LITERACY IN Geography

Ally Chumley

INSTANT LESSONS

9–10

Ally Chumley is a secondary teacher specialising in English, History and Geography. Her formal credentials include the degrees of Bachelor and Master of Education. Ally has written educational resources for teachers and learners across a range of subjects. She enjoys creating books that make difficult subjects accessible and inspiring to young people.

Ally loved going to school so much that she has never officially left. She boasts that her teaching career has made her Australia's foremost canteen food connoisseur. These days Ally lives on the mid-north coast of NSW with her husband and two boys. She has an enduring interest in reading, writing and educational research. She also wastes a lot of time watching rugby league, painting pictures and riding camels.

Introduction

The *Literacy in Geography* series is designed to help students understand essential geographical terms. The work sheets in *Literacy in Geography 7–8* revise and simplify core concepts, which can often present problems to otherwise enthusiastic geographers. *Literacy in Geography 9–10* presents more challenging concepts and activities. Using these resources, teachers can support students to become comfortable with the vocabulary of geography, build skills in using an atlas, employ a range of research tools, and work with data and statistics. The work sheets can be used as complete lessons, or can be effectively incorporated into a lesson plan. We hope students enjoy completing them and reap great rewards through the study of our fascinating world and its people.

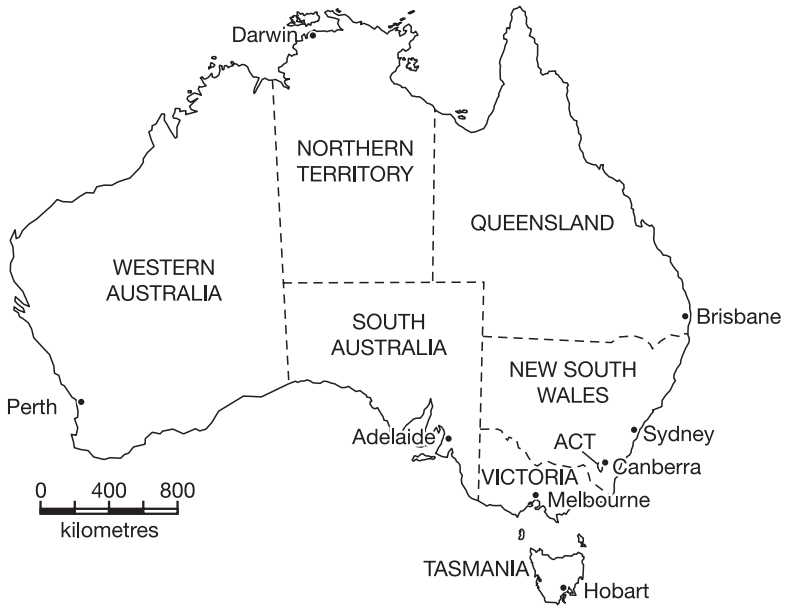
1 Australia's states and territories

States and capitals

1 Study the map to complete the following tasks.



Remember: The ACT is a separate territory, even though it is located within NSW.

a In the first column, list the states and territories from largest to smallest.

b In the second column, write the full names of the states and territories.

c In the third column, list the capital city of each state and territory.

Abbreviation	Full name	Capital city

Representing area using a bar graph

2 a In your notebook, draw a bar graph to present this information about the sizes of Australia's states and territories.

Land area of Australia's states and territories

SA	983 482 km^2	**WA**	2 529 875 km^2	**QLD**	1 730 648 km^2	**VIC**	227 416 km^2
NSW	800 642 km^2	**ACT**	2 358 km^2	**TAS**	68 401 km^2	**NT**	1 349 129 km^2

b Express the unit of measurement km^2 in words. _____

c Suggest THREE other types of information about the states and territories that could be presented in a bar graph.

_____ _____ _____

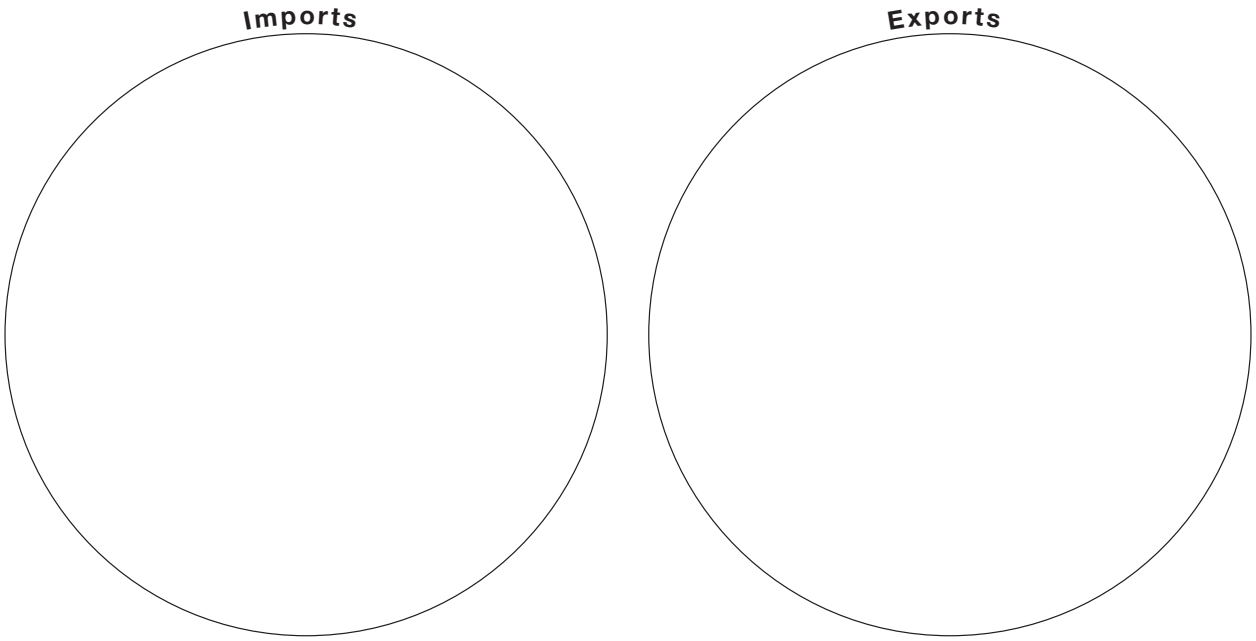
© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

2 Australia in a global context

Imports and exports

1 Identify the following commodities as Australian imports or exports by writing them in the circles.

Nike trainers	coal	Toyota cars	Hewlett-Packard computers
crude oil	instant coffee	beef	Levi jeans
wine	diamonds	Calvin Klein T-shirts	wheat



Australia's trading partners

2 Unscramble the names of some of Australia's primary trading partner countries.

a ZLENWAENDA **b** NTTTMRCDUSS of AAAIIEEE **c** PAAJN **d** WAAITN

_____ _____ _____ _____ of _____ _____ _____

Australia's military allies

3 List THREE countries with which Australia has been allied in the past against military threats.

_____ _____ _____

4 Draw a line through the countries to which Australia did NOT sent military troops between 2000 and 2009.

China	Iraq	Italy	Kuwait	East Timor	Solomon Islands
Philippines	Afghanistan	New Zealand	Japan	United States of America	

Assisting refugees

5 From which area of the world do most of Australia's refugees currently come? _____

6 Why do you think they choose to come to Australia rather than another country? _____

_____

Spelling global terms

7 Draw a line through any words in this list that are spelled incorrectly, then rewrite them correctly in your notebook.

gobalisation	sattelites	internet	England	embargo	comunications
migration	trade	foriegn aid	capital	grants	oportunities
economy	exploitation	trade barriers	tecnology	transportation	transnational corporations
sanctions	child laber	refugees	finansial	muticulturalism	enviromental impact

© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

3 The Asia Pacific region

Knowing our neighbours

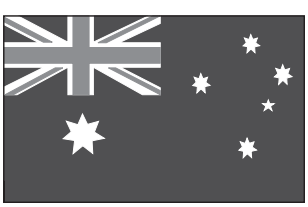
1 Select the correct answers from the box to fill in the table.

Jakarta	kina	English	Mt Cook	7.5 million	English	235 million	dollar
Javanese and Indonesian		Canberra	Puncak Jaya	Mt Kosciuszko		Port Moresby	Wellington

Country	Australia	New Zealand	Papua New Guinea	Indonesia
Capital				
Main languages			English, Tok Pisin and Motu	
Currency		dollar		rupiah
Population	22 million (2009)	4.5 million (2009)		
Highest mountain			Mt Wilhelm	

Flags of the region

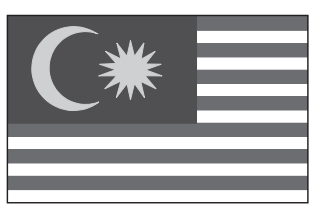
2 Fill in the missing letters to name the home country of each flag.



a _ _ _ _ _ _ _ _ _

b T _ _ _ _ _ _ d

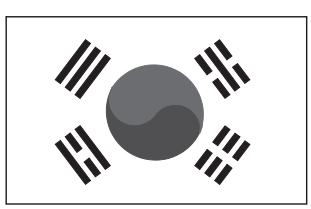
c _ n d _ _ _ _ _ a



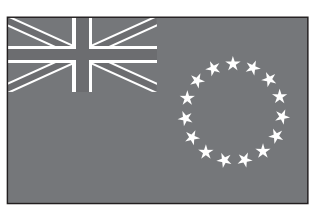
d M _ _ _ y _ _ _

e _ _ n g _ _ _ _ e

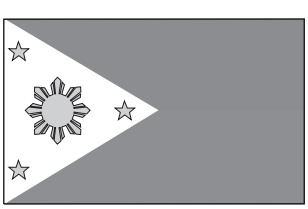
f P _ _ _ _ N _ _ _ _ _ _ _ _



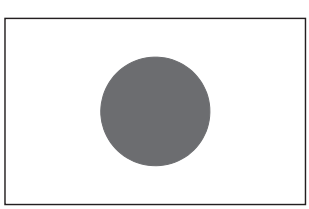
g S _ _ _ _ K _ _ _ _



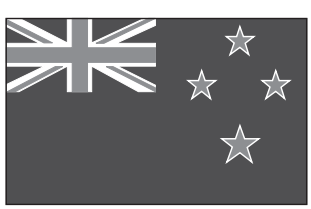
h C _ _ k _ s _ _ _ d _



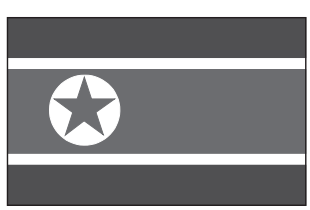
i P _ _ _ _ _ _ _ _ _ _



j _ _ p _ _



k _ _ _ Z _ _ _ _ _ _



l N _ _ _ _ K _ _ _ _

Island neighbours

3 Complete the names of these island countries of the Asia Pacific region.

a F _ _ _

b V _ _ _ _ _ _

c French P _ _ _ _ _ _ _ _

d T _ _ _ _

e S _ _ _ _ _ _ _ I _ _ _ _ _ _ _

© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

4 The Australian continent

Natural features of the Australian continent

1 List an example of each of the following environments found on or near the Australian continent. Complete the task by naming the state or territory in which each one is found.

Environment	Example	State or territory
a an alpine region		
b a desert		
c a tropical island		
d a rainforest area		
e a river valley		
f a farming area		

Where's the river?

2 Refer to an atlas to write the abbreviation of the state or territory in which each river is found.

a Swan _____ **b** Torrens _____ **c** Yarra _____ **d** Derwent _____

e Ord _____ **f** Parramatta _____ **g** Murrumbidgee _____ **h** Hawkesbury _____

i Brisbane _____ **j** Murchison _____

Try completing the activities from your own knowledge, then refer to the index of an atlas to check your answers.

In the Indigenous Wiradjuri language, the word Murrumbidgee *means 'big water'.*

Port or cape?

3 Complete these place names by writing either *Port* or *Cape* in the spaces provided.

_ _ _ _ Macquarie _ _ _ _ Augusta _ _ _ _ York South East _ _ _ _

_ _ _ _ Byron _ _ _ _ Leeuwin _ _ _ _ Douglas _ _ _ _ Hedland

Town or island?

4 Are these places towns or islands? Circle all the names of the islands.

Melville	Albany	Bendigo	Lord Howe	Fraser	Cairns	King
Kangaroo	Kalgoorlie	Launceston	Norfolk	Katherine	Flinders	Kingaroy

Ocean, sea or lake?

5 Complete these names by writing *Ocean*, *Sea* or *Lake* next to each body of water.

Coral _____ _____ Jindabyne Tasman _____ Pacific _____

_____ Macquarie Arafura _____ Timor _____ Indian _____

The Murray River forms the border between New South Wales and Victoria, then flows on into South Australia.

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Great Australians

6 Refer to an atlas to complete the names of these great Australian places.

a Great B _ _ _ _ _ _ R _ _ _ (QLD)

b Great S _ _ _ _ D _ _ _ _ _ (WA)

c Great A _ _ _ _ _ _ _ _ _ B _ _ _ _ (SA, WA)

d Great O _ _ _ _ R _ _ _ (VIC)

e Great W _ _ _ _ _ _ H _ _ _ _ _ _ (NSW)

f Great K _ _ _ _ _ I _ _ _ _ _ (QLD)

g Great D _ _ _ _ _ _ _ R _ _ _ _ (QLD, NSW, VIC)

Pinpointing a location

7 Use an atlas to find the latitude and longitude coordinates for each of these places. Express the coordinates correct to one decimal place (e.g. 38.5°N).

a Alice Springs _____ _____

b Broome _____ _____

c Mount Isa _____ _____

d Broken Hill _____ _____

e Lake Eyre _____ _____

f Rockhampton _____ _____

g Uluru _____ _____

h Byron Bay _____ _____

Which state?

8 Use a detailed map from an atlas or online research tool to identify the state or territory in which each of these Australian places is located. Write the place names in the boxes below.

Nhulunbuy	Cloncurry	Halls Creek	Coober Pedy	Devonport	Oodnadatta	Port Pirie
Cobar	Ballarat	Weipa	Sale	Finke	Marble Bar	Burnie
Hermannsburg	Dalby	Shepparton	Inverell	Queenstown	Bourke	Roma
Kununurra	Birdsville	Launceston	Moe	Bathurst Island	Maralinga	Exmouth
Dampier	Ceduna	Tennant Creek	Huonville	Narooma	Lithgow	Wodonga

5 Australian environments

Australia's climate

1 a Separate the word chains below into 22 words that describe weather. Write them in your notebook.

humiddrysunnywetrainystormywindybreezywindlessfrostyfoggy

hotwarmbalmytemperatemildcoolchillycoldfreezingsnowyicy

b Use some of the 22 words to describe the characteristics of each season in your region. Write them in the table. You may need to use some words more than once.

