word myth on the board. Ask students to brainstorm everything they associate with myths. Write all suggestions on the board. Then ask students if they've heard any myths, or even parts of myths. Can they share them with the class? Can students name any of the Ancient Greek gods?

Resource and Activity sheets

The Resource sheet 'Ancient Greek mythology' introduces students to the main kinds of characters in Ancient Greek myths: Olympian gods, Titans, heroes and humans. The Activity sheet 'The gods' helps them consolidate what they have learnt and then read some background on one of the most important gods, Zeus.

The Activity sheet 'Athena and Arachne' introduces a simple myth to students, with an accompanying cloze activity.

You could have students work in small groups to complete the Activity sheet 'The myth of Demeter, Persephone and Hades'. After reading through the myth together, they could discuss their answers before writing their own responses in their workbooks.

The final Activity sheet, 'Mythology and everyday life', summarises some aspects of Ancient Greek religious life, with a cloze activity.

Extension activity

All societies have their own creation myths – stories that explain how people came to exist, what their purpose in life is, and what the afterlife (if, according to a particular social group, it exists) looks like. Ask students to suggest reasons why creation myths evolve – for example, people prefer belief to uncertainty, myths support belief systems and help provide social order, myths/beliefs can be used to justify actions. Ancient Greek mythology also tends to be very patriotic, with male gods assuming the positions of most power and female gods tending to focus on home and children. Can students identify any examples? Responses could be written in two columns on the board (one listing 'powerful' gods and one listing 'kind' gods) and students could be asked why they think there was a gender division.

Answers

The gods legendary, contest, ruler, scared, mad, disloyal

Athena and Arachne Arachne, please, bad, goddess, woman, weaving, weaving, arachnids

Mythology and everyday life gods, sea, weather, please, approve, ceremonies, statues, angered, punished, right, goddesses, children, god, Bible, community

Ancient Greek mythology

The gods were a very important part of Ancient Greek life. The people of Ancient Greece believed that many gods ruled Greece and that they would be punished by the gods if they did anything wrong.

The word **myth** simply means 'story'. Ancient Greek myths were basically a rich collection of stories involving Gods, heroes and humans. All three were important and all three interacted with each other, but they were each very different.

- **Gods** were immortal. There were two types of gods: the **Titans** and the **Olympians**. The Titans were giants, and the mountains of Greece were their thrones. The Olympians lived on Mount Olympus, but they loved to meddle in the lives of humans. Sometimes they even fell in love with humans and had children with them. Gods could not control humans, because humans have free will, but they could make life hard or easy for them.
- **Heroes** were mortal. They had one parent who was a god and one who was human. Even though great myths existed about heroes such as Achilles, they still lived among the people in Ancient Greece.
- **Humans** were also (obviously) mortal. Even though they were not heroes or gods, they were still able to fall in love with them. The gods thought humans were interesting and attractive.

The first generation of Ancient Greek gods were the Titans. They were known as the Elders. There were 12 original Titans. The first were Uranus (the sky) and Gaia (the Earth). Together they had many children, most of whom ruled with them.

↓

Eventually the Titans were challenged by the Olympians for the power to rule over Greece. The Olympians were the children of the Titans.

↓

A war then took place between the Titans and the Olympians. This war was known as the Battle of the Titans.

↓

The Olympians won the battle and they became the new gods.

The gods

☞ Use the Resource sheet 'Ancient Greek mythology' to answer these questions.

1 Name one difference between a god and a hero.

_____

_____

2 Name one difference between a hero and a human.

_____

_____

3 Name one difference between a human and a god.

_____

_____

Zeus

4 From the box, find synonyms (words with the same meaning) for the underlined words and write them in the brackets.

contest	ruler	scared	legendary	mad	disloyal

One of the most <u>famous</u> (_____) of the Olympian gods was Zeus. Zeus led the <u>challenge</u> (_____) against the Titans and became known as the <u>King</u> (_____) of the gods. He ruled over the skies and was the god of thunder and lightning. Zeus was also the patron god of the Olympic Games. The ancient Greeks built a temple in his honour at Olympia.

Zeus's weapon was a lightning bolt. The Ancient Greeks were <u>afraid</u> (_____) of Zeus. They thought he might throw a bolt of lightning at them if they made him <u>angry</u> (_____).

Zeus was married to the goddess Hera. Zeus and Hera argued a lot because Zeus was <u>unfaithful</u> (_____) to Hera.

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Athena and Arachne

Athena was the goddess of wisdom, war and crafts. She was very clever and could make amazing things. One day Athena heard about a young woman called Arachne. Arachne was a very talented weaver and was proud of her skill. She had even dared to think that her weaving was better than Athena's. Athena heard this and was annoyed. She dressed up as an old woman and paid Arachne a visit.

When asked by the old woman if she thought her skill was better than the goddess Athena, Arachne said 'yes'. The old woman then revealed that she was really Athena, but Arachne refused to be intimidated.

Athena challenged Arachne to a weaving contest and Arachne accepted. Athena wove a beautiful tapestry that showed the gods doing good things. Arachne's tapestry showed the gods being selfish and unkind.

Athena was so angry with Arachne for disrespecting the gods that she hit Arachne. Then she felt sorry for her. Instead of killing her, Athena turned Arachne into the first spider, so that she could spend her life weaving.

That's how it came to be that spiders belong to the class of animals called 'arachnids'.

☞ **1** Complete the following sentences.

The weaver _____ made a tapestry that did not _____ the gods. It showed the gods doing _____ things. Athena was the _____ of crafts. She dressed up as an old _____ and challenged Arachne to a _____ contest. The group of animals that spiders belong to is called _____. It is named after Arachne.

The myth of Demeter, Persephone and Hades

1
My name is Persephone.
I love animals and nature.
My parents are Demeter (goddess of the earth and harvest) and Zeus.
I was out picking flowers one day when I was captured by Hades.

2
I am Hades,
God of the underworld.
I fell in love with Persephone's beauty.
I had to have her, so I kidnapped her and dragged her to the underworld with me.

3
I am Demeter,
Persephone's mother. When Persephone went missing, I was so sad that I neglected everything – plants died and crops failed. Helios (the sun) told me what had happened, and then Zeus forced Hades to return my daughter.