Summer	Autumn	Winter	Spring

Australia's extremes

2 Sort these terms into the most appropriate regions by listing them in the table.

snowline	plains	tides	high altitude	arid	major cities
spinifex	icicles	parched	palms	farmlands	monsoon
growers	dust storms	crops	cyclone	beach	sub-zero
humidity	red centre	cold	snowfalls	regular rainfall	low rainfall

Desert	Alpine	Tropical	Temperate

Mountain scramble

3 The names of some Australian mountains are hidden in these letter sequences. To solve them, make two words out of the letters, reading from left to right. The letters are in the correct order, as you can see in the example.

MBOOUGONNGT = Mount Bogong (Vic)

a KOMSCOIUSZUKNTO _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _

6 Indigenous Australians

Ancient Australia

1 Read the passage and answer the questions that follow.

Australia was once part of the area of the Earth known as *Gondwanaland*. Geologists believe that the crustal plates underlying Australia, India, South America, New Zealand and Antarctica were originally part of a single land mass. The geological changes that occurred as each continent separated may account in part for the Australian continent's relief and landforms.

a Which word is the name for an ancient super-continent? _____

b Which word from the passage means 'the shape of the land'? _____

c Which word means 'land mass'? _____

d Which word means 'structures made of rock and other material from the Earth's crust'? _____

Indigenous Australians and the biophysical environment

2 Choose the correct words from the box to complete the passage.

the Dreaming	spirit ancestors	relationship	descendants	Torres Strait
religious practices	migrated	Europeans	culture	languages
tribes	behaviour	generations	sacred	burial sites

Australia's Aboriginal and Torres Strait Islander people enjoy a special _____ with the land and natural resources of the continent. Before the arrival of _____ in the 1700s, there were hundreds of _____ of Indigenous people living in different areas of the country. It is believed that these people _____ from Asia, moving southwards to Australia in gradual stages.

Environmental management practices

3 Match these ancient Aboriginal practices with the reasons for performing them by writing the correct numbers in the spaces.

1	moving from one area to another	_____	to find new waterholes
2	constructing traps	_____	to ensure the wide dispersal of useful plant species
3	collecting and saving water	_____	to limit bushfire hazards and promote germination
4	tracking grazing animals	_____	to avoid resource depletion
5	carrying seeds from one place to another	_____	to ensure the survival of certain animal species
6	introducing young animals to old hunting grounds	_____	to preserve resources when they are abundant
7	igniting controlled grassfires	_____	to catch fish to eat

Writing about the past

4 Use the words and phrases in each set to write sentences about the Indigenous people's activities in Australia.

a self-sufficient nomadic

_____

b collective ownership resources sharing

_____

c sacred sites buried areas

_____

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

7 The Antarctic region

Where is the Antarctic?

1 Circle the correct answer from the options presented.

a Where is the Antarctic located? the North Pole the South Pole

b Of these land masses, which three lie closest to the Antarctic?

India South America North America Australia Indonesia New Zealand Russia

c At what time of year is the Antarctic cold and frozen? in winter only in summer only all year round

Temperatures in Antarctica

2 Temperatures in Antarctica can fall to eighty-nine degrees Celsius below zero. The average yearly temperature is minus fifty degrees Celsius. Express these two temperatures in numbers and symbols.

_____ _____

Too cold for us

3 Only two species of flowering plants are known to flourish in the Antarctic, but a number of birds, animals and fish live in this icy region. Draw a line through two species that could not survive there.

penguin seal koala pelican fish

4 Explain how whales manage winters in the Antarctic. _____

_____

Creatures of the Antarctic

5 Read the information below and write definitions for the terms in **bold**, using your existing knowledge and the context to infer meaning.

Colossal squid have an average length of 12–14 metres, making them the world's biggest **invertebrates**. They have the largest eyes of any species in the animal kingdom. They hunt prey using bioluminescence – **emitting** light to dazzle and confuse the intended victim. Two of their common targets are the Patagonian toothfish and the Antarctic toothfish.

Patagonian toothfish are **predatory** fish, closely related to Antarctic toothfish. They are found in the cold waters of many oceans, including the Southern Ocean of the Antarctic region. Their average weight is 9 to 10 kilograms and some are as long as 2.3 metres. They have extraordinary **longevity**; some toothfish have been known to live for up to 50 years. They feed on squid, smaller fish and prawns.

Sperm whales prey on various types of squid. Adult sperm whale **bulls** grow to around 15 metres long. Many sperm whales have scars on their backs, apparently caused by the barbed **tentacles** of the colossal squid.

Albatrosses are large seabirds that live in the Southern Ocean region. The Great Albatross has the largest **wingspan** of any bird species alive today, and can fly vast distances. Albatrosses are **colonial** birds who choose a mate for life, and nest in communities. They feed on squid, including the colossal squid, and fish and krill. Nineteen of the twenty-one species of albatross are currently considered to be endangered.

invertebrates _____

emitting _____

predatory _____

longevity _____

bulls _____

tentacles _____

wingspan _____

colonial _____

Australia's activities in Antarctica

6 Complete the statements below by inserting the correct words.

Antarctic	Mawson	Douglas	Australian	Territory

a Australia controls part of the Antarctic. This area is known as the _____ _____ _____.

b A famous Australian explorer of the Antarctic was _____ _____.

Life forms in the Antarctic

7 Write these species in the correct order from most to least abundant, according to the figures provided.

bacteria = 800 million tonnes	seals = 10 million tonnes	squid = 40 million tonnes
fish = 100 million tonnes	protozoa = 1,500 million tonnes	penguins = 0.8 million tonnes
krill = 110 million tonnes	whales = 5 million tonnes	phytoplankton = 6,000 million tonnes

a _____ **b** _____ **c** _____

d _____ **e** _____ **f** _____

g _____ **h** _____ **i** _____

8 Look at the information above. Are fish or krill more numerous in the Antarctic? Explain your answer.

_____

Antarctic food web

9 Draw a food web that incorporates the species in the box.

phytoplankton	krill	penguins	
squid	fish	seals	whales

HINT: In food chains and webs, each linking arrow points towards the organism eaten by its predator.

Food web:

Word challenge

10 How many four-letter words can you make from this word? You may use each letter only once per word.

E X P E D I T I O N

_____ _____ _____ _____ _____

_____ _____ _____ _____ _____

_____ _____ _____ _____ _____

_____ _____ _____ _____ _____

Can you make any five-letter words?

_____ _____ _____ _____ _____

Can you make any six-letter words? _____ _____ _____

Can you make a seven-letter word? _____

© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

8 Latitude and longitude

Writing about latitude and longitude

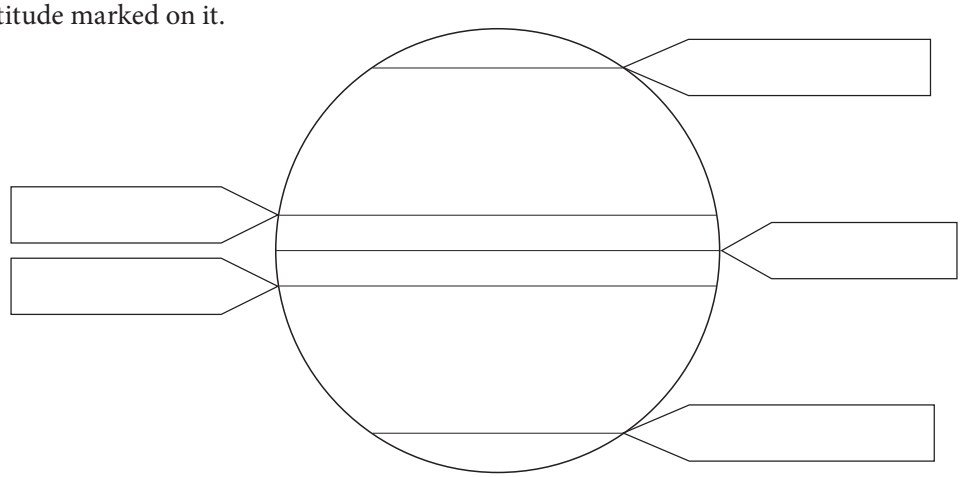
1 Rewrite the points below to form two paragraphs. Use proper sentences and pay attention to spelling and punctuation, including capital letters.

- lines of lat. run from east to west and are parallel
- equator is the longest line of lat.
- areas north of the equator = nthern hmphere, sth of the equator = sthern hmphere
- lines of long. run from nth to sth, curving around the earth from the poles
- tropic of cancer receives the most direct rays of the sun on jun 21st in the southern hemisphere
- the tropic of capricorn receives them on dec 21st – these dates are called the solstices
- in the south. hem. the equ. receives the suns most direct rays on mar 22 and sep 23 (called the equinoxes)

Special lines of latitude

2 Lines of latitude are given their number from the angle they create with the Equator. Label the diagram with the correct names for the lines of latitude marked on it.

Arctic Circle	66.5°N
Antarctic Circle	66.5°S
Equator	0°E
Tropic of Cancer	23.5°N
Tropic of Capricorn	23.5°S



Word fragments

3 Make eight complete words about latitude and longitude from these word fragments.

gate	nor	rees	loc	tro	pos	navi	ians
pic	merid	ation	llel	deg	ition	para	thern

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Using coordinates

4 Use a world atlas or an online mapping tool to find these places around the world by using the latitude and longitude coordinates provided. The place names are listed alphabetically. Use the names of the countries in which the places are located as clues to help you.

NOTE: *The coordinates are expressed correct to one decimal place (e.g. 26.5°W).*

COUNTRY	CITY	COORDINATES	
Greece	A _ _ _ _ _	37.5°N	23.5°E
Spain	B _ _ _ _ _ _ _ _	41°N	2°E
Egypt	C _ _ _ _	30°N	31°E
USA	D _ _ _ _ _	32.5°N	96.5°W
Australia	E _ _ _ _ _ _ _ _	33.5°S	121.5°E
Sierra Leone	F _ _ _ _ _ _ _	8°N	13°W
USA	G _ _ _ _ _ _ _ _ _	39.5°N	77°W
Cuba	H _ _ _ _ _	23°N	82°W
Pakistan	I _ _ _ _ _ _ _ _	33.5°N	73°E
South Africa	J _ _ _ _ _ _ _ _ _ _ _	26°S	28°E
Ukraine	K _ _ _	50°N	30°E
England	L _ _ _ _ _	51°N	0°W
Uruguay	M _ _ _ _ _ _ _ _ _	34.5°S	56°W
Fiji	N _ _ _	17.5°S	177°E
Norway	O _ _ _	59.5°N	10.5°E
France	P _ _ _ _	48.5°N	2°E
Ecuador	Q _ _ _ _	0°S	78.5°W
Papua New Guinea	R _ _ _ _ _	4°S	152°E
Sabah	S _ _ _ _ _ _ _	5.5°N	118°E
Canada	T _ _ _ _ _ _	43.5°N	79°W
Tanzania	U _ _ _ _	5°S	32°E
Austria	V _ _ _ _ _	48°N	16°E
New Zealand	W _ _ _ _ _ _ _ _ _	41°S	174.5°E
China	X _ _ _	34°N	108.5°E
Japan	Y _ _ _ _ _ _ _	35°N	139°E
Switzerland	Z _ _ _ _ _	47°N	8°E

All places on the same meridian line experience midday at the same time. The abbreviations a.m. and p.m., used to mark time, mean before midday and after midday.

Why zero?

5 Write the answers to these questions in your notebook.

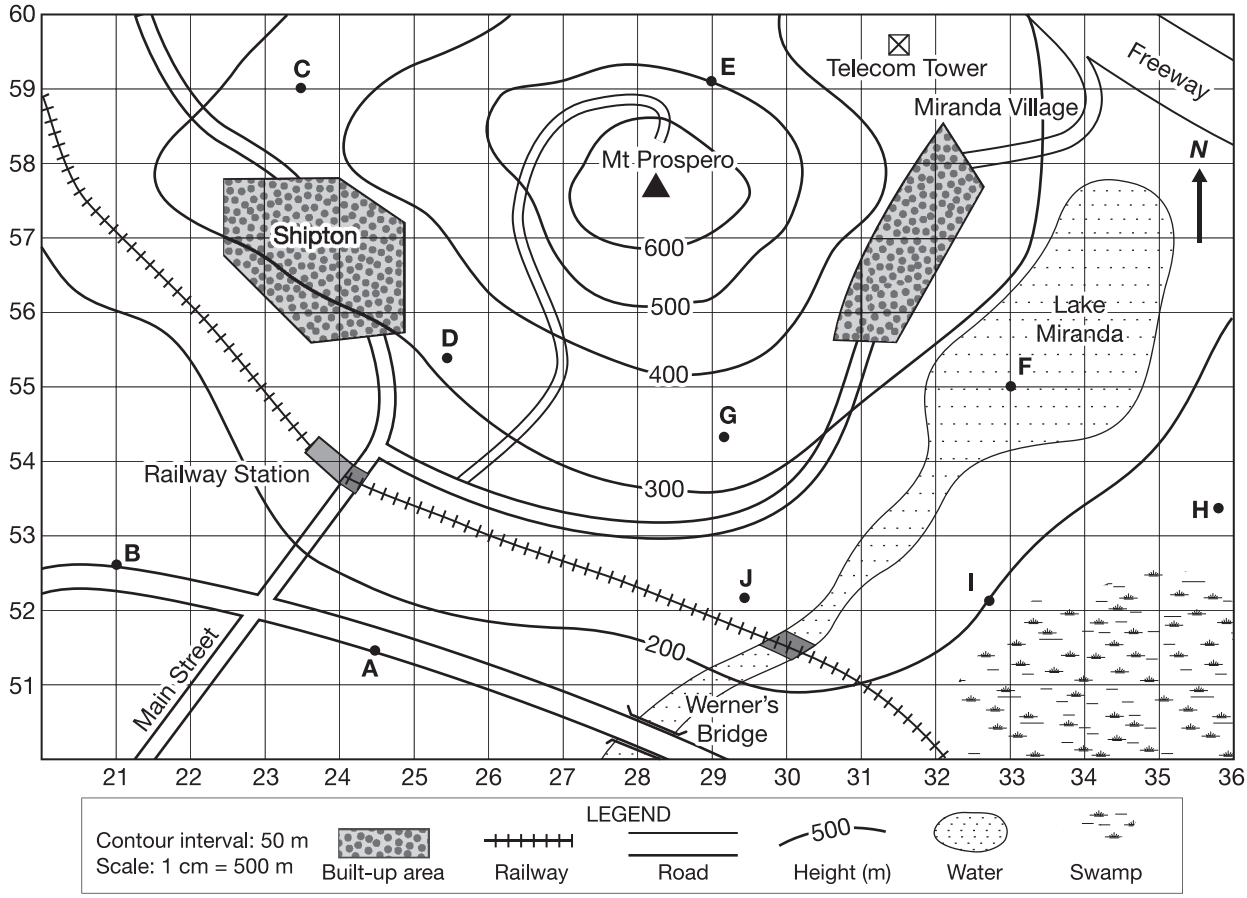
a Why does the city in Ecuador have a latitude of zero degrees south?

b Why does the location in England have a longitude of zero degrees east?