4
But I was smart! I tricked Persephone into eating some pomegranate seeds before she returned to the surface.
The seeds came from the surface, but because she ate them in the underworld she was bound to return here every year.

5
When Persephone came back,
I could not contain my joy. The earth was lush and green because of my happiness.
But every year, when my daughter returns to the underworld, the earth is barren once more.

☞ Answer the following questions in your workbook.

1 How many gods are in this myth and what are their names?

2 Why does Hades take Persephone into the underworld?

3 What does Hades trick Persephone into doing? Why does he do this?

4 How does Demeter react every time her daughter returns to the underworld?

5 Circle the correct answer:
This myth explains …

- the cycle of the seasons.
- the relationship between mothers and daughter.
- what can happen if you fall in love with a stranger.

Objectives

- To identify art forms (including theatre, sculpture, pottery and music) that were central to Ancient Greek society
- To recognise the significance of art to the Ancient Greeks

Prior knowledge

Students need no prior knowledge to complete these activities.

Background

Art was very important to the Ancient Greeks. Their culture and beliefs were expressed through various art forms, including music, theatre, sculpture and painted pottery. The Ancient Greeks honoured the gods and their society through these art forms, and developed a very rich and varied artistic culture, examples of which still survive today and which still influence modern day artists, musicians and playwrights.

Starter activity

Write the word *art* on the board. Ask students what they think of when they hear or see the word *art*. Do they think only about paintings and drawings? Can they think of any other art forms? Prompt students, if required, to consider things such as sculpture, music and theatre as art also. Ask students if they can think of any examples of Ancient Greek art. Statues will often be the most common response. Invite students to share anything they already know about Ancient Greek art.

Resource and Activity sheets

The Activity sheet 'Theatre' introduces students to the Greek *theatrons* by having them label a diagram. The final activity requires them to create a mask of their own. You may need to discuss this as a class first, to get students thinking about the ways they can design their masks to depict different emotions and characters. For example, female masks might have long hair, masks depicting old characters might have excessive wrinkles, and angry masks might have furrowed brows and hard, straight mouths.

The Activity sheet 'Sculpture' contains information about this important aspect of Ancient Greek art. Students then answer questions about one of the statues presented. They can do this individually in their workbooks or through discussion in pairs.

The Activity sheet 'Painted pottery' provides information and then asks students to draw their own design. The sheet can be completed individually or in pairs.

The Activity sheet 'Music' introduces some Ancient Greek instruments. The questions can be answered individually or students could work in pairs to respond to them.

Extension activity

Art best comes to life when students can feel, experience, hear and build the various art forms discussed. To this end, the class could work on a play that depicts an aspect of Ancient Greek life or a Greek myth they have studied. Tasks could be divided between students and could include: play writing, costume design, mask making, acting, singing and music. This could be either an elaborate or a simple project, depending on the resources and time available.

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Theatre

Drama was an important part of daily life for the people of Ancient Greece. The plays were mainly about the gods, and they would be performed in front of large crowds in an outdoor theatre called a **theatron**.

Each **polis** (city-state) had a theatron. Theatrons were enormous and able to fit thousands of people at a time. They were usually built on hillsides, so that people sitting in the back rows could see the stage.

Plays were considered so important that **poleis** (city-states) competed with each other to see who had the best playwrights and performers. One of the most famous playwrights was Sophocles. He wrote more than 100 plays.

The actors were always men. They wore colourful costumes and dramatic masks to help the audience identify different characters. The actors didn't speak. Instead, the story was sung by a choir.

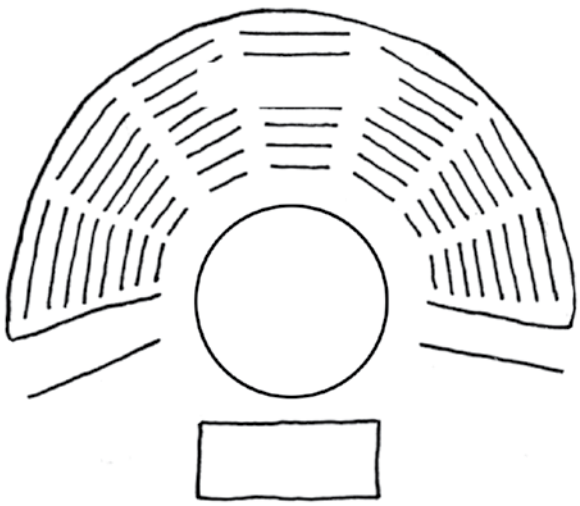
☞ **1** Label the different parts of a Greek theatron.

Theatron – where the audience sat

Orchestra – the stage area, usually round

Parados – the aisles that led from backstage to the orchestra (or stage area)

Skene – the backdrop to the stage



2 Draw your own dramatic mask. Keep in mind that the mask needs to show a lot of things. For example, is your character happy, sad or angry? Is it young or old? Is it male or female? How will you design your mask so that the audience knows these things just by looking at the mask?

3 Think of three ways in which Ancient Greek theatre is different to theatre today and write your answers in your workbook.

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Sculpture

The Ancient Greeks loved to build large statues, especially of their gods. They also produced lots of two-dimensional sculptures on the sides of buildings – these are called **relief** sculptures.

The most famous of the Ancient Greek relief sculptures were made by Phidias for the **Parthenon**, a huge temple in Athens. Phidias, with the help of other sculptors, made relief sculptures that went all the way around the Parthenon.

The Ancient Greeks worshipped perfection. Their statues of humans and gods focused on the perfect human body. Muscles were defined and male bodies were often shown nude.

Most Ancient Greek statues were carved out of marble and limestone. Not many of them still exist, although we know what they looked like because the Ancient Romans made copies of them and those copies still survive today.

☞ Below are two drawings of famous Ancient Greek sculptures. Choose one and then answer the following questions:

1 Why did you choose this statue?

2 What does the statue tell you about why it was made?

3 What does the statue tell you about Ancient Greek culture?

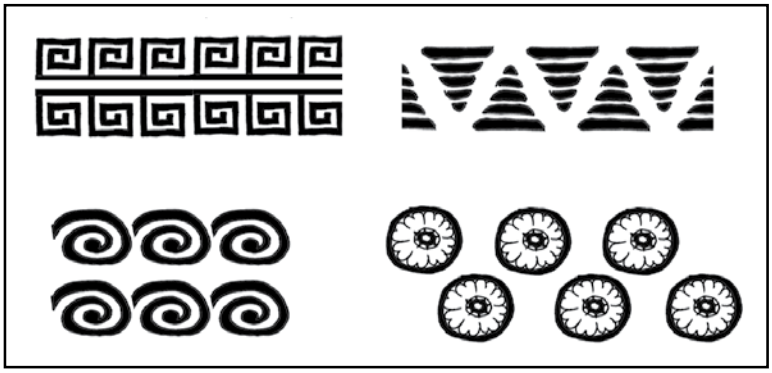
4 Can you think of two reasons why the Ancient Greeks made many of their statues life size or larger?

Artemis

The discus thrower

Painted pottery

The Ancient Greeks used clay to make pottery. Their pottery was very practical. They used it to make things such as jugs, plates and urns. They would then decorate their pottery by painting images onto it. At first they painted **geometric** patterns like these:



Later, their paintings became more complex. They painted pictures of the gods and also scenes of daily life. See the example on the right.

☞ **1** Make your own pottery design in the style of the Ancient Greeks. In the box on the left, draw a pattern that could be used to decorate the rim of a plate. The pattern can be geometric or full of swirls, but try to make it repetitive.

2 In the box on the right, design an image to decorate the jug. Your image should show an aspect of modern everyday life – for example, people on mobile phones or playing computer games.

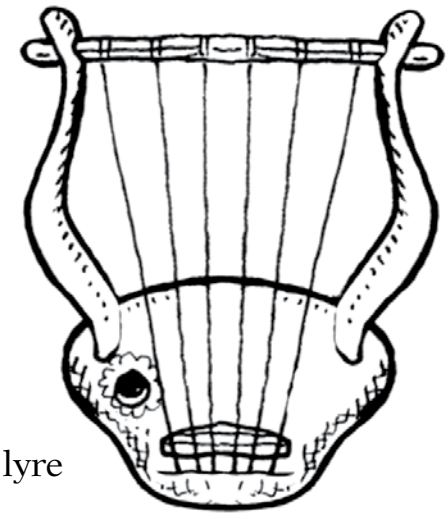
 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Music

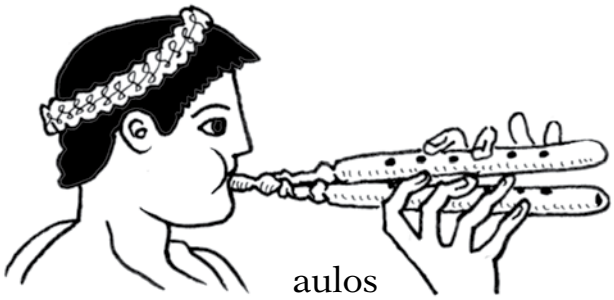
The Ancient Greeks believed that music was a blessing. They thought the gods had invented many of their instruments and they believed that playing music brought them closer to the gods. Music could be heard at almost every ceremony and public event, including sporting events. People sang a lot, and choirs provided much of the music during Ancient Greek plays.

Instruments

The **lyre** was a stringed instrument with a round, hollow part that was usually made using a tortoise shell. It was played by strumming or plucking the strings with a **plectrum** (or pick). There was also a larger version of the lyre, called a **kithara**. The kithara was much bigger and made of wood.



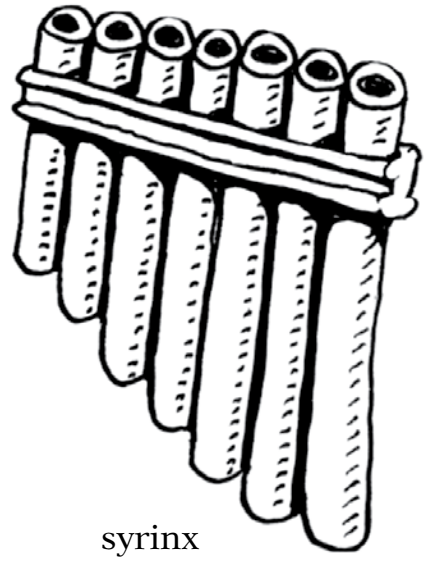
lyre



aulos

The **aulos** was made of two reeds. It was played by blowing into the reeds. It was very hard to play the aulos because the reeds were very narrow.

The **syrinx** was made by tying together pipes of different lengths. It was played by blowing across the top of the pipes.



syrinx

☞ **1** Name some instruments that we have today that look like the lyre, aulos or syrinx.

2 When do we use music in our modern culture? How does this compare to the way the Ancient Greeks used music?

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Teacher's notes – Architecture

Achieve!

Objectives

- To recognise the main features of Ancient Greek buildings: angularity, columns and decorations
- To recognise the main differences between the Doric, Ionic and Corinthian styles
- To understand that Greek architecture evolved over time

Prior knowledge

Students should have completed unit 1 (Land and sea) and unit 7 (Art) before commencing this unit.

Background

Ancient Greek architecture was not only very distinctive and beautiful, but its style has influenced many architects throughout the ages. Like most civilisations, the architecture of the Ancient Greeks reflected not only their aesthetic values, but also their beliefs and the things they considered important. Mythology was extremely important to the Ancient Greeks, and this is evidenced by the extensive use of decorative elements such as friezes and statues, as well as by the fact that temples were among the most elaborate and impressive structures they built.

Starter activity

The built structures of a civilisation reveal a lot about the interests, beliefs, values and lifestyles of its people. Write the phrase 'What do our buildings say about us?' on the board. Invite students to think about what our buildings reveal about their contemporary culture. For example, which are the largest buildings in our society? Which buildings are considered the most important? Why? Do we decorate our buildings? How? Why? What do our buildings tell us about our local climate?

Remind students that a study of the architecture of Ancient Greece is more than simply looking at pictures of buildings; it can actually reveal much about their culture and about the way they lived.

Resource and Activity sheets

The Activity sheet 'Building Ancient Greece' introduces students to features of Ancient Greek architecture. They should then work in small groups to complete the questions on the Activity sheet 'Building then and now' which asks students to compare and contrast ancient and modern building methods.

The Resource sheet 'Ancient Greek houses' provides information on the features of Ancient Greek neighbourhoods, houses and furniture. Students should read through this information, then work with a partner to complete the Activity sheet 'Houses then and now', which invites them to compare and contrast these features with those of modern houses. If time permits, responses could be shared with the class.