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

9 Topographic maps

Topographic maps provide area references and grid references. An *area reference* is a four-digit number listing the *eastings* and *northings*, which tell us the **square** in which to find a feature. A *grid reference* is a six-digit number that gives us the **exact point** of a feature in the grid. In grid references, the third and sixth numbers tell us the **tenths** between the whole numbers marked on the grid, to enable us to locate a precise point.



Using area references

1 What is the area reference for each of these points on the map? The first one has been done for you.

A is in AR 2451 B is in AR _ _ _ _ C is in AR _ _ _ _ D is in AR _ _ _ _ E is in AR _ _ _ _

F is in AR _ _ _ _ G is in AR _ _ _ _ H is in AR _ _ _ _ I is in AR _ _ _ _ J is in AR _ _ _ _

Using grid references

2 What are the grid references for each of the points from the previous task?

A = GR 245515 B = GR _ _ _ _ _ _ C = GR _ _ _ _ _ _ D = GR _ _ _ _ _ _ E = GR _ _ _ _ _ _

F = GR _ _ _ _ _ _ G = GR _ _ _ _ _ _ H = GR _ _ _ _ _ _ I = GR _ _ _ _ _ _ J = GR _ _ _ _ _ _

Finding grid references

3 Give the grid references for the following features.

a Telecom Tower GR _ _ _ _ _ _ **b** Mt Prospero GR _ _ _ _ _ _

Estimating distance

4 How far from Telecom Tower is:

a the railway station? _____ **b** the start of the freeway? _____

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Activities 5, 6 and 7 are based on the map on page 16.

Features on a map

5 Add these features to the map, using the references provided. Consider the dimensions of the features when you sketch them in.

a Miller's Dam = AR2559 (500 metres in diameter) **b** the reservoir = GR345535 (50 metres in diameter)

6 **a** Which natural feature of the map lies in the flattest part of the region? _____

b How do you know? _____

_____

Determining direction

7 Look at the map and answer these questions.

a Which road is the most northerly one? _____

b In which direction from the top of Mt Prospero is Werner's Bridge? _____

c In which direction from the top of Mt Prospero is the swamp? _____

d In which direction from the top of Mt Prospero is Shipton? _____

e In which direction from the railway station is Miranda Village? _____

Classifying mapping terms

8 Classify these mapping terms by writing them in the correct columns in the table below.

lake highway degrees of latitude area reference river east minutes of latitude swamp vegetation kilometres tower contour line road mountain metres above sea level village railway line building valley elevation bridge gully grid reference direction

Descriptions of locations	Natural features	Built features

Alphabetical order

Most geographical references follow alphabetical order: latitude before longitude; eastings before northings.

Spelling trios

9 Draw a line through the incorrectly spelled words in each trio.

a	height	hight	hite	**b**	gradiant	gradeint	gradient
c	inclign	incline	inclian	**d**	aproximate	approximate	approxximate
e	nothings	nauthings	northings	**f**	feature	feeture	feiture
g	referense	refrence	reference	**h**	countour	contour	contuor
i	interval	interrval	interrvel

10 Graphs, charts and tables

Features of graphs, charts and tables

1 Classify each of these features by writing the correct abbreviations in the spaces provided.

pie chart (PC)	bar graph (BG)	column graph (CG)	table (T)	line graph (LG)	scatter graph (SG)

a a circle _____ **b** vertical columns _____ **c** a series of dots joined together by a line _____

d horizontal bars _____ **e** a group of dots and a 'line of best fit' _____

f presentation of statistics using columns of words and numbers to enable comparisons to be made _____

2 Which types of graphs have each of these features?

a gridlines _____ _____ _____ _____

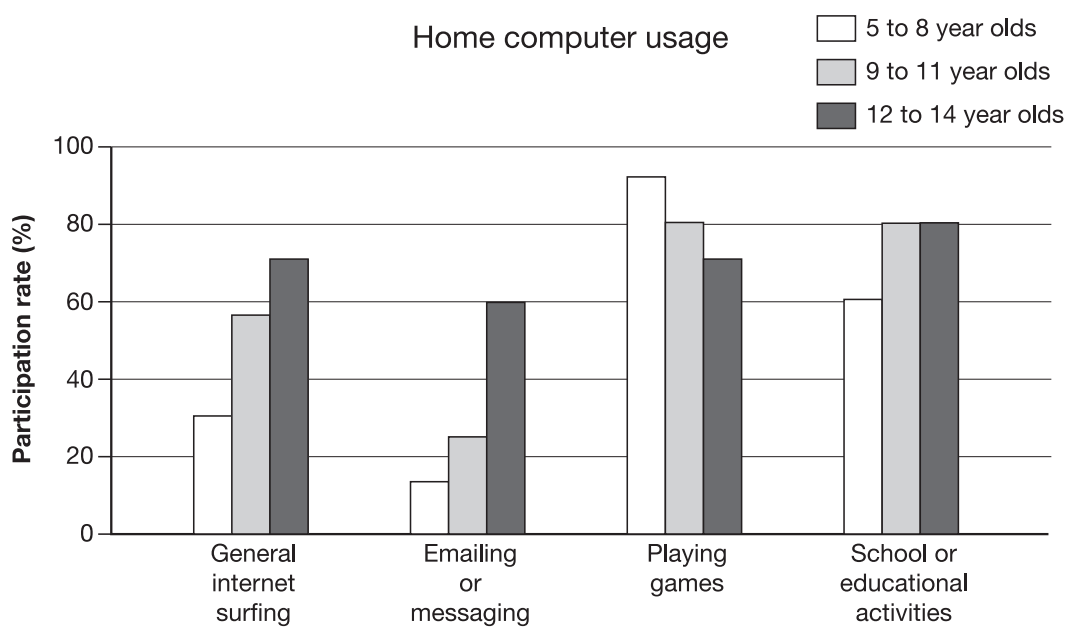
b radii _____

c an X- and a Y-axis _____ _____ _____ _____

d dots _____ _____

Reading a graph

3 The graph below presents information about how different groups of people use their home computers. Refer to the graph to answer the questions.



a What type of graph is this? _____

b Which activity is the most popular among five- to eight-year-olds? _____

c What percentage of twelve- to fourteen-year-olds surveyed use email or messaging? _____

d What is the least popular activity among the nine- to eleven-year-olds surveyed? _____

e What percentage of twelve- to fourteen-year-olds uses the internet for school or educational activities? _____

f Which age group shows the least variation between the activities? _____

Drawing a bar graph

4 Collect data from your classmates about the types of pets they own. Each person may own more than one pet. In your notebook, create a table summarising the main categories and figures for each type of pet. Then, draw a bar graph to present the information, labelling it appropriately.

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Scatter graphs

5 a Describe the features of a scatter graph._____

_____

b Use the information in the table below to draw a scatter graph in your notebook.

Number of kangaroos killed on a Queensland highway in 2009											
J	F	M	A	M	J	J	A	S	O	N	D
246	234	180	99	97	64	45	47	75	110	176	187

REMEMBER: *A scatter graph enables you to investigate whether a relationship exists between two factors – in this case, the number of animals killed and the month of the year. It has a horizontal (x) and a vertical (y) axis.*

How to draw a pie chart

This pie chart shows the top 10 gold medal winning nations in the 2008 Beijing Olympic Games. The data for each country is as follows: China (51), USA (36), Russia (23), Great Britain (19), Germany (16), Australia (14), South Korea (13), Japan (9), Italy (8), and France (7). This pie chart was created using the following steps.

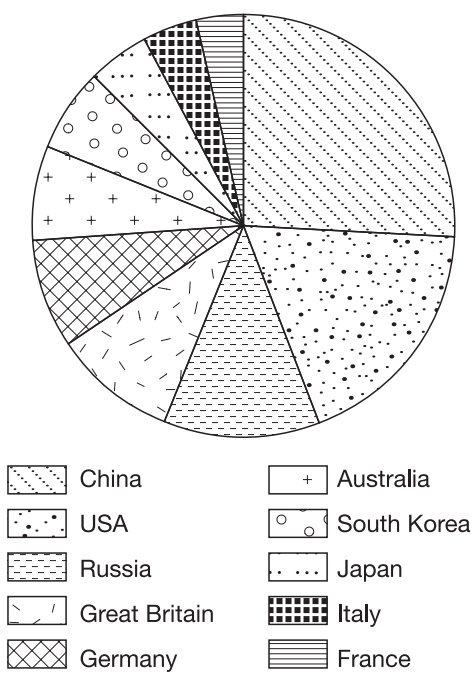
1 Add the numbers to obtain a grand total of medals = 196.

2 The whole circle is 360 degrees. Divide this by the grand total to find out how many medals are represented by one degree of angle: 306 ÷ 196 = 1.836734694.

3 Multiply each country's medal tally by the factor 1.836734694 to obtain each angle, and round off to one decimal place: China = 93.7°, USA = 66.1°, Russia = 42.2°, Great Britain = 34.9°, Germany = 29.4°, Australia = 25.7°, South Korea = 23.9°, Japan = 16.5°, Italy = 14.7°, France = 12.9°.

4 To measure the angles in the circle, place a protractor along the 90° vertical radius, and measure the first angle. Repeat for each angle, each time measuring from the line last added.

5 Use a shading or colouring key to identify the segment that represents each nation.



Draw a pie chart in your notebook

6 Use the figures about kangaroo deaths above to draw and colour a pie chart in your notebook. The chart should show the percentage of kangaroos killed in each of the four seasons. It will therefore have four sections: winter, spring, summer, autumn. First, find the total number of deaths in the year by adding all the months' totals. The complete circle has 360 degrees. So, divide the grand total by 360 to find how many deaths are represented by one degree of angle. Then, calculate each season's total, and the corresponding angle, according to the method outlined above, and measure the angles with a protractor. Check your calculations by adding the four angles, which should total 360 degrees. Don't forget to add a colour or shading key so that the chart can be interpreted.

Unscramble geographical terms

7 Unscramble these two-word terms. Each one names another way of representing geographical information. Use the definitions to help you.

a opticchartsyn — A map that shows a region's weather conditions _____ _____

b ographicmaptop — A drawing that illustrates an area's landforms and layout _____ _____

c inglinedraw — A simplified representation of a photograph _____ _____

11 Research and data collection

Conducting research

1 Indicate your understanding of, experience with and proficiency level at each of these research-related activities by ticking the appropriate columns in the table.

RESEARCH ACTIVITIES	I KNOW HOW TO DO THIS			I HAVE DONE THIS		MY ABILITY LEVEL AT THIS				
	Yes	Unsure	No	Yes	No	Poor	Average	Good	Excellent	Unknown
Target a specific audience										
Collect information										
Test a group of subjects										
Interpret data										
Evaluate information										
Create a PowerPoint display										
Do desktop publishing										
Conduct online research										
Present information orally										
Conduct a written survey										
Send or receive email										
Record data using a tally										
Consider ethical implications										
Use printed information sources										
Manipulate digital images										
Do word processing										
Conduct an interview										
Transfer a file electronically										
Back-up some computer files										
Design a webpage										
Edit written work										
Create a list of references										
Collect data										
Develop an idea for a project

Improving your skills

2 Look at the table (activity 1 on page 20). List up to six research activities from the table that you haven't experienced yet. Suggest school subjects other than Geography in which you might undertake each activity.

Research activities I have not undertaken yet	Subjects in which the activity could be used

Developing a Research Action Plan

3 Write the actions listed in the box in the correct order to complete the steps for creating a Research Action Plan.

- Process and analyse the data.
- Select some presentation methods to communicate the findings.
- Propose action that could be taken in response to the findings.
- Collect the primary data.
- Choose a data collection technique to be used.

Step 1 Identify the purpose of the study.

Step 2 Generate a focus question to be investigated.

Step 3 Decide what primary data is needed.

Step 4 _____

Step 5 _____

Step 6 _____

Step 7 _____

Step 8 _____

My Research Action Plan

4 Use the steps above to develop your own Research Action Plan about a topic of your choice.

Topic: _____

Purpose: _____

Data needed: _____

_____

Means of data collecton: _____

_____

Description of the analysis: _____

_____

Written presentation method: _____

Audio-visual presentation method: _____

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

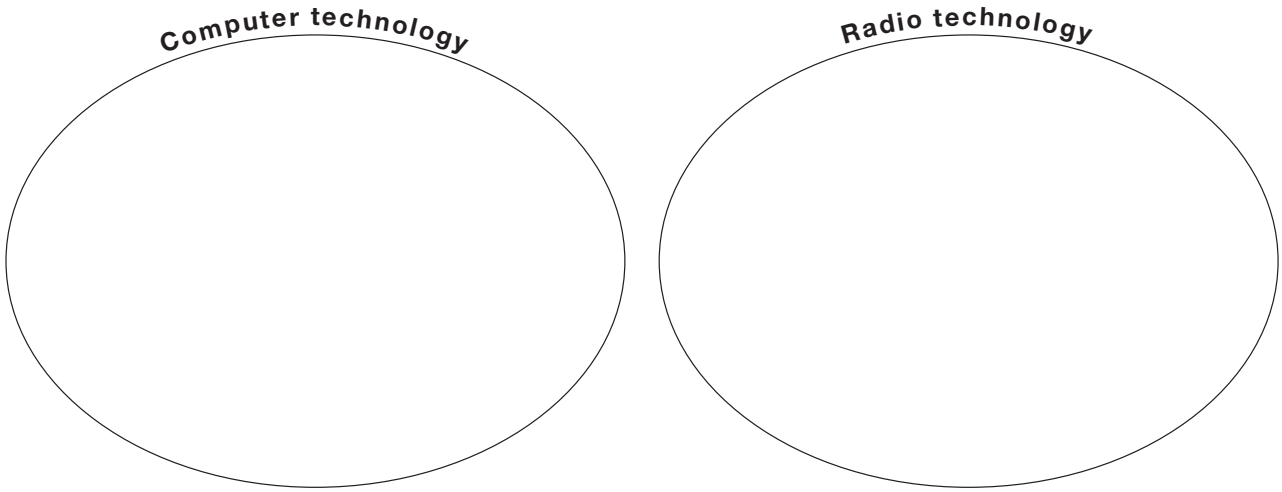
12 Acronyms in geography

An *acronym* is an abbreviation formed from the first letter or letters of words. Strictly speaking, an acronym forms an abbreviation that can be pronounced as a word (e.g. UNICEF). Abbreviations pronounced as a series of single letters (e.g. HTML) are called *initialisms*.