The Resource sheet 'The Parthenon (1)' provides information on this famous building. Students then complete the Activity sheet 'The Parthenon (2)' to summarise what they have learnt.

Extension activity

Students could work in small groups to build a model of a famous Ancient Greek building. They could conduct their own research, develop drawings from different perspectives and build a model using recycled materials (such as used tissue boxes, toilet paper rolls, matchboxes, etc).

Answers

***Building Ancient Greece* 1** practical, columns, simple, fancier, theatres, educated, sculptures, architecture, ornate.

The Parthenon (2) large, honouring, most, eight, relief

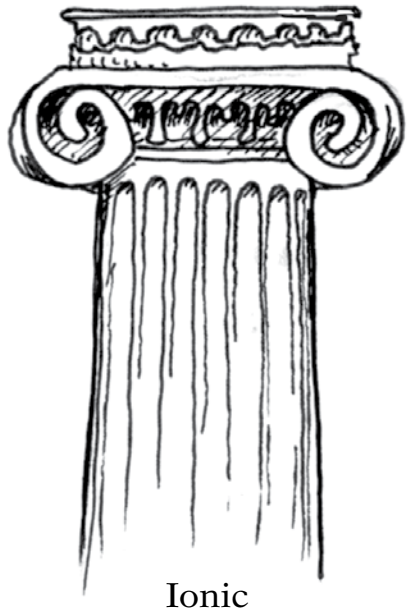
 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Building Ancient Greece

Ancient Greek buildings were usually square or rectangular. Columns were very common and were placed around the **perimeter** (outside edge) of large buildings and all temples. In the beginning the buildings were simple. Over time, they became more and more elaborate.

There were three main building styles in Ancient Greece.

Doric



Ionic

Corinthian

☞ **1** Use the words in the word bank to complete the following text.

architecture
theatres
sculptures
fancier
practical
ornate
educated
simple
columns

- The **Doric** style was the most basic. Buildings were _____ rather than decorative. Most buildings had _____ , but the columns were just _____ cylinders. The Doric style was very popular.
- The **Ionic** style was a little _____ than the Doric. More temples were built, as well as public buildings such as _____ and the **gymnasia** where boys were _____ and men met to talk. Temples were bigger and were decorated with _____ . The columns were also more detailed.
- **Corinthian** _____ was the most elaborate. Columns were highly decorated and buildings were very _____ . This style wasn't used much by the Greeks, but the Romans – who eventually conquered Greece – used it a lot.

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Building then and now

The most common materials used by the Ancient Greeks for building were stone and clay bricks. Both of these are heavy. Think about how buildings are made today.

☞ **1** What equipment do we use?

_____

2 Would the Ancient Greeks have had this equipment?

_____

3 Make a list of the sorts of building problems the Ancient Greeks might have faced. Think about things such as: transport, sourcing materials, the hilly and rocky terrain, lifting heavy materials and building huge structures.

_____

_____

_____

4 Choose three of these problems and then try to come up with a possible solution for each.

Problem	Solution
1	1
2	2
3	3

5 Finally, share your ideas with the rest of the class.

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Ancient Greek houses

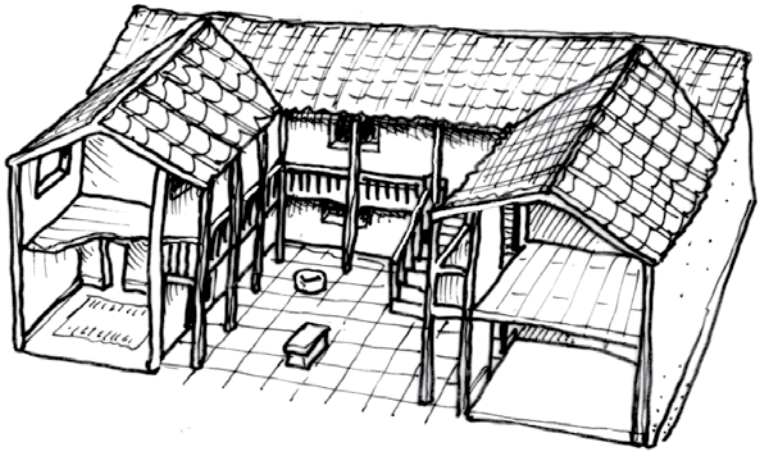
Early Greek houses were usually made of **wood**, **clay** bricks or **stone**, and were very basic. They had two or three rooms and sometimes a **courtyard**. Roofs were made of reeds or clay tiles. The floors of most houses were tiled using clay tiles or pebbles.

Over time, the style of houses changed. Rich people had very large houses with many rooms. The houses of poor people remained small and basic.

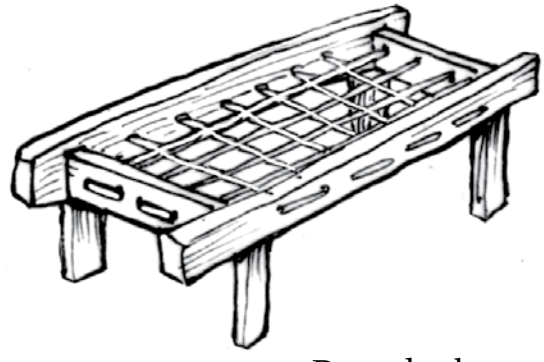
Courtyards were very important. They allowed people to be outdoors and still within the privacy of their homes. Women spent most of their time at home, so the courtyard gave them an opportunity to be outside without leaving their house. Protection was also very important to the Ancient Greeks, so most houses were surrounded by high stone walls and strong gates.

Neighbourhoods were usually made up of five or six houses lined up next to each other along a straight road. These houses usually shared a common wall, much like modern townhouses. There would often be one house that stood alone in the middle of a neighbourhood and was bigger and more ornate than the others. This house belonged to wealthy people.

Ancient Greek **furniture** was very practical. There were lots of stools, chairs and tables for cooking and eating. Beds were made of rope stretched across a wooden frame. Mattresses were stuffed with dry leaves and grasses. Fireplaces kept families warm in winter, and were used for cooking and to heat water for bathing.



Courtyard house



Rope bed

Houses then and now

In lots of ways the homes and neighbourhoods of Ancient Greece were very similar to our own. In other ways they were very different.