Acronyms and initialisms about technology

1 Organise the following terms into their correct categories by writing the acronyms and initialisms in the circles.

AM Amplitude Modulation
HTML Hyper Text Mark-up Language
FM Frequency Modulation
URL Uniform Resource Locator
USB Universal Serial Bus
HTTP Hyper Text Transfer Protocol
WWW World Wide Web
RFID Radio Frequency Identification Device



Global organisations

2 Complete the table of global organisations, acronyms or initialisms, and their main fields of activity.

ACRONYM/ INITIALISM	FULL NAME OF ORGANISATION	FIELD OF ACTIVITY
	Asia Pacific Economic Cooperation	Trade in the Asia Pacific region
	International Monetary Fund	Emergency loans to governments
IOC		The Olympic Games
	North Atlantic Treaty Organisation	Trade and defence
OPEC	Organisation of Petroleum Exporting Countries	
UN		Multiple, mainly humanitarian
	World Health Organisation	
WWF		Protecting animals and plants
WFC	World Food Council	
UNICEF	United Nations International Children's Emergency Fund	
	United Nations Educational, Scientific and Cultural Organisation	Education, science and culture
INTERPOL	International Criminal Police Organisation	

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Common acronyms and initialisms

3 Write the meanings of these acronyms and initialisms in the spaces provided. The first one has been done for you.

Acronym/ initialism	Meaning	Category	Clue
EMP	Electromagnetic Pulse	Military technology	This disables all electronics
CD	_____	Computer technology	Data storage device
AI	_____	Computer technology	Robots have this
LCD	_____	Computer technology	A type of screen
POW	_____	Warfare	A detainee
GNP	_____	Economics	Total profit of a nation
ID	_____	General	Proof of who you are
SOS	_____	International communications	A call for help
SPF	_____	Sun safety	Degree of protectiveness
GPS	_____	Satellite technology	International tracking system
HAZMAT	_____	Chemical safety	Toxic substance

Other initialisms geographers use

4 These two columns present sets of initialisms that are related to one another. They may be synonyms, opposites or share some other kind of connection. Match up the pairs by drawing connecting lines between them.

COLUMN A	COLUMN B
EST: Eastern Standard Time	Non-GM: Not Genetically Modified
GDP: Gross Domestic Product	PM: Post Meridiem
GM: Genetically Modified	GMT: Greenwich Mean Time
AM: Ante Meridiem	GNP: Gross National Product

Acronyms in disguise

5 Some acronyms have been in use for so long that many people have forgotten they are acronyms and not real words. Work out these acronyms from their definitions and write the letters in the spaces.

a Light Amplification by Stimulated Emission of Radiation _ _ _ _ _

b Modulator Demodulator _ _ _ _ _

c Radio Detecting and Ranging _ _ _ _ _

d National Aeronautics and Space Administration _ _ _ _

e Acquired Immune Deficiency Syndrome _ _ _ _

f Sound Navigation and Ranging _ _ _ _ _

g Self-Contained Underwater Breathing Apparatus _ _ _ _ _

h Australian and New Zealand Army Corps _ _ _ _ _

i Personal Identification Number _ _ _

j Electronic Funds Transfer at Point of Sale _ _ _ _ _ _

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

13 Completing geography tasks

Directive terms

1 Complete the table by transforming these activities (verbs) into products of a completed task (nouns).
Two have been done for you.

A **verb** *is an action word. It denotes an action or state.*

A **noun** *is a naming word.*
Nouns are used to name people, places, things or qualities.

Directive	Product
account for	an account
analyse	an analysis
argue	
assess	
calculate	
compare	
define	
demonstrate	
describe	
discuss	
examine	
explain	
interpret	
propose	
suggest	
simplify	
summarise	

Defining directives

2 Choose the term from the box that matches each definition.

sketch	outline	justify	tabulate	investigate	predict	evaluate

a _____ Give reasons to support a particular opinion, argument or conclusion.

b _____ Make a simple line drawing.

c _____ Look into something and draw conclusions.

d _____ Identify the main features of something and present them in a brief format.

e _____ Suggest what may happen in the future, based on the facts currently available.

f _____ Make a judgement based on specific criteria.

g _____ Create a table to present statistical information.

Fact or opinion?

3 Look at each of these activities and indicate whether each is likely to yield factual information or a personal opinion. Circle your choice.

a making calculations FACT OPINION

b comparing two things FACT OPINION

c a dictionary definition of a word FACT OPINION

d a description given from someone's memory FACT OPINION

e a discussion between two people FACT OPINION

f a prediction FACT OPINION

g an outline FACT OPINION

© Ally Chumley and Blake Education, 2009

14 Using meteorological terms

Talking about the weather

1 Fill in the spaces below with the missing nouns, plurals and adjectives.

Noun	Plural	Adjective
climate	_____	climatic
_____	revolutions	revolving
forecast	_____	forecast
_____	precipitation	precipitative
gas	_____	gaseous
oxygen	oxygen	_____
ice	ice	_____
measurement	_____	measurable or measured
atmosphere	atmospheres	_____
meteorologist	_____	meteorological
tide	tides	_____
_____	seasons	seasonal
barometer	barometers	_____

*A **noun** is a naming word. Nouns are used to name people, places, things or qualities.*

*A **plural** is a noun that refers to more than one person, place, thing or quality.*

*A **verb** is an action word. It denotes an action or state.*

*An **adjective** is a word that describes (or modifies) a noun.*

More weather words

2 Fill in the spaces below with the missing nouns, plurals, verbs and adjectives.

Noun	Plural	Verb	Adjective
_____	maximums	to maximise	maximum
minimum	minimums	to _____	minimum
pole	poles	to polarise	_____
_____	energies	to energise	energetic or energised
rotation	_____	to rotate	rotating or rotated
humidity	humidity	to humidify	_____
condensation	condensation	to _____	condensed
vapour	_____	to vaporise	vaporised
_____	pollution	to pollute	polluted
pressure	pressures	to pressurise	_____
coolness	coolness	to _____	cool

Atmospheric (or air) pressure is expressed in units called 'hectoPascals', spelt with a small 'h' and a capital 'P'.

Translating the weather report

3 Here are some common terms that weather reporters use. Translate them into plain English.

a the overnight minimum _____

b synoptic chart _____

c gale force winds _____

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

15 Climate statistics

Describing and comparing temperature

1 Write out in full these abbreviated terms for describing temperature.

a min. temp. _____

b max. temp. _____

c av. monthly temp. _____

Calculating temperature statistics

2 Match the explanations in the box with the temperature statistics below.

- the total of all the monthly temperatures divided by 12
- subtracting the lowest temperature from the highest temperature recorded in a particular day
- finding the highest and lowest temperatures over a three-month period

a The day's temperature range: _____

b The seasonal range of temperature: _____

c The average monthly temperature: _____

Describing and comparing rainfall

3 Explain how each of these figures is measured and calculated.

a Daily rainfall figures: _____

b Average monthly rainfall: _____

Using formulae to calculate climate statistics

4 Express the procedure for calculating the day's temperature range as a mathematical formula, using the key.

H = highest temperature L = lowest temperature R = temperature range

_____

5 Circle the correct answers to these problems.

a To calculate the average temperature for a region in which six towns provide temperature:

add the 6 figures and divide by 6. divide each figure by 6.

multiply each figure by 6. report each one separately.

b To calculate the average monthly rainfall for a given area, the average annual rainfall figure needs to be:

multiplied by 12. divided by 12. subtracted from 12.

Measuring weather phenomena

6 In each set, circle the phenomenon that the unit can be used to measure.

a **mm:** amount of rainfall level of humidity amount of pollution in the air amount of fog wind speed

b **cm:** amount of wind amount of snowfall amount of fog earthquake magnitude wind speed

c **knots:** amount of wind amount of rainfall level of humidity amount of fog wind speed

d **hectoPascals:** amount of pollution in the air amount of snowfall tidal wave strength wave height level of humidity

e **km:** distance between two towns tide height time of sunrise rainfall wind speed

f **kilometres per hour:** distance between two towns tide height time of sunrise rainfall speed

g **degrees Celsius:** amount of wind temperature rainfall level of humidity amount of fog wind speed

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Presenting temperature and rainfall statistics

7 Climate statistics are often presented in the form of a table. The one below shows average temperature and rainfall statistics for the town of Katherine in Australia's Northern Territory.

Katherine	J	F	M	A	M	J	J	A	S	O	N	D
Temperature (°C)	33	36	32	30	29	26	25	26	28	29	30	31
Rainfall (mm)	408	420	370	97	24	0	1	1	19	78	143	282

a In which four months of the year does most of the rain fall in Katherine?

_____ _____ _____ _____

b Which two months show the greatest range between temperatures? _____ _____

c What is the relationship between temperature and rainfall in Katherine? _____

_____

Making comparisons

8 Study the table below containing London's average temperature and rainfall figures.

London	J	F	M	A	M	J	J	A	S	O	N	D
Temperature (°C)	3	4	7	9	14	17	17	21	19	13	8	5
Rainfall (mm)	61	36	50	42	45	45	44	46	43	73	45	59

Compare the statistics for Katherine, Australia, and London, England, by commenting on each of the following.

a Temperature: _____

_____

b Rainfall: _____

_____

c Seasonal differences: _____

_____

Reading a climograph

9 In a *climograph*, rainfall and temperature statistics are shown on the same graph: rainfall in columns and temperature as a line. Refer to the climograph below to answer these questions.

a Which month has the highest rainfall?

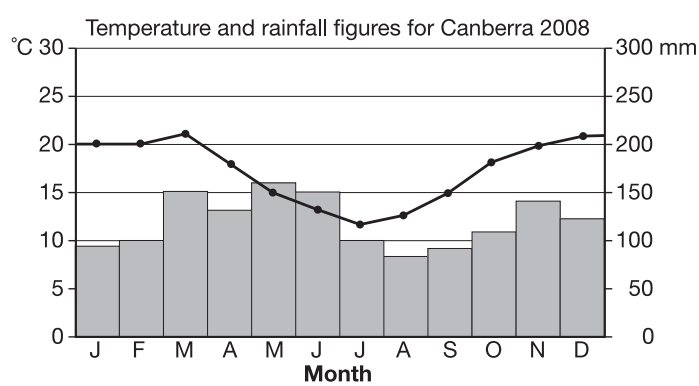
_____

b In which three months were the lowest temperatures recorded in Canberra?

_____

c Which two months show the greatest difference (range) in rainfall figures?

_____



d What is the total annual rainfall for Canberra? _____

e What is the average annual temperature for Canberra correct to one decimal place? _____

Drawing a climograph

10 In your notebook, draw a climograph (also called a *composite graph*) presenting the climate statistics for either London or Katherine.

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

16 Climate change

What is climate change?

1 Use these sets of sentence fragments to write six meaningful statements that answer the question, 'What is climate change?' Ensure that you use correct punctuation.

a any significant and long-term alteration in of a region we use the term 'climate change' to refer to the usual weather pattern

_____

_____

b rainfall figures humidity and alterations in average temperatures the frequency and ferocity of extreme weather events climate change involves

_____

_____

c some can be caused by on or around the Earth natural processes climatic changes

_____

d seem to have contributed human activities recorded in various places around the world to the gradual increase in average temperatures

_____

_____

e as warming this is known global phenomenon

_____

f to melt cause the could eventually polar ice caps some geographers believe raising the height dramatically in coastal areas that climate change of the sea

_____

_____

The Earth's climate

2 Circle the correct answer to each question.

a Which of the Earth's regions have the consistently hottest temperatures?

the tropics the mountains the deserts

b Drought is caused mostly by:

extremely high air temperature. natural disasters. the phases of the moon.

c Two weather systems that affect how much rainfall a continent receives at certain times are:

La Niño and El Niña. El Niño and La Niña.

Characteristics of extreme weather

3 Match the phenomenon with its main effects by writing the appropriate letter next to each description.

a cyclone _____ lightning and thunder

b torrential rain _____ violent winds and heavy rain causing widespread damage

c tornado _____ flash flooding

d electrical storm _____ localised path of destruction

© Ally Chumley and Blake Education, 2009

17 The world's water resources

Use this list of terms to help you with all of the following activities.

land degradation	water pollution	treatment plant	population	run-off	evaporation
dilute	clouds	purified	La Niña	condensation	precipitate
wells	infiltration	transpiration	recycled	ice	rivers
lakes	catchment	reserves	distribution	manufacturing	piping
availability	consumption	irrigation	blood	agriculture	groundwater
stormwater	rainfall	thirst	dehydration	flooding	cholera
transportation	drought	bathing	El Niño	subterranean	water sports
reservoirs	filtering	toxins	dams	monsoon	kidneys
springs	drinking	washing	silt		

Sources of fresh water

1 Complete these terms from the list which describe natural sources of fresh water.

i _____ g _____ s _____ r _____ l _____ r _____

Human inventions for storing fresh water

2 Complete these terms from the list which describe some human inventions that we use to store fresh water.

w _____ d _____ r _____

Using water

3 Complete these terms from the list which refer to ways in which we use fresh water.

i _____ d _____ w _____ m _____ t _____

a _____ b _____ w _____

Classifying groups of words

4 Choose appropriate headings from the box for each group of words.

Heading 1: _____
- land degradation
- toxins
- water pollution
- cholera
- silt

Heading 2: _____
- purified
- recycled
- filtering
- treatment plant

Heading 3: _____
- wells
- subterranean
- infiltration
- groundwater

Heading 4: _____
- distribution
- consumption
- population
- piping

Heading 5: _____
- El Niño
- La Niña
- monsoon
- drought
- thirst

Heading 6: _____
- dehydration
- dilute
- blood
- kidneys

Heading 7: _____
- evaporation
- transpiration
- clouds
- precipitation
- condensation

Heading 8: _____
- flooding
- run-off
- catchment
- stormwater

HINT: *Not all headings can be used.*

HEADINGS

- Why humans drink water
- Water cycle processes
- Salt water
- Supplying water to towns
- Waterways
- Catching and using flood water
- Threats to water supplies
- Underground water sources
- Watersports
- Recycling water
- Boiling water
- Rainfall patterns

18 Energy from the Sun

Word families

1 Write descriptive words (adjectives) that are derived from the following words. Two examples have been done for you.

star	stellar	rays	radiant
Sun		energy	
mass		magnetism	
reflect		refract	
heat		temperature	
climate		Equator	

Global climatic zones

HINT: Think about how the latitude of a location affects its climate.

2 With reference to an atlas, write the name of one country that experiences each of the climates listed. An example has been completed for you.

Polar	Iceland	Savanna		Hot desert	
Cool desert		Mediterranean		Warm humid	
Sub-polar		Tundra		Equatorial	

The four seasons

3 Write the months of the four seasons in the Northern and Southern Hemispheres.

Season	Months (Northern Hemisphere)	Months (Southern Hemisphere)
Summer		
Autumn		
Winter		
Spring		

Explaining terms

4 In your notebook, write an explanation of each of these terms. You may need to consult an encyclopedia or other reference tool.

solar flare sun spots (on the Sun) ultraviolet rays melanin

Facts about the Earth and the Sun

5 Circle the correct option from each pair to complete these facts about the Earth and the Sun.

a The Earth takes **12 hours / 24 hours** to complete one full turn or revolution.

b The **Sun / Earth** revolves around the **Sun / Earth**.

c The **Sun / Earth** takes about 365 days to complete one trip around the **Sun / Earth**.

d The Sun is the centre of our **solar system / universe**.

e The **Sun / Earth** is tilted on its axis, which creates the seasons.

f The Sun's light and heat are produced through a series of **nuclear / ozone** reactions.

The term solar*, an adjective meaning 'related to the Sun', is derived from the Latin word for the Sun,* sol*.*

19 Natural resources

Missing vowels

1 These words have vowels missing. The number of letters missing from each word appears in brackets. Complete the list of natural resources by writing the correct spelling in the spaces provided, then give TWO examples of each kind of resource. The first one has been done for you.

	Vowels missing	Natural resource	Example 1	Example 2
ANMLS	(2)	animals	horse	cow
BRDS	(1)			
FSH	(1)			
NSCTS	(2)			
TRS	(2)			
PLNTS	(1)			
MNRLS	(3)			
MTLS	(2)			
OCNS	(2)			
RVRS	(2)			
LKS	(2)			
OL	(1)			
CL	(2)			
NTRL GS	(4)			
FRSH WTR	(3)			
OZN LYR	(4)			
LND	(1)			

Natural resources are resources that naturally occur on Earth, such as plants, animals, oil, coal, wood, minerals and water.

Endangering our natural resources

2 Write the natural resources listed above that might be affected by each industry. Each may be used more than once.

Farming _____

Fishing _____

Logging _____

Tourism _____

Mining _____

Manufacturing _____

Transport _____

Fashion _____

20 World Heritage sites

What is a World Heritage site?

1 Rearrange these six sentences into a meaningful paragraph about World Heritage sites. Rewrite the paragraph using correct punctuation. Use your notebook if you need extra space.

- the World Heritage program began in 1972 and involves more than 180 political jurisdictions around the globe
- these sites are protected by international law
- it has enabled the protection of many important and beautiful places which can now be preserved for the benefit of future generations
- UNESCO (the United Nations Educational, Scientific and Cultural Organisation) maintains a list of almost 900 special locations around the world that are deemed to be of international significance
- each site remains the property of the country in which it is located
- a World Heritage Site is a natural or built feature that appears on a list administered by the World Heritage Commission

Australian places on the World Heritage List

2 Use the terms in the box to complete the names of these Australian World Heritage sites.

Barrier
Island
Mountains
Bay
Exhibition
Opera House
Wilderness
National

a Fraser _____

b Kakadu _____ Park

c Blue _____

d Great _____ Reef

e Shark _____

f Royal _____ Building

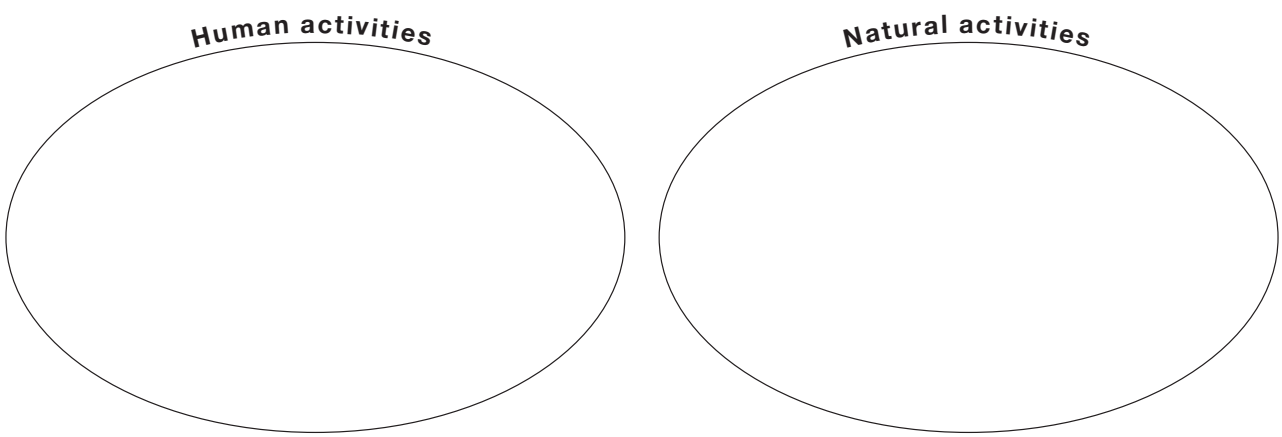
g Sydney _____

h Tasmanian _____

Human and natural agents

3 Write each of the following activities in one of the circles below, according to whether it describes a human or a natural activity.

protecting growing weathering identifying eroding
assessing thriving preserving decaying restoring



© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Criteria for World Heritage listing

4 A *natural* World Heritage site must be naturally occurring AND have great biodiversity AND include exceptional features AND be a habitat for living things. For inclusion on the *cultural* list, sites must be a monument of artistic, historic or scientific value OR show the interactions of humans with their environment OR be an archaeological dig and research area. Think of one natural and one cultural site that could be added to the World Heritage list.

_____

_____

5 Choose TWO of the terms listed below and use them in a sentence about preserving World Heritage sites.

climate change valuing of culture legal obligations individuals governments

_____

_____

Threats to World Heritage sites

6 Choose ONE of these threats and explain what problems it could cause at a World Heritage site.

war plunder weathering and erosion natural disasters industry tourism

_____

_____

_____

Ecotourism

7 People travel to visit World Heritage sites because they are interested in learning about the world's natural wonders, and about people and cultures from the past. List some advantages and disadvantages of ecotourism (ecologically based tourism) to the local community at the site.

Advantages

_____

_____

_____

Disadvantages

_____

_____

_____

Research and site preservation terminology

8 Use the information about prefix and suffix meanings to write the LITERAL meanings of the following terms.

Prefixes			**Suffixes**		
extra above	*bio* living	*top* surface	*terra* land	*marine* sea	*graph* mapping
sub under	*medi* middle	*super* over	*ology* science of	*ologist* student of	
hydro water	*geo* earth		*sphere* realm	*vis* sight	

submarine _____ subterranean _____

hydrosphere _____ geologist _____

Mediterranean _____ biology _____

extraordinary _____ supervisor _____

topography _____ visible _____

9 Now, write full sentence definitions of each term in your notebook using your own words, e.g. Topography is the mapping of the land's surface.

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

21 Threatened habitats

Decoding threats

1 Use the code to decipher the following nine threats to natural habitats.

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z

Threats to the Hydrosphere:

Threats to the Lithosphere:

Threats to the Biosphere:

Threats to multiple spheres:

Types of habitats

2 Complete the following names of habitats, using the definitions to help you.

a	f _ _ _ _ _ c _ _ _ _ y	the topmost layer of a rainforest, made up of leaves and vines
b	l _ _ _	body of salt or fresh water, usually fed by a river or ocean inlet
c	_ _ e e	living thing that takes in carbon dioxide and produces oxygen
d	f _ _ _ _ p _ _ _ _	low lying area of land that is often covered in water during an inundation
e	s _ _	vast body of salt water
f	r _ _ _	rock and coral structure formed by limestone-producing organisms
g	w _ _ _ _ _ d	swamp or marsh
h	r _ _ _ _	waterway running from high land to lower lying areas, often ending in the sea

The four spheres

3 List each of these terms under the correct heading.

breeding	eroded	catchment	heat	coral	land	drain	ozone	topsoil	irrigation	genetic	food web

Biosphere	**Lithosphere**	**Hydrosphere**	**Atmosphere**

Life or death?

4 Sort these terms into two groups, according to their association with the life or death of a species.

survival	threatened	growth	thrive	extinct	toxic

Life: _____ _____ _____

Death: _____ _____ _____

Definitions

5 Write definitions for these terms.

wilderness area _____

carrying capacity _____

Finding terms

6 Write all of the terms from activities 1 to 5 in the boxes, then find them in the puzzle, as well as the additional words listed below. Terms are hidden forwards, backwards, vertically, horizontally and diagonally.

Activity 1: Decoding 9 threats to the spheres

_____
_____
_____
_____
_____
_____
_____
_____
_____

Activity 2: 8 types of habitats

_____
_____
_____
_____
_____
_____
_____
_____

Activity 3: 12 terms from the four spheres

_____ _____ _____
_____ _____ _____
_____ _____ _____
_____ _____ _____

Seeing double? In the puzzle, one two-word term is hidden twice. One occurrence is parallel to the other. Can you find what it is?

_____ _____

Activity 4: 6 life or death terms

_____ _____
_____ _____
_____ _____

Activity 5: 2 two-word terms you defined

_____ _____
_____ _____

26 additional terms:

ecosystem
annual
replanted
habitat
property
settlement
environmental
develop
field
ice
breeders
resources
global
reserve
change
farmlands
crops
poison
salinisation
solid waste
grazing
forest
biodiversity
clearing
native
endangered species

Hidden answer

7 Use shading or highlighting to fill in all the used letters. The remaining letters spell the answer to this question: What is one thing people of the world can do to minimise threats to natural habitats?

Answer: _____

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

22 Contemporary issues in geography

The spatial and ecological dimensions of geography

When geographers investigate a contemporary issue, they work within the spatial dimension and the ecological dimension. The *spatial dimension* seeks to deal with where things are located and why they are there. The *ecological dimension* deals with how organisms (including humans) interact with elements of the spatial dimension – what we call 'environments'.

1 Use ticks to indicate whether each of these questions is asking about a spatial issue or an ecological one.

QUESTIONS	SPATIAL	ECOLOGICAL
a How much snow falls in a certain city each year?	_____	_____
b What problems do heavy snowfalls cause the inhabitants of a certain city?	_____	_____
c When the snow melts, where does the water end up?	_____	_____
d What effect do the snowfalls have on the growth of certain grasses?	_____	_____
e How might snow be used as a source of drinking water for humans?	_____	_____

Asking useful geographical questions

2 Separate this letter chain into separate two-word terms, then write a useful geographical question that geographers might use to investigate each topic.

airpollutionpopulationgrowthacidrainendangeredspecieschildlabourclimatechange

Term: _____ _____
Question: _____

Term: _____ _____
Question: _____

Term: _____ _____
Question: _____

Term: _____ _____
Question: _____

Term: _____ _____
Question: _____

Term: _____ _____
Question: _____

Shades of meaning

3 Circle the term that best fits each definition.

DEFINITION	TERM
a to change	transform **or** impact
b points of view	perspectives **or** perceptions
c shared by a group	local **or** communal
d affecting the people of a country	national **or** regional
e an interdependent system of organisms	environment **or** ecosystem
f traditions that are inherited from people of the past	culture **or** heritage
g to preserve and repair if necessary	maintain **or** improve

23 Settlements

Writing about settlements

1 Write three sentences that explain what a settlement is and how people in settlements provide for their basic needs. Use the words in the box to help you write your explanation.

group	living	job	exchanging	money	goods	buildings
services	income	together	productive	needs	sharing	resources

_____

_____

_____

_____

Characteristics of different types of settlements

2 Complete the definitions by crossing out the inappropriate term in each pair.

a A city is a large settlement with a **large / small** population that creates a great **demand / wish** for goods and services.

b A village is a **small / large** group of buildings and **many / few** public facilities servicing a **small / large** population.

c A metropolis is a **large / small** **city / town** with a **large / small** suburban area and **two / many** commercial districts.

d A town is **smaller / larger** than a village and has a **lesser / greater** variety of shops and service **providers / advisers**.