☞ Read the Resource sheet 'Ancient Greek houses' and then answer the questions below.

1 The houses in Ancient Greece were different depending on whether a family was wealthy or poor. Is it the same today? How can you tell if a house belongs to a wealthy or poor person today?

_____

_____

2 Courtyards were an important feature of Ancient Greek homes. How do people today enjoy the outdoors and still have privacy?

_____

_____

3 In what ways was the furniture used by the Ancient Greeks different or similar to the furniture you use?

_____

_____

4 Did the neighbourhoods of Ancient Greece look very different to the neighbourhood you live in? How were they different? How were they similar?

_____

_____

_____

5 Is home security important to people today? How did the Ancient Greeks protect their homes? How do people today protect their homes?

_____

_____

_____

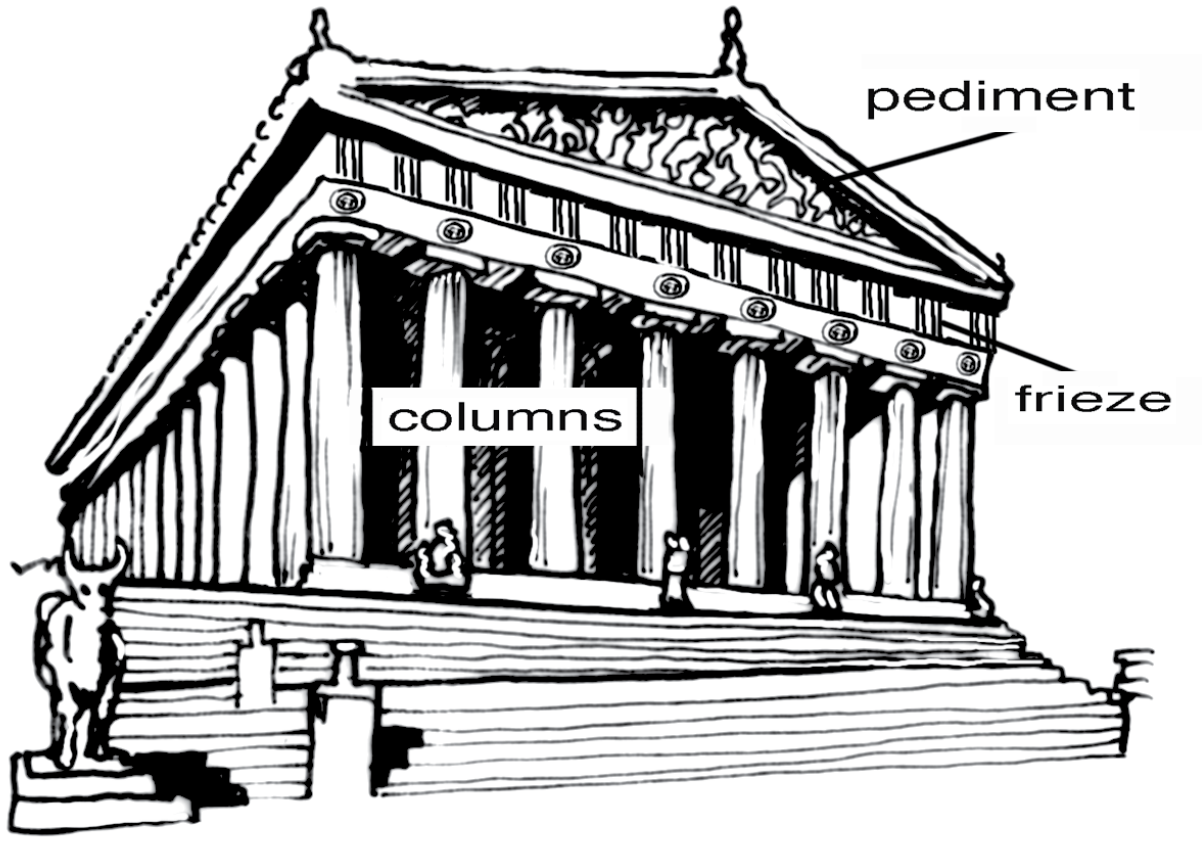
 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

The Parthenon (1)

The temples of Ancient Greece were very impressive. The gods were very important to the Ancient Greeks and they wanted to honour them through the temples they built. Temples were some of the largest buildings in a **polis**. They were rectangular structures with **columns** across the front. Most temples had six columns and were decorated with a **frieze** – a band of relief sculptures around the **perimeter** of a building. A temple would also have a **pediment**, the decorated triangular part at the front of the temple.

The most impressive Ancient Greek temple ever built was the **Parthenon**. The Parthenon was built on top of the Acropolis, the highest hill in Athens. It was built around 440 BCE to honour the goddess Athena.

The architects who designed the Parthenon wanted it to be the best temple ever. They wanted it to be enormous and they wanted it built entirely out of marble. They gave it eight columns across the front instead of the usual six. They also gave it a very decorative frieze. The frieze of the Parthenon depicted the gods and told mythological stories using pictures.



© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

The Parthenon (2)

☞ **1** Use the Resource sheet 'The Parthenon (1)' to complete the activities on this page. Write the correct word in the space provided.

Temples were usually _____ (small / large) buildings. They were built as a way of _____ (honouring / angering) the gods. The Parthenon is the _____ (most / least) impressive of the temples built in Ancient Greece. It has _____ (six / eight) columns and is decorated with lots of _____ (release / relief) sculptures.

2 Complete the following table.

Architectural feature	Description
Frieze	
Column	
Pediment	

3 Below is a drawing of the Parthenon. Colour the pediment in blue, the columns in red and the frieze in green.

Teacher's notes – Pericles

Achieve!

Objectives

- To explore the life and contributions of Pericles, one of the most significant leaders of Ancient Greece
- To introduce students to the concept of primary and secondary sources in historical study
- To encourage students to interpret a primary source

Prior knowledge

Students should have completed unit 1 (and preferably also unit 3) prior to commencing this section. They should have at least a basic understanding of the way the city-state of Athens was governed, and have heard of the Parthenon and the Acropolis.

Background

Ancient Greece became as strong and successful a civilisation as it did thanks largely to the efforts of numerous significant individuals. One of those was Pericles, a dominant political figure of Athens. Not only did Pericles lead the rebuilding of Athens after the second Persian War, but he also argued strongly in favour of democracy at a time when it was not the norm in Athens.