Settlements and work

3 Describe the relationship between settlements and work. _____

_____

City living

4 What are TWO advantages and TWO disadvantages of living in a large city?

ADVANTAGES

_____

_____

DISADVANTAGES

_____

_____

Settlements and communities

5 Cross out the definition in each pair that does not apply to the geographical topic of settlements and communities.

a **settlement**
to reach an outcome satisfying to both parties in a lawsuit
a location inhabited by a group of people who have installed certain buildings and structures

b **commercial**
relating to the exchange of goods and services for money and vice versa
a television or radio advertisement

c **patterns**
widespread ways of behaving; social trends
artistic designs

d **services**
facilities, expertise and labour provided within a community
formal religious gatherings

e **impact**
the force of a collision
the effect of an activity on the physical or human environment

f **social**
relating to a society
a party or dance

© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

24 Communities

General descriptions

We use certain words to refer to characteristics about people and things that enable us to generalise. Many of these words end in 'al'. e.g. a description of someone's physique (body) is a **physical** *description.*

1 Look at the descriptions below and write words ending in 'al' that fit them.

a	about just one person	i_____	**b**	world-wide	i_____
c	relating to a single country	n_____	**d**	relating to a district	r_____
e	relating to your nearest town	l_____	**f**	relating to society	s_____
g	relating to a location on the Earth	g_____	**h**	relating to history	h_____
i	relating to money	f_____	**j**	relating to politics	p_____
k	relating to a profession	p_____	**l**	relating to the community	c_____

2 Complete the following 'al' words, which refer to general characteristics about people.

a	relating to race	r_____	**b**	relating to the intellect	i_____
c	relating to education	e_____	**d**	relating to the psyche	p_____
e	relating to the feelings	e_____	**f**	relating to beliefs and spirituality	s_____
g	relating to the personality	p_____	**h**	relating to culture	c_____

Communities are composed of human beings, and therefore are organic and ever-changing. Small groups can belong to a larger group, making a community's actual boundaries difficult to determine.

Involvement in communities

Nathan is a fifteen-year-old boy who lives in Melbourne, Australia. He is enrolled in Year 9 at St Joseph's High School and plays on the school's cricket team. His neighbours, twin brothers of Nathan's age, are his best friends and are also on his cricket team. When they're not playing cricket, the three boys enjoy hanging out together. They are all keen internet users, and have accounts on Facebook. Nathan's parents are involved in an amateur acting group called the Players Theatre Company. Sometimes, Nathan helps out by painting sets and backdrops to be used in their shows. Nathan's parents, his grandparents on his mother's side and his two uncles emigrated to Australia from their home country of Greece over 30 years ago. The family get together regularly, celebrating Greek festivals and other family traditions. Nathan is a devoted fan of the St Kilda football club. He is a registered member of the team's online fan club and attends games throughout the season.

3 With how many different communities does Nathan have a connection? Decide on names for each community and organise them in order of estimated size, from largest to smallest. Then list them in the spaces provided.

_____ _____

_____ _____

_____ _____

_____ _____

_____ _____

Mind-mapping communities

4 In your notebook, draw a mind map to represent the relationships between all of Nathan's communities. This will require some careful planning. Some communities may overlap others.

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Describing yourself

5 Use SIX categories from the first two activities (on page 38) to write point form descriptors about yourself.

Belonging to different communities

6 Think about your own life. How many different communities are you a part of?

a Using Nathan's example in activity 3 as a guide, make a list of all of the communities in which you are involved.

b In your notebook, draw a mind map to represent the relationships between all of the communities in which you are involved.

Togetherness

7 Use the endings in the box to make 'comm' words. List them in alphabetical order, then write definitions for them, linking the meaning to the concept of togetherness among human beings.

emorate	unal	unicate	ittee	on	union	itment

comm _____

comm _____

comm _____

comm _____

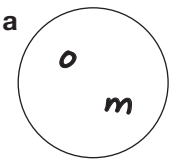
25 Population, migration and trade

Common prefixes in geographical terms

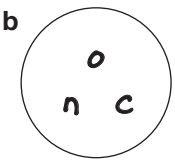
1 Use the letters inside each circle to create a prefix (word beginning) that can be used to complete the words in each set.

a



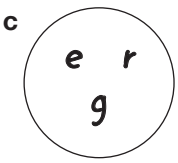
__ __ mentum
__ __ tion
__ __ vement
__ __ bility
__ __ bilised

b



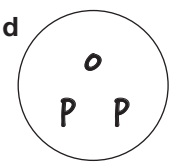
__ __ __ text
__ __ __ flict
__ __ __ tact
__ __ __ verge
__ __ __ stant

c



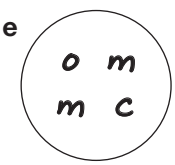
__ __ __ ion
__ __ __ ional
__ __ __ ime
__ __ __ ulation
__ __ __ ister

d



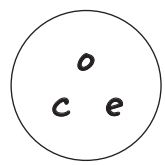
__ __ __ ortunity
__ __ __ ressed
__ __ __ osition
__ __ __ ression
__ __ __ osed

e



__ __ __ __ unity
__ __ __ __ unicate
__ __ __ __ on
__ __ __ __ ence
__ __ __ __ itment

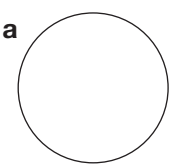
f



__ __ __ nomy
__ __ __ logical
__ __ __ system
__ __ __ nomic
__ __ __ logist

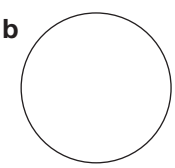
2 Work out which letters should be inside each circle to create a prefix (word beginning) that can be used to complete the words in each set.

a



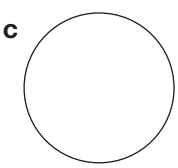
__ __ __ ulated
__ __ __ ular
__ __ __ ulous
__ __ __ ulation

b



__ __ __ __ tegy
__ __ __ __ tegically
__ __ __ __ tegic
__ __ __ __ tegise

c



__ __ __ __ ve
__ __ __ __ ons
__ __ __ __ onality
__ __ __ __ onal

Vertical opposites

3 Write the opposite of each word vertically, using a letter from the word as the start of its opposite. An example has been done for you.

ADVANTAGE	RURAL	ALLIES	INJUSTICE	EQUALITY
I S A D V A N T A G E				

Odd one out

4 Circle the odd one out in each set of words.

a community society group individual

b defence protection attack shield

c trade commerce transaction steal

d victory treaty pact agreement

e equal justice oppression fairness

f wealthy organisation corporation agency

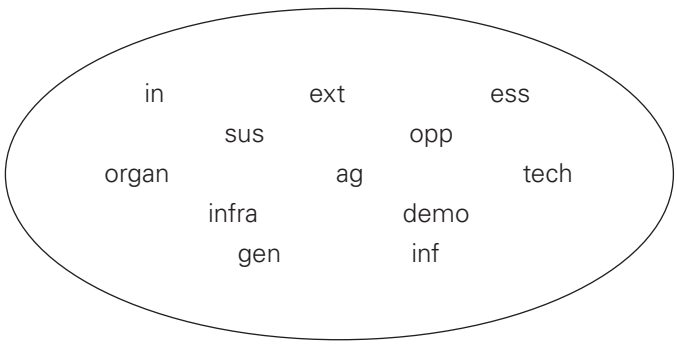
g migration tourism immigration emigrate

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

26 Wealth and poverty

Global inequalities

1 Reunite these word beginnings (in the circle) with their endings (in the box) to create a list of twelve terms that we use when discussing issues of global inequalities. Rewrite the matching pairs to form whole words.



entials	luence		
graphic	ortunities	encies	
nology	equality		
reme	der	structure	
isations	tainability		

_____ _____ _____ _____

_____ _____ _____ _____

_____ _____ _____ _____

Meeting basic needs

2 Use the word fragments in the box to spell out six basic needs common to all people, rich and poor.

_____ _____

_____ _____

_____ _____

nut	cation	ter	shel	edu	hea
ety	ter	wa	rition	saf	lthcare

Relative wealth and poverty

3 Place a W (wealth) or P (poverty) next to each of these news headlines, according to whether they are reporting on wealth or poverty.

a ___

b ___

c ___

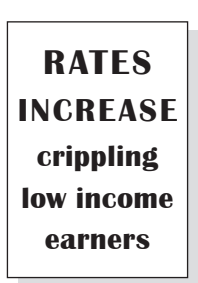
d ___

e ___

f ___

g ___

h ___



4 What are TWO ways in which your community could help alleviate the effects of poverty on a local scale?

_____

_____

© Ally Chumley and Blake Education, 2009

27 Emergency relief

Emergency action words

1 Transform these nouns into verbs, following the example given.

NOUN	VERB
relief	relieve
management	_____
acceptance	_____
assistance	_____
assessment	_____
inclusion	_____

Verb: *a word used to denote an action or state of being.*

Noun: *a word used to name a person, place, thing or quality.*

Meeting basic needs in an emergency

2 Imagine you are in charge of organising emergency supplies after a major flood in a developing country. Choose from the resources below to design a food relief package to be dropped by helicopter into the disaster area. Aim to create a package that will provide enough food for seven days, will last at least a week without refrigeration, and will incorporate the nutritional needs of a family of three adults (one elderly) and two children (aged 6 and 10).

NOTE: The total weight of the package must not exceed 22 kilograms. The individual weights shown cannot be altered.

2 kg rice	2 kg potatoes	2 kg pasta	500 g potato chips	1 kg bread rolls
500 g butter	500 g yogurt	1 kg cheddar cheese	250 g sugar	250 g salt
3 kg fresh fruit	3 kg green vegetables	1 kg pumpkin	500 g carrots	2 bread loaves (500 g)
500 g chocolate	250 g choc. biscuits	2 litres fruit juice (2 kg)	500 g cornflakes	500 g cooking oats
1 kg fresh fish	1 kg tinned fish	2 kg raw red meat	2 kg raw chicken	2 kg salted red meat
250 g coffee	500 g canned tomatoes	250 g tea	1 cooked chicken	5 litres water (5 kg)
250 g onions	250 g Milo	1 kg UHT (long-life) milk	500 g soft drink	500 g kidney beans
500 g ice cream	250 g lollies	250 g cream	500 g eggs	250 g cooking oil

FOOD PACKAGE CONTENTS

_____ _____ _____

_____ _____ _____

_____ _____ _____

_____ _____ _____

_____ _____ _____

Other supplies

3 What other supplies could you provide for families in emergencies? List THREE to help meet each of these needs.

a communications _____ _____ _____

b baby care _____ _____ _____

c personal hygiene _____ _____ _____

d first aid _____ _____ _____

e lighting/heating _____ _____ _____

f protection from insects _____ _____ _____

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

28 Citizenship and human rights

Citizenship nouns

1 Transform these adjectives into nouns, following the example given.

ADJECTIVE	NOUN
political	politics
communal	
national	
cultural	
responsible	
social	
constitutional	

Adjective: *a word that describes (or modifies) a noun.*

Noun: *a word used to name a person, place, thing or quality.*

Transforming policies into actions

2 Write a description of how each of these policies could be put into practice in your community.

Equal employment opportunities: _____

_____

Zero tolerance for violent behaviour in public: _____

_____

Anti-discrimination (on the basis of race): _____

_____

The Australian political system

3 Write a sentence identifying the type of political system that governs Australia, using the words in the box.

parliament	democracy	represent

_____

_____

Correcting spelling

4 Cross out any words that are spelled incorrectly in the list below. Write each word correctly.

economic		rights	
goverment		phisical	
contempory		political	
justice		transformasion	
illegall		legislation	
culturel		citazenship	
sociaties		determine	
localy		civic	
individual		constitution	
international		immigrent	

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

29 Towards a global culture

Synonyms

Synonyms are words that have similar meanings to each other.

participation
change
international
variety

1 Choose the correct synonym from the circle for each of the following words.

diversity _____ modify _____

involvement _____ global _____

Citizenship and culture

appreciation	cultures	mutual

2 Write a sentence promoting positive citizenship using these words.

_____

_____

3 Write a sentence advising people of what they can do to fight against prejudice on the basis of culture.

_____

_____

Globalisation

4 Use the headings below to categorise these terms, which help us account for the phenomenon of globalisation.

foreign aid	fashion	transnational corporations	Hollywood films
satellite technology	internet	communications	worldwide advertising
offshore investments	trade	travel	downloadable MP3 music
immigration	employment	education	franchising of fast food chains

INFORMATION LINKS	ECONOMIC LINKS	POPULAR CULTURE LINKS

Sources of influence

5 Identify one possible source from which people have gained information about each of these items and behaviours. An example has been done for you.

Wearing denim jeans Seeing photos from countries where denim jeans are popular.

Eating spicy foods _____

Viewing a new film _____

Buying a Mercedes car _____

Supporting a sponsor child from a developing country _____

Meeting global challenges

6 Many people in the world do not get enough food to eat. This is mainly caused by the uneven distribution of wealth. Suggest a global plan that could address this problem.

_____

_____

30 Sustainable development

Crossword: The importance of sustainable development

The crossword puzzle answers are the missing words from the passage below. Work out the answers from their context in the passage. Some letters have been inserted in the grid to help you.

The world's natural resources are **(13 down)** running out. People in today's society seem to be on a **(13 across)** for the ultimate in personal comfort, **(6 down)** goods and easy living. To keep the manufacturing industry operating, we have been using up all of our **(5 across)** reserves. In **(12 down)** years, we've mined most of the Earth's **(30 across)** and taken much of its natural **(20 across)**. We've cut down entire forests for **(19 across)**, and have polluted our **(25 across)** water and other precious assets that simply can't be replaced. Our wasteful **(1 across)** habits are also destroying the **(11 down)**. Scientists and **(1 down)** have been warning us for years that the Earth cannot **(29 across)** for our **(17 down)** much longer. If we care about **(25 down)** generations at all, we simply must begin to practise **(10 across)** development now. At present, the developed countries of the world consume about 80% of the planet's resources, yet they only represent 20% of the total **(18 across)**. Developed nations **(21 across)** natural resources that come from **(32 across)** nations. This keeps **(9 down)** the gap between the **(14 across)** and the poor. We certainly have the **(8 across)** to improve the living standards of **(22 across)** poor people around the world who live in **(33 across)** poverty. In some countries, **(4 across)** don't have enough food to **(24 down)** and are forced to drink **(15 across)**, polluted water. This causes widespread misery, disease and millions of needless deaths. We seem to have become immune to the **(3 down)** and suffering of others. Things can change, but we must first experience a change in our **(16 across)**. We must acknowledge our selfishness and **(23 down)**, and learn to **(30 down)** for others. With **(31 across)** responsible practices, we might be able to **(7 down)** the last of our resources for the future. Let's **(26 down)** that we can **(2 down)** out these global problems before it's too late. We **(28 down)** make a start by learning to cultivate a **(23 across)** appreciation of our wonderful **(27 down)** and its natural resources before they're all **(20 down).**

© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

Answers

1 Australia's states and territories

1 (By rows) 1 WA, Western Australia, Perth; 2 QLD, Queensland, Brisbane; 3 NT, Northern Territory, Darwin; 4 SA, South Australia, Adelaide; 5 NSW, New South Wales, Sydney; 6 VIC, Victoria, Melbourne; TAS, Tasmania, Hobart; 8 ACT, Australian Capital Territory, Canberra. **2 a** Graph should be named, consist of horizontal bars with labels and have an appropriate scale. **b** square kilometres or kilometres squared. **c** Answers will vary greatly; could include populations, rainfall, exports, number of tourists.