Starter activity

Ask students to brainstorm as many significant figures as they can think of from the twentieth and twenty-first centuries. What made these people significant? What did they do that we still remember them for; even when (in many cases) they've been dead for years? Discuss with students the fact that Ancient Greece became the notable civilisation that it was because of the many people who made a difference to Ancient Greek society. One of those people was Pericles.

Resource and Activity sheets

The Resource sheet 'Who was Pericles?' provides students with information which they consolidate by completing the cloze activity on the Activity sheet 'What did Pericles do?'

The Resource sheet 'Pericles' Funeral Oration' introduces students to the term primary source and presents them with a famous example. They should then work in pairs to complete the Activity sheet 'Interpreting a primary source'.

Extension activity

Pericles was a noted orator. He was very careful about his use of language and about choosing the most appropriate words to get his thoughts across and to convince people to support his ideas. His speeches were so famous that they've survived for thousands of years and are still very relevant. Ask students to choose a contemporary issue they feel passionate about and to write a speech that tries to convince the rest of the class of their point of view. Students then read their speeches out to the class.

Answers

What did Pericles do? **2** Pericles, Athens, orator, democracy, Thucydides, Persian, Acropolis, Parthenon, Piraeus

Who was Pericles?

Pericles lived between 495 and 429 BCE. He was one of the most important leaders of Ancient Greece. He was born in Athens and entered political life as a young man.

Pericles was a well-educated man and he understood the power of words. He was very careful about what he said and the way he said it. His speeches, which aimed to inspire Athenians, were even recorded by Thucydides, a famous Ancient Greek historian who lived at the time of Pericles.

Pericles believed that Athens was the greatest **polis** (city-state) of Ancient Greece. His speeches (also called **orations**) were designed to make people feel good about Athens and its people. Pericles spoke of how important Athens was to the evolution of Ancient Greece. He also spoke of the importance of democracy and did his best to convince people it was a good thing.

Pericles believed in the value of things like buildings, roads and temples. He felt that these things showed the values and wealth of a society. He also felt that buildings should be useful as well as attractive. For example, he convinced the Athenians that it would be a good idea to build walls to protect the road from Athens to the port of Piraeus.

During the second Persian War, Athens was attacked by the Persian army. The Athenians had fled Athens during this attack, leaving many of its buildings to be destroyed by the Persian army. Eventually the Greeks defeated the Persians and resettled in Athens, but many of their buildings and temples had been destroyed. Pericles was in charge of rebuilding many of these, including the Parthenon on the Acropolis.

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

What did Pericles do?

☞ **1** Read the Resource sheet 'Who was Pericles?' and then unscramble the words in the box.

nrtehaPon	_ _ r _ _ _ n _ _
sorpolicA	_ c _ _ _ _ _ _ s
nhetAs	_ t _ _ n _
clireePs	_ _ _ _ c _ e _
sPainer	_ _ _ s _ _ n
creamodcy	_ _ _ _ _ _ _ _ y
ausPire	_ _ _ _ _ _ s
diceshudTy	_ h _ _ _ _ _ e _
ratroo	_ r _ _ o _

2 Use the unscrambled words above to complete the sentences below.

_____ was one of the most important politicians of Ancient Greece. Pericles lived in _____. He was very proud of Athens and the Athenian people, and he encouraged them to be proud of their city and themselves.

Pericles was a terrific _____, which means he was good at speeches. In some of his speeches he spoke about the importance of _____. His speeches were so impressive that the historian _____ recorded them.

During the second _____ War, Athens was attacked by the Persian army. The Athenian people fled Athens to escape. When they returned, many of their buildings had been destroyed, including the Parthenon on the _____.

Pericles helped to rebuild the _____. He was also in charge of lots of other building projects in Athens, including building walls to protect the road to _____.

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Pericles' Funeral Oration

Historians use primary and secondary sources to better understand historical events.

A **primary source** is something that was produced during the historical period being studied. Some examples of primary sources include buildings and **artefacts** (things made by people), such as statues, pottery, and things that people said and which were recorded at the time.

A **secondary source** is something that was produced after the historical period being studied has ended.

Speeches (or **orations**) made by Pericles and recorded at the time by an Ancient Greek historian, Thucydides, are examples of primary sources. Below is an excerpt from the **Funeral Oration** given by Pericles at the end of the first year of the Peloponnesian war. This oration was in honour of the Athenians that had been killed during the war.

I will speak first of our ancestors, for it is right and seemly that now, when we are **lamenting** (mourning) the dead, a tribute (a sign of respect) should be paid to their memory. There has never been a time when they did not **inhabit** (live in) this land, which by their **valour** (bravery) they will have handed down from **generation** (a group of people born around the same time) to generation, and we have received from them a free state. But if they were worthy of praise, still more were our fathers, who added to their **inheritance** (something that is handed down after death), and after many a struggle **transmitted** (passed on) to us their sons this great empire (a powerful country or region).

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Interpreting a primary source

☞ Read the Resource sheet 'Pericles' Funeral Oration' and work with a partner to interpret each of the following sentences from the Oration. The first one has been done for you.

Sentence	What does it mean?
I will speak first of our ancestors, for it is right and seemly that now, when we are lamenting the dead, a tribute should be paid to their memory.	Pericles wants to acknowledge the ancestors because they are dead. The speech is in honour of Athenians who have died.
There has never been a time when they did not inhabit this land,	
which by their valour they will have handed down from generation to generation,	
and we have received from them a free state.	
But if they were worthy of praise, still more were our fathers, who added to their inheritance, and after many a struggle transmitted to us their sons this great empire.	

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Teacher's notes – The legacies of Ancient Greece

Achieve!

Objectives

- To learn about several significant legacies of Ancient Greece which influence the modern world: the Olympic Games, the concept of democracy, Aesop's fables and mathematical discoveries

Prior knowledge

Students should be familiar with the names of Zeus and Hera, and know where the Olympic Games were held.

Background

The Ancient Greek era was a time of prolific intellectual and cultural growth, the influences of which can still be felt today. In the study of history in general, it is important for students to recognise the significance and relevance of the past in creating the present; Ancient Greece provides many concrete examples of this relationship between past and present.