2 Australia in a global context

1 Imports: Nike trainers, crude oil, instant coffee, Toyota cars, Calvin Klein T-shirts, Hewlett-Packard computers, Levi jeans. **Exports:** wine, coal, diamonds, beef, wheat. **2 a** New Zealand, **b** United States of America, **c** Japan, **d** Taiwan. **3** United States of America, England (or UK or Britain), New Zealand, Canada, Papua New Guinea (others at teacher's discretion). **4** Draw a line through: China, Italy, New Zealand, Japan, United States of America. **5** Asia. **6** Possible answers: overcrowding in home country; escaping war, conflict, religious or other persecution; proximity to Asian homeland; seeking employment; seeking better life; joining relatives; political freedom; educational opportunities. **7** Incorrect spelling: gobalisation, sattelites, child laber, foriegn aid, tecnology, finansial, muticulturalism, comunications, oportunities, enviromental impact.

3 The Asia Pacific region

1 (from row 2) **Capital:** Canberra, Wellington, Port Moresby, Jakarta. **Languages**: English, English, (English, Tok Pisin & Motu), Javanese and Indonesian. **Currency:** dollar, (dollar), kina, (rupiah). **Population:** (22 million), (4.5 million), 7.5 million, 235 million. **Highest mountain**: Mt Kosciuszko, Mt Cook, (Mt Wilhelm), Puncak Jaya. **2 a** Australia, **b** Thailand, **c** Indonesia, **d** Malaysia, **e** Singapore, **f** Papua New Guinea, **g** South Korea, **h** Cook Islands, **i** Philippines, **j** Japan, **k** New Zealand, **l** North Korea. **3 a** Fiji, **b** Vanuatu, **c** French Polynesia, **d** Tonga, **e** Solomon Islands. **4** Australia, Cook Islands, Fiji, French Polynesia, Indonesia, Japan, Malaysia, New Zealand, North Korea, Papua New Guinea, Philippines, Singapore, Solomon Islands, South Korea, Thailand, Tonga, Vanuatu. **5** 1 Australia, 2 New Zealand, 3 Papua New Guinea, 4 Solomon Islands, 5 Vanuatu, 6 Fiji, 7 Tonga, 8 Cook Islands, 9 French Polynesia, 10 Indonesia, 11 Singapore, 12 Malaysia, 13 Philippines, 14 Thailand, 15 South Korea, 16 North Korea, 17 Japan.

4 The Australian continent

1 Possible answers: **a** Snowy Mountains NSW/VIC; **b** Great Sandy Desert WA, Simpson Desert NT/SA/QLD; **c** Hamilton, Green, Dunk, other Whitsunday islands, all QLD; Torres Strait islands; **d** Daintree QLD; **e** Hunter NSW, MacLeay, Yarra VIC, Huon TAS; **f** Barossa SA, Riverina NSW/VIC, Stanthorpe QLD. **2 a** WA, **b** SA, **c** VIC, **d** TAS, **e** NT, **f** NSW, **g** NSW, **h** NSW, **i** QLD, **j** WA. **3** Port Macquarie, Port Augusta, Cape York, South East Cape, Cape Byron, Cape Leeuwin, Port Douglas, Port Hedland. **4** Melville Island, Lord Howe Island, Fraser Island, King Island, Kangaroo Island, Norfolk Island, Flinders Island. **5** Coral Sea, Lake Jindabyne, Tasman Sea, Pacific Ocean, Lake Macquarie, Arafura Sea, Timor Sea, Indian Ocean. **6 a** Great Barrier Reef, **b** Great Sandy Desert, **c** Great Australian Bight, **d** Great Ocean Road, **e** Great Western Highway, **f** Great Keppel Island, **g** Great Dividing Range. **7 a** Alice Springs 23°S (113.5°E), **b** Broome 17.5°S (122°E), **c** Mount Isa 20°S (139°E), **d** Broken Hill 31.5°S (141°E), **e** Lake Eyre 29°S (137.5°E), **f** Rockhampton 23°S (150°E), **g** Uluru 25°S (130.5°E), **h** Byron Bay 28°S (153°E). **8** QLD – Roma, Cloncurry, Weipa, Birdsville, Dalby; NSW/ACT – Cobar, Bourke, Narooma, Lithgow, Inverell; VIC – Sale, Ballarat, Moe, Shepparton, Wadonga; WA – Kununurra, Exmouth, Halls Creek, Dampier, Marble Bar; SA – Oodnadatta, Coober Pedy, Maralinga, Port Pirie, Ceduna; TAS – Burnie, Huonville, Launceston, Queenstown, Devonport; NT – Nhulunbuy, Bathurst Island, Tennant Creek, Hermannsburg, Finke.

5 Australian environments

1 a humid dry sunny wet rainy stormy windy breezy windless frosty foggy hot warm balmy temperate mild cool chilly cold freezing snowy icy. **b** Answers will vary. **2** Desert: spinifex, dust storms, red centre, parched, arid, low rainfall. Alpine: snowline, icicles, cold, high altitude, snowfalls, sub-zero. Tropical: humidity, tides, palms, cyclones, beach, monsoon. Temperate: growers, plains, crops, farmlands, regular rainfall, major cities. **3 a** Mount Kosciuszko (NSW), **b** Mount Buffalo (VIC), **c** Mount Woodroffe (SA), **d** Mount Franklin (NSW), **e** Mount Remarkable (SA), **f** Cradle Mountain (TAS), **g** Mount Pasco (WA), **h** Mount Ogilby (QLD), **i** Mount Ellery (VIC), **j** Mount Hardy (NT), **k** Mount Conway (NT), **l** Mount Lofty (SA).

6 Indigenous Australians

1 a Gondwanaland, **b** relief, **c** continent, **d** landforms. **2** relationship, Europeans, tribes, migrated. **3** 4, 5, 7, 1, 6, 3, 2. **4** Answers will vary.

7 The Antarctic region

1 a the South Pole. **b** South America, Australia, New Zealand. **c** all year round. **2** –89°C, –50°C. **3** Draw a line through: koala and pelican. **4** Whales migrate to warmer waters, and are insulated by a thick layer of blubber to conserve body heat. **5** *invertebrates*: animals that do not have a backbone; *emitting*: releasing or shining (light); *predatory*: surviving by eating (preying on) other living things; *longevity*: long life span; *bulls*: male whales; *tentacles*: long flexible organs used in grasping and feeling. *wingspan*: distance between the tips of a bird's fully extended wings; *colonial*: preferring to nest in groups (colonies). **6 a** Australian Antarctic Territory, **b** Douglas Mawson. **7 a** phytoplankton, **b** protozoa, **c** bacteria, **d** krill, **e** fish, **f** squid, **g** seals, **h** whales, **i** penguins. **8** Krill are much more numerous due to their tiny size (i.e. there are more krill than fish to a tonne). **9** phytoplankton → krill → all the other species; fish and squid → penguins, seals and whales; seals → whales. **10** Possible answers 4-letter words: edit, exit, next, note, node, need, pint, pied, pond, pine, pent, diet, dope, deep, dent, dote, into, oxen, tine, tide, tone, tied. 5-letter words: noted, toned, index, opine, tepid, toxin. 6-letter words: expend, exited, opened, denote. 7-letter word: edition.

8 Latitude and longitude

1 Answers will vary: mark for correct spelling, punctuation, expression, clarity and accuracy of facts. Model: Lines of latitude run from east to west and are parallel. The Equator is the longest line of latitude. Areas north of the Equator are in the Northern Hemisphere, and areas south of the Equator in the Southern Hemisphere. Lines of longitude run from north to south, curving around the Earth from the poles. The Tropic of Cancer receives the most direct rays of the sun on June 21 in the Southern Hemisphere. The Tropic of Capricorn receives them on December 21. These dates are called the 'solstices'. In the Southern Hemisphere, the Equator receives the sun's most direct rays on March 22 and September 23. These dates are called the 'equinoxes'. **2** Diagram labels (top to bottom): Arctic Circle, Tropic of Cancer, Equator, Tropic of Capricorn, Antarctic Circle. **3** navigate, tropic, northern, meridian, degrees, location, parallel, position. **4** Athens, Barcelona, Cairo, Dallas, Esperance, Freetown, Gettysburg, Havana, Islamabad, Johannesburg, Kiev, London, Montevideo, Nadi, Oslo, Paris, Quito, Rabaul, Sandakan, Toronto, Usoke, Vienna, Wellington, Xian, Yokohama, Zurich. **5 a** It is on the Equator, which has the latitude zero degrees south/north. **b** The Greenwich Meridian is in Greenwich, a suburb of London, where the longitude is zero degrees east/west. Due to the political and military dominance of the British Empire in the 1800s, Greenwich (a suburb of London) was chosen as the 'prime meridian' the starting point for measuring longitude.

9 Topographic maps

1 A is in AR2451, B is in AR2152, C is in AR2359, D is in AR2555, E is in AR2959, F is in AR3355, G is in AR2954, H is in AR3553, I is in AR3252, J is in AR2952. **2** A = GR245515, B = GR217520, C = GR230594, D = GR255554, E = GR291590, F = GR330550, G = GR294542, H = GR354538, I = GR322527, J = GR293524 **3 a** GR315595, **b** GR283577. **4 a** 4250 m (8.5 cm units x 500 m), **b** 1250 m (2.5 units x 500 m). **6 a** the swamp, **b** There are no lines of elevation. **7 a** the freeway, **b** SSE, **c** SE, **d** W **e** NE. **8** Descriptions of locations: degrees of latitude, area reference, east, minutes of latitude, kilometres, contour line, metres above sea level, elevation, grid reference, direction. Natural features: lake, river, swamp, vegetation, mountain, valley, gully. Built features: highway, tower, road, village, railway line, building, bridge. **9** Correct spellings **a** height, **b** gradient, **c** incline, **d** approximate, **e** northings, **f** feature, **g** reference, **h** contour, **i** interval.

10 Graphs, charts and tables

1 a PC, **b** CG, **c** LG, **d** BG, **e** SG, **f** T. **2 a** bar graph, scatter graph, column graph, line graph. **b** pie chart, **c** bar graph, scatter graph, column graph, line

© Ally Chumley and Blake Education, 2009
© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

graph. **d** scatter graph, line graph. **3 a** column graph, **b** playing games, **c** 60%, **d** emailing or messaging, **e** 80%, **f** twelve- to fourteen-year-olds. **4** Answers should show a simple two-column table and separate bar graph showing the relative frequencies of each pet type. **5 a** Scatter graphs have a vertical and a horizontal axis, gridlines and a series of plotted points through which a 'line of best fit' is drawn to make comparisons between two groups of data. **b** Graphs to match scatter graph definition. **6** Total deaths = 1560. 360/1560 = 0.23076923. Multiply each seasonal total by 0.23076923. Angles are Summer (667 x factor = 153.9°), Autumn (376 x factor = 86.8°), Winter (156 x factor = 36°), Spring (361 x factor = 83.3°). **7 a** synoptic chart, **b** topographic map, **c** line drawing.

11 Research and data collection **1, 2, 4** Answers will vary. **3** Step 4 Choose a data collection technique to be used; Step 5 Collect the primary data; Step 6 Process and analyse the data; Step 7 Select some presentation methods to communicate the findings; Step 8 Propose action that could be taken in response to the findings.

12 Acronyms in geography **1** Computer technology: HTTP, HTML, USB, URL, WWW. Radio technology: AM, FM, RFID. **2** APEC, Asia Pacific Economic Cooperation, Trade in the Asia Pacific region; IMF, International Monetary Fund, Emergency loans to governments; IOC, International Olympic Committee, The Olympic Games; NATO, North Atlantic Treaty Organisation, Trade and defence; OPEC, Organisation of Petroleum Exporting Countries, Trade; UN, United Nations, Multiple, mainly humanitarian issues; WHO, World Health Organisation, Health; WWF, World Wildlife Fund, Protecting animals and plants; WFC, World Food Council, Food provision; UNICEF, United Nations International Children's Emergency Fund, Emergency aid; UNESCO, United Nations Educational, Scientific and Cultural Organisation, Education, science and culture; INTERPOL, International Criminal Police Organisation, Law enforcement. **3** CD compact disc, AI artificial intelligence, LCD liquid crystal display, POW prisoner of war, GNP gross national product, ID identification, SOS save our souls, SPF sun protection factor, GPS global positioning system, HAZMAT hazardous materials. **4** EST and GMT, GDP and GNP, GM and Non-GM, AM and PM. **5 a** laser, **b** modem, **c** radar, **d** NASA, **e** AIDS, **f** sonar, **g** scuba, **h** Anzac, **i** PIN, **j** EFTPOS.

13 Completing geography tasks **1** an argument, an assessment, a calculation, a comparison, a definition, a demonstration, a description, a discussion, an examination, an explanation, an interpretation, a proposition, a suggestion, a simplification, a summary. **2 a** justify, **b** sketch, **c** investigate, **d** outline, **e** predict, **f** evaluate, **g** tabulate. **3 a** F, **b** O, **c** F, **d** O, **e** O, **f** O, **g** F.

14 Using meteorological terms **1** climates, revolution, forecasts, precipitation, gases, oxygenated, icy, measurements, atmospheric, meteorologists, tidal, season, barometric. **2** maximum, minimise, polar, energy, rotations, humid, condense, vapours, pollution, pressurised, cool. **3 a** the lowest temperature recorded overnight, **b** the weather map, **c** very strong winds.

15 Climate statistics **1 a** minimum temperature **b** maximum temperature **c** average monthly temperature. **2 a** subtracting the lowest temperature from the highest temperature recorded in a particular day, **b** finding the highest and lowest temperatures over a three-month period, **c** the total of all the monthly temperatures divided by 12. **3 a** the number of millimetres of rainfall collected in a measuring cylinder in a single day. **b** the total rainfall (mm) for the year divided by twelve months. **4** R = H – L. **5 a** add the 6 figures and divide by 6. **b** divided by 12. **6 a** amount of rainfall, **b** amount of snowfall, **c** wind speed, **d** level of humidity, **e** distance between two towns, **f** speed, **g** temperature. **7 a** Dec, Jan, Feb, Mar. **b** Feb and July (a range of 11°). **c** the hottest months of the year receive the most rainfall. **8** Possible answers: the monsoonal tropical climate of Katherine compared to the cool climate of London. Temperatures in Katherine are markedly higher all year round. London temperatures seem unrelated to rainfall patterns. London has a more consistent rainfall pattern throughout the year than Katherine. **9 a** May, **b** June, July and August, **c** May and August, **d** 1420 mm, **e** 17.2°. **10** Graph should be combined column and line graph showing rainfall and temperature statistics for either London or Katherine.