Starter activity

Write the question 'What is a legacy?' on the board and ask students to respond. Encourage students to guess or make suggestions, even if they are not sure. If students do not come up with the right definition, give it to them: a legacy is anything that is left by predecessors or ancestors. Are legacies always a good thing? Can they sometimes be bad? Can students think of any legacies left to them by their parents and grandparents? Can they think of legacies left to the nation as a whole by past generations? Reinforce the idea that the past influencing the present is one of the reasons that history is such an important subject.

Resources and Activity sheets

The Activity sheet 'The Olympic Games' contains a cloze activity that gives students information about the origins of the Olympic Games. Once they have answered the final question (about the benefits of the Olympic Games) ask students to share one of their three benefits with the class. Write these contributions on the board.

The Activity sheet 'Democracy' begins with information on democracy in Ancient Greece and then gives students some reflection questions. They should work with a partner to complete these. They are also prompted to design a poster to be shared with the class. These can be displayed in the classroom or even throughout the school.

After reading the Resource sheet 'Aesop's fables' students can work with a partner to complete the questions. Some students may not be familiar with the fables 'The tortoise and the hare' or 'The boy who cried wolf' (although this is unlikely) – you could recap the stories for them briefly, or pair students who haven't heard of those fables with students who have. Students might like to share their fables with the rest of the class.

The Activity sheet 'It's all in the numbers', on mathematics, can be completed by students individually.

Extension activity

Some people think that history is not relevant to the present. This activity is designed to encourage students to consider the continuing relevance of historical study (which includes looking at evidence and analysing the material found) by seeing both sides. Divide the class in half. One half of the class will argue that that 'history is dead and irrelevant' and the other half will argue that 'our history affects our present and is relevant'. Set the debate up so that for each argument presented someone has a chance to make a counterargument.

Answers

The Olympic Games Olympic, Women, wrestling, Zeus, Hera, Olympia, four, calendar, occurred, thousand, Roman, 1896, different, four, events

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

The Olympic Games

☞ **1** Use the words in the word bank column to complete the sentences below.

	Word bank
The first _____ Games were held in Ancient Greece. Men travelled from all over Greece to compete in these games. _____ were not allowed to compete. Running was originally the only event in the Ancient Greek Olympic Games. Later they added _____, boxing, javelin and discus, among others.	Women Olympic wrestling
The games were part of a festival that honoured the god _____ and the goddess _____. They were called the Olympic Games because they were held in _____. Olympia had a huge stadium at the time.	Olympia Zeus Hera
The Olympic Games were held once every _____ years. They became such a crucial part of the Ancient Greek _____ that people would mark special events by when they _____ in relation to the games.	occurred four calendar
During the month that the Olympic Games were held, a _____ was declared throughout Greece. That meant that any wars that were happening had to _____ while the games were on.	stop truce
The Olympic Games of Ancient Greece lasted for more than a _____ years. Then, in 393 CE, Theodosius – a _____ Emperor – banned the games. It wasn't until _____ that the Olympic Games started up again.	thousand Roman 1896
Today, the Olympic Games are held in _____ countries. They are still held every _____ years and athletes travel from all over the world to compete. Over time, many more _____ have been added to the Olympic Games.	events different four

2 In your workbook, write how important you think the legacy of the Olympic Games is. Name three benefits of the modern Olympic Games.

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Democracy

The Athenians of Ancient Greece created **democracy**, a system of government that gives everyone equal say. Aristotle, an Ancient Greek philosopher who lived in Athens, was a great believer in democracy. He said it was 'rule by the people'. However, not all people in Ancient Greece were allowed to be a part of the political process. Only free men could vote. Women, children, migrants and slaves could not.

The Athenians used a form of democracy known as **direct democracy**. This meant that voters were involved in every part of ruling a country. They discussed and voted on each issue separately, and anybody could raise an issue.

Democracy is still considered very important. In fact, most people believe that democracy is the only fair way to rule.

The most common form of democracy today is **representative democracy**. Representative democracy is where the people vote for their representatives. Those representatives form government and make decisions.

Democracy tries to include all people. It is based on fairness and equality. It demands that people be heard and treated well. Democracy also requires that people participate by voting and by being informed.

☞ **1** Do you think democracy is important? Explain why or why not?

_____

_____

_____

_____

_____

_____

2 Design a poster about the benefits of democracy. Your poster must include information (either in words or pictures) about the following:

- democracy from Ancient Greece
- what democracy provides (for example, a fair system of government)
- what democracy demands (for example, participation such as voting).

 978 1 92209 043 0 © Siboney Duff and Blake Education, 2011

Aesop's fables

Aesop was an Ancient Greek slave. He wrote **fables**, which are stories with a message or **moral**. More than 2000 years after he died, we still read these fables. Here is one of them.

The dog and the wolf

One day, a wolf met a dog. The wolf was starving and hadn't eaten for weeks. His body was thin and his ribs poked out. The dog, on the other hand, was rather plump.

The dog took pity on the wolf. 'My poor friend,' he said, 'Come home with me and my master will feed you well. He feeds me every day and look how healthy I am.'

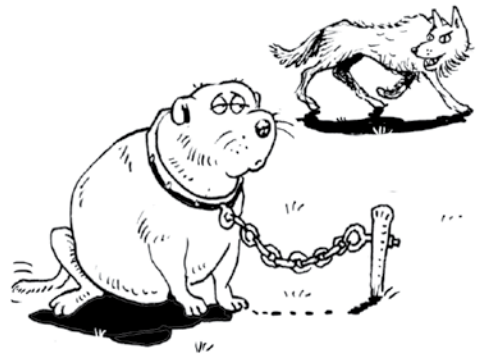
The wolf was very grateful. 'Thank you, dog,' he said.

The two began walking towards the dog's home. After a while, the wolf noticed a bare patch on the dog's neck. 'My friend,' asked the wolf, 'what happened to your neck? I notice that your fur is worn away there. Were you in a fight?'

'Oh no,' laughed the dog. 'My master chains up his dogs at night and the chain rubs the back of my neck.' Seeing the worried look on the wolf's face, the dog quickly added, 'Don't worry. It doesn't hurt and you'll get used to the chain quickly enough.'

The wolf stopped still, thanked the dog for his kindness, then turned and walked away. 'Where are you going?' called the dog.

'I would rather die a free wolf than live as a well-fed slave,' said the wolf.