16 Climate change **1 a** We use the term 'climate change' to refer to any significant and long-term alteration in the usual weather pattern of a region. **b** Climate change involves alterations in average temperatures, rainfall figures, humidity and the frequency and ferocity of extreme weather events. **c** Some climatic changes can be caused by natural processes on or around the Earth. **d** Human activities seem to have contributed to the gradual increase in average temperatures recorded in various places around the world. **e** This phenomenon is known as 'global warming'. **f** Some geographers believe that climate change could eventually cause the polar ice caps to melt, dramatically raising the height of the sea in coastal areas. **2 a** the deserts, **b** extremely high air temperature, **c** El Niño and La Niña. **3 a** violent winds and heavy rain causing widespread damage, **b** flash flooding, **c** localised path of destruction, **d** lightning and thunder.

17 The world's water resources **1** ice, groundwater, springs, rivers, lakes, rainfall. **2** wells, dams, reservoirs. **3** irrigation, drinking, washing, manufacturing, transportation, agriculture, bathing, watersports. **4** 1 Threats to water supplies, 2 Recycling water, 3 Underground water sources, 4 Supplying water to towns, 5 Rainfall patterns, 6 Why humans drink water, 7 Water cycle processes, 8 Catching and using flood water.

18 Energy from the Sun **1** sunny, sunlit, solar; energetic, energised; massive; magnetic, magnetised; reflected, reflective; refracted, refractive; heated, hot, hotter; temperate; climatic; Equatorial. **2** Savanna: India, Kenya, Madagascar, Peru; Hot desert: Central and North Africa, Central Australia, Saudi Arabia, south-eastern USA; Cool desert: Central China, Southern Russia, Northern USA; Mediterranean: Greece, Italy, Spain, Portugal; Warm humid: Eastern China, Eastern USA, Brazil; Sub-polar: Northern Asia, Central Russia, Canada; Tundra: Scandinavia, Northern Russia, Alaska, Greenland, Iceland; Equatorial: Central America, Central Africa, Indonesia. **3** NORTHERN: Summer –Jun, Jul, Aug; Autumn – Sep, Oct, Nov; Winter – Dec, Jan, Feb; Spring – Mar, Apr, May. SOUTHERN: Summer – Dec, Jan, Feb; Autumn – Mar, Apr, May; Winter – Jun, Jul, Aug; Spring – Sep, Oct, Nov. **4** solar flare: a sudden release of magnetic energy that projects in a fiery burst from the Sun's surface; sun spots: an area on the Sun's surface that is cooler and therefore darker than its surroundings; ultraviolet rays: electromagnetic radiation with a shorter wavelength than that of visible light; melanin: human skin pigment that reacts with ultraviolet radiation, causing skin to darken and potentially burn and cause skin cancer. **5 a** 24 hours. **b** Earth, Sun. **c** Earth, Sun. **d** solar system. **e** Earth. **f** nuclear.

19 Natural resources **1** birds, fish, insects, trees, plants, minerals, metals, oceans, rivers, lakes, oil, coal, natural gas, fresh water, ozone layer, land. Examples: answers will vary. **2** FARMING animals, birds, fish, insects, trees, plants, fresh water, land, oceans, rivers, lakes; FISHING animals, birds, fish, oceans, rivers, lakes; LOGGING animals, birds, fish, insects, trees, plants, fresh water, ozone layer, land, oceans, rivers, lakes. TOURISM animals, birds, fish, plants, trees, fresh water, ozone layer, land, oceans, rivers, lakes. MINING animals, birds, fish, plants, trees, minerals, oil, coal, natural gas, metals, fresh water, ozone layer, land, oceans, rivers, lakes. MANUFACTURING animals, birds, fish, plants, trees, minerals, oil, coal, natural gas, metals, fresh water, ozone layer, land, oceans, rivers, lakes. TRANSPORT animals, plants, trees, minerals, oil, ozone layer, land, oceans, rivers, lakes. FASHION animals, birds.

20 World Heritage sites **1** Possible answer: A World Heritage site is a natural or built feature that appears on a list administered by the World Heritage Commission. UNESCO (the United Nations Educational, Scientific and Cultural Organisation) maintains a list of almost 900 special locations around the world that are deemed to be of international significance. Each site remains the property of the country in which it is located. These sites are protected by international law. The World Heritage program began in 1972, and involves more than 180 political jurisdictions around

© Ally Chumley and Blake Education, 2009

© Blake Education ISBN 978 1 92561 032 1 Literacy in Geography 9 - 10

the globe. It has enabled the protection of many important and beautiful places which can now be preserved for the benefit of future generations. **2 a** Fraser Island, **b** Kakadu National Park, **c** Blue Mountains, **d** Great Barrier Reef, **e** Shark Bay, **f** Royal Exhibition Building, **g** Sydney Opera House, **h** Tasmanian Wilderness. **3** HUMAN: protecting, identifying, assessing, preserving, restoring. NATURAL: growing, weathering, eroding, thriving, decaying. **4, 5** Answers will vary. **6** Possible answers: Structural or ecological damage; destruction, theft or vandalism; wearing away and crumbling; flood or wind damage; breakage; degradation due to toxins, acid rain or pollution; decay and alteration from tourist activities, including unsupervised interference and waste build-up. **7** Possible answers ADVANTAGES: increases people's awareness and appreciation of the site, returns economic benefits to the community DISADVANTAGES: can cause damage or destruction to the site, can force the community to develop tourist facilities, which are costly and negatively impact upon the area; tourists can be invasive and create social difficulties, including the over-crowding of small towns. **8** submarine = under sea; subterranean = under land; hydrosphere = water realm; geologist = earth student of; Mediterranean = middle land; biology = living science of; extraordinary = above ordinary; supervisor = over sight; topography = surface mapping; visible = seeable. **9** submarine: under the sea; subterranean: under the land; hydrosphere: the water realm; geologist: student of the earth; Mediterranean: middle of the land; biology: science of life, extraordinary: above the ordinary; supervisor: overseer; topography: mapping of the land's surface; visible: able to be seen.

21 Threatened habitats

1 Hydrosphere: sediment, damming, algae; Lithosphere: dumping, desertification; Biosphere: logging, deforestation; Atmosphere: acid rain, tourism. **2 a** forest canopy, **b** lake, **c** tree, **d** flood plain, **e** sea, **f** reef, **g** wetland, **h** river. **3** Biosphere: breeding, coral, food web, genetic; Lithosphere: eroded, land, topsoil; Hydrosphere: catchment, drain, irrigation; Atmosphere: heat, ozone. **4** Life: survival, growth, thrive; Death: threatened, extinct, toxic. **5** wilderness area: a natural ecosystem unaffected by the activities of humans; carrying capacity: the potential of an area of land to support living things by providing food (including minerals for plants), water and shelter. **6** See solution grid below right; Two-word term hidden twice – acid rain. **7** Practise sustainable development.

22 Contemporary issues in geography

1 a spatial, **b** ecological, **c** spatial, **d** ecological, **e** ecological. **2** air pollution, population growth, acid rain, endangered species, child labour, climate change. Questions: answers will vary. **3** transform, perspectives, communal, national, ecosystem, heritage, maintain.

23 Settlements

1 Answers will vary. **2 a** large, demand. **b** small, few, small. **c** large, city, large, many. **d** larger, greater, providers. **3** People are attracted to settlements because they hope to find employment. This influx of people results in greater demand for products and services, which creates more jobs, and attracts more people looking for work – and so the cycle continues. **4** Answers will vary. Possible answers: ADVANTAGES Better employment opportunities, access to a variety of specialised goods and services, socially fulfilling. DISADVANTAGES overcrowding, high cost of living, transport delays and complexities. **5** Correct definitions *settlement* a location inhabited by a group of people who have installed certain buildings and structures; *commercial* relating to the exchange of goods and services for money and vice versa; *patterns* widespread ways of behaving, social trends; *services* facilities, expertise and labour provided within a community; *impact* the effect of an activity on the physical or human environment; *social* relating to a society.

24 Communities

1 a individual, **b** international, **c** national, **d** regional, **e** local, **f** social, **g** geographical, **h** historical, **i** financial, **j** political, **k** professional, **l** communal. **2 a** racial, **b** intellectual, **c** educational, **d** psychological, **e** emotional, **f** spiritual, **g** personal, **h** cultural. **3** Melbourne, Year 9 St Joseph's High School, St Joseph's High School Cricket Team, friends (neighbours), Facebook, the internet, the Players Theatre Company, Australian Greek, immediate family, extended family, St Kilda Football Club. **4** Answers should reflect the interconnectedness between the communities, with some smaller communities fully absorbed within larger ones. **5** Answers will vary. **6** Answers will vary. **7** *commemorate* to publicly remember or pay tribute to a person or event from the past, *commitment* to sincerely fix or dedicate one's self to a particular purpose, *committee* a group of people officially appointed to perform a function involving decision-making on behalf of a larger group, *common* shared or mutual *communal* owned and/or used by a group (community) rather than individually, *communicate* to use language or other means to express one's self to others, or to exchange thoughts and messages, *communion* to be in harmony with others; or a religious tradition involving aligning one's self to a supernatural power.

25 Population, migration and trade

1 a mo, **b** con, **c** reg, **d** opp, **e** comm, **f** eco. **2 a** pop, **b** stra, **c** nati **3** from the U – urban, from the E – enemies, from the J – justice, from the I – inequality. **4 a** individual, **b** attack, **c** steal, **d** victory, **e** oppression, **f** wealthy, **g** tourism.

26 Wealth and poverty

1 inequality, extreme, essentials, sustainability, opportunities, organisations, agencies, technology, infrastructure, gender, influence, demographic. **2** education, shelter, nutrition, healthcare, water, safety. **3 a** W, **b** P, **c** W, **d** W, **e** P, **f** P, **g** W, **h** P. **4** Answers will vary.

27 Emergency relief

1 manage, accept, assist, assess, include. **2** Answers will vary. **3** Possible answers: *communications* cell phone, radio, batteries; *baby care* nappies, formula, bottles; *personal hygiene* soap, toothbrush/paste, sanitary products; *first aid* bandages, antiseptic, plasters/dressings, medicines; *lighting/heating* matches, firewood, torch/batteries; *protection from insects* insect repellent; insect spray; mosquito net.

28 Citizenship and human rights

1 community, nation, culture, responsibility, society, constitution. **2, 3** Answers will vary. **4** government, contemporary, illegal, cultural, societies, locally, physical, transformation, citizenship, immigrant.

29 Towards a global culture

1 *diversity* variety, *involvement* participation, *modify* change, *global* international. **2, 3** Answers will vary. **4** INFORMATION LINKS: satellite technology, internet, education, communications, worldwide advertising; ECONOMIC LINKS: foreign aid, offshore investments, trade, employment, transnational corporations. POPULAR CULTURE LINKS: fashion, travel, education, Hollywood films, downloadable MP3 music, franchising of fast food chains. NOTE: Some of these terms fit into alternative categories as well (e.g. fast food franchising is also an economic link). **5** Answers will vary. Possibilities: travel, television, movies, the internet, books, the print media, photographs, advertising, word of mouth and general education. **6** Answers should cover the possibilities and problems associated with the redistribution of wealth.

30 Sustainable development

ACROSS 1 consumption, 4 people, 5 oil, 8 power, 10 sustainable, 13 quest, 14 rich, 15 dirty, 16 attitudes, 18 population, 19 timber, 20 gas, 21 use, 22 many, 23 genuine, 25 fresh, 29 provide, 30 coal, 31 truly, 32 developing, 33 desperate.
DOWN 1 conservationists, 2 sort, 3 pain, 6 luxury, 7 preserve, 9 widening, 11 environment, 12 recent, 13 quickly, 17 demands, 20 gone, 23 greed, 24 eat, 25 future, 26 hope, 27 planet, 28 can, 30 care.

Instant Lessons

Quality ready-to-use resources

Each book in the **Instant Lessons** series is a collection of fresh and versatile work sheet activities which may be photocopied for student use. They are unique in providing the **highest learning outcomes with instant usability**.

Versatile uses		Teaching benefits	
Supplementary classroom lessons	✓	Creative teaching ideas	✓
Homework activities	✓	Developing greater student interest and understanding	✓
Reinforcement of learning	✓	A fresh approach to a topic	✓
Extension work for advanced students	✓	A way to target student weaknesses	✓
Preparation for assessment	✓	Suitable for individual or group work	✓
Exam revision	✓	A variety of activities for home study	✓

Use them to supplement your existing resources, to extend student capabilities, for revision purposes, or for class work when a regular teacher is absent.

Literacy in Geography Years 9–10

This series was created to support geography teachers working to improve their students' understanding of the metalanguage of this subject area. Poor literacy skills often prevent students from fully engaging with content. This resource enables students to learn and understand key geographical terms as well as revise core social, physical, cultural and built environment concepts.

The work sheets are ideal for consolidating skills in using an atlas, employing a range of research tools and working with data and statistics. They are designed to stand-alone as whole lessons, or can be effectively incorporated into existing units. Types of tasks include: using word fragments, cloze tasks, selecting correct terms, completing maps and diagrams, classifying and describing, labelling, sketching, mind mapping, writing reports, word origins and puzzles.

Topics include

The Asia-Pacific region
Indigenous Australians
Emergency relief
Graphs, charts and tables
Research and data collection
Climate change and statistics
Meeting global challenges
The world's water resources
World Heritage sites
Threatened habitats
Citizenship and human rights
Sustainable development

Associated titles in the Instant Lessons series

Literacy in Geography Years 7—8

Instant Lessons PowerPoint–Geography

- The Environment and resource management
- People, politics and economics
- Our physical world
- People and resources–a global view
- Mapping, data and diagrams

Middle Years Geography

- Understanding map basics
- Understanding atlases and map types

Geography Essentials

- Understanding data and graphs
- Understanding diagrams

Visit the Blake Education website or email info@blake.com.au for more information about the Instant Lessons series and ordering advice.