☞ **1** What do you think is the moral of this fable? (What are we supposed to learn from it?)

_____

_____

_____

2 Write your own version of one of Aesop's fables. You can find more in the library or on the internet. You could also try making up a fable of your own – use animals, like Aesop did, and make sure it has a moral.

© Siboney Duff and Blake Education, 2011 978 1 92209 043 0

Achieve!

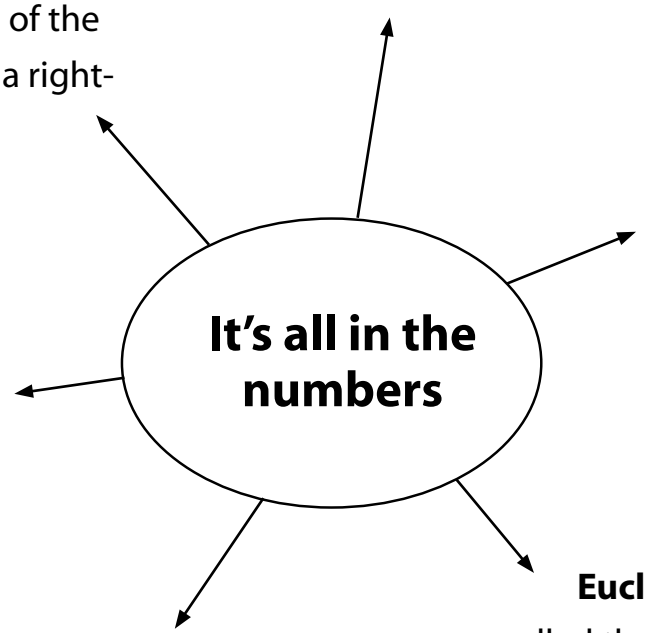
It's all in the numbers

Ancient Greece was home to some very smart mathematicians. It was also a time in Greek history when thinking and science were actively encouraged.

☞ **1** Add vowels (a, e, i, o, u) to complete these Greek mathematicians' names and the gifts they left us.

Archimedes worked out how to calculate the v_l_m_ of an item by putting it in w_t_r.

Pythagoras developed Pyth_g_r_s' theorem – a theorem that works out the length of the hyp_t_n_s_ (diagonal) of a right-angled triangle.



Pythagoras discovered how to convert musical notes into m_th_m_t_c_l equations.

Callippus used mathematics to study the pl_n_ts and the sun. He worked out the exact length of each s__s_n.

Euclid is sometimes called the father of g__metry. He studied sh_p_s and their properties.

Thales used geometry to work out the height of the pyr_m_ds. He also worked out how to use geometry to c_lc_la_t_ the distance to shore from a boat.

2 In your workbook, write one way mathematics helps us in our everyday life.

Your *Achieve! History* CD

User agreement

© Siboney Duff and Blake Education 2011

- You may install this CD onto a server for access by students at one school campus only.
- You may not otherwise copy, print, store or transmit any part of this CD-ROM unless you have written permission from Blake Education or a copyright exception applies under the Copyright Act, 1968.
  For inquiries and permissions please contact:
  Jennifer Gough
  Blake Education
  655 Parramatta Road, Leichhardt, NSW, 2040.
  Phone: 02 8585 4058
- The attached CD-ROM disc contains all the pages that are featured in the book, as well as a file of illustrations that can be used for other work sheets. Do not break this seal or remove the CD-ROM unless you have purchased this book.
- Unless the CD-ROM is faulty, this book cannot be returned from preview, or credit or refund provided, if the CD-ROM wallet seal is broken.
- No part of the Book or CD-ROM can be copied and distributed to, or used by, a non-purchasing school campus or institution. A campus is defined as a school that may be a part of a larger multi-campus institution.
- Purchasers do not have the right to resell, distribute, or pass off as their own, any still images, text, diagrams or software contained in the book or CD-ROM.
- All photocopies must bear the Blake Education copyright line.
- Purchasers may not remove or obscure the publisher copyright and trademark notices from the book or CD-ROM.
- The purchaser is entirely responsible for their computer hardware and system software and for ensuring that they are able to correctly operate the CD-ROM and its associated software.

Copying this disk isn't just illegal – it affects an independent, Australian-owned and operated business and the people who work for it. Both individuals and institutions are liable for large fines for breaking copyright laws.

Thank you for your cooperation!

Achieve! Instant Lessons

Quality ready-to-use resources

Each book in the Achieve! series has been designed and written for **secondary students who have low-level literacy skills** and require **modified** classroom activities to fully participate in the curriculum. Students will **experience success** as they work alongside their classmates on the same subjects with material that is tailored for their literacy needs.

Key features

- ✓ Mature-look page layout and illustrations
- ✓ Topics that will interest teenagers
- ✓ An emphasis on literacy skills
- ✓ Clear learning objectives
- ✓ Starter activities, background topic information and ideas for summarising a lesson

The worksheets in this series are ideal for group or individual study and are easy for classroom helpers to implement in one-on-one lessons. You can also use the photocopiable pages for revision, assessment and home study.

Achieve! History
The Ancient World – Greece 1

While very suitable for the regular classroom, each of the *Achieve!* series of History titles has been written at a literacy level that makes the pages appropriate for secondary school students who, because of poor reading skills, may struggle to comprehend regular classroom materials.

The Ancient World – Greece 1 enables students to develop their historical knowledge and understanding of ancient Greece through the study of the origins of Greece and the land's physical features, everyday life and society, politics and governance, the importance of religion, and the influence of war and Pericles. The content addresses key historical skills and concepts, including understanding sources and locating and categorising information.

The CD contains all the pages that are featured in the book, as well as a file of illustrations that can be used for other worksheets. These files can be easily edited to suit the needs of your students.

Topics include

- Land and sea
- Origins of Ancient Greece
- Politics and governance
- Everyday life
- Warfare
- Religion
- Art
- Architecture
- Pericles
- The legacies of Ancient Greece

Associated titles in the Achieve! Instant Lessons series

- *Achieve!* History series
  - The Ancient World – Rome 1
  - The Ancient World – Egypt 1
- *Achieve!* Personal Development series (4 books)
- *Achieve!* English series (11 books)
- *Achieve!* Geography series (4 books)
- *Achieve!* Design and Materials Technology series (10 books)
